Being born and brought up in Kashmir, paradise on earth, nestled in the highest and most glorious mountain range on earth, the Himalayas is indeed a reward of destiny. The landlocked

valley of Kashmir has a unique history of art, culture, spirituality, food, and lifestyle, which the author weaves masterfully into a rich tapestry with his life experiences. An account of his recent visit to Kashmir in July 2016, which he calls a sentimental journey- a pilgrimage to the homeland, is captivating. It engages the reader with an intensely human journey of the life of the author in Kashmir and beyond from 1930's to the present.

This volume of Progress in Clinical Neurosciences comprises review articles on various aspects of movement disorders and cerebrovascular diseases in Neurology, and vascular surgery and neuro-oncology in Neurosurgery. Besides these, there are chapters on the Consumer Protection Act, normal pressure hydro-cephalus and miscellaneous topics. The authors of these chapters are well recognized for their work and the exhaustive review of the literature contained in the chapters will benefit not only postgraduate students but will also update the knowledge of practising clinicians.

Education plays a vital role in the positive development of communities at both a local and global level. By becoming more informed, citizens can make better contributions to society. Open and Distance Learning Initiatives for Sustainable Development is a critical reference source for emerging academic perspectives on the role of higher education programs in contemporary society. Including a range of pertinent topics such as mobile learning, environmental education, and community building, this book

is ideally designed for educators, researchers, students, and professionals interested in the intersection between sustainable development and education.

The prevalence of Diabetes Mellitus is increasing rapidly all over the world and more so in the developing countries. The global burden of diabetes is expected to double between 2000 and 2030, with the greatest increases in prevalence occurring in the Middle East, sub-Saharan Africa and India. Moreover, the development of type 2 diabetes during the childbearing years is also likely to increase, primarily in the developing countries. It has already been established that Diabetes is the most common primary cause leading to end stage renal disease (ESRD) and Diabetic Nephropathy is the leading cause of chronic kidney disease (CKD) in India. The cornerstones of management of Diabetic Kidney Diseases include early diagnosis of diabetic nephropathy, prevention of its progression and treatment of the co-morbid conditions. Substantial under-diagnosis of both diabetes and chronic kidney disease leads to lost opportunities for prevention. An inadequate or inappropriate care of patients with diabetic kidney disease contributes to disease progression eventually up to a stage that requires renal replacement therapy, which is not a feasible option for many on a long-term basis, especially in a developing country like ours. This book covers various aspects of diabetic kidney disease in detail and attempts to familiarize the reader with the existing aspects of the conditions as well as touch upon the new advances in the field. The first chapter outlines the extent to which the condition affects the population globally as well as in our country. The second chapter explores the underlying mechanism by which the disease starts and progresses and the pathological markers

of the same. The third chapter delineates the clinical and diagnostic markers of the condition. The fourth and fifth chapters speak of the non-diabetic glomerular and non-glomerular diseases in diabetics. The sixth chapter addresses the most important and desirable goal of preventing the progression and ideally the onset of the disease. The seventh chapter puts together the various treatment modalities available and the subsequent chapter explores the management options for cases requiring renal replacement. In addition to the emphasis to Indian literature at the end of each chapter, the ninth chapter is specially included to highlight the salient aspects of this condition from the Indian perspective. This book will be beneficial not only for the nephrologists, but also for the epidemiologists, medical students, diabetologists and every doctor who deals with diabetes mellitus.

Indian Journal of Clinical Psychology

The violent end of an architect leads Juliano, living at the foothills of the Himalayas in India, on a strange trail across the globe to uncover a sinister plot that is so explosive that some might do anything to prevent it from coming to light. With stakes so high, Juliano finds himself moving from the backstreets of Pisa to the bars in Moscow,

finding things unknown to most. As he desperately looks around, he comes across several others who are running and following blood trails across Europe and North America. From the sleepy suburbs of Toronto to the trend-setters in Washington D.C. and Monaco, there are sinister forces following them that will stop at nothing. The chase, the pace will continue to get even more frantic and ruthless as the young and restless all cross hurdles and search for clues until they merge at a common place and common thread. With billions of dollars at stake, in the invisible world of assassins and cryptocurrencies, they need to fight together to survive—and find the traitor amongst them. Odds are against them and they are doomed to fail unless... they all came back.
