Written by noted nursing educators Jacqueline Rosenjack Burchum and Laura Rosenthal, this text helps you understand and apply pharmacology principles as opposed to simply memorizing drug facts. Clear, engaging writing style simplifies complex concepts, making difficult pharmacology content not only understandable but actually enjoyable. Prototype Drugs approach focuses on representative drugs that characterize all members of a given drug group, so that you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. Nursing implications of drug therapy are integrated throughout the text to reinforce the integral relationship between drug therapy and nursing care, and also summarized in Summary of Major Nursing Implications sections at the end of chapters. Special Interest Topic boxes examine the everyday impact of pharmacology with vignettes including Medication Overuse Headache: Too Much of a Good Thing and Antibiotics in Animal Feed: Dying for a Hamburger and Chicken
