This latest flagship model in the Coolpix series features a large 1/1.7-in. Backside illumination 12MP CMOS sensor, a bright and fast Nikon lens that supports 7.1x optical zoom and a fully articulated screen. It also supports macro photography from as close as two centimeters, as well as telephoto shooting. The bright, ultra high-resolution 3in. LCD monitor has a wide viewing angle that can be rotated to allow more convenient viewing when shooting from difficult angles. The 12.2MP backside illumination CMOS sensor enables better image quality at high sensitivities, and high-speed continuous shooting at approximately 8 frames per second. The combination of fast-speed sensor with its full-HD 1080p video the Coolpix P7700 user can also enjoy superior picture quality movies as it is equipped with movie custom setting mode and allows manually specified shutter speed, aperture, and ISO sensitivity to achieve desired results. The built-in stereo microphone captures clear, natural audio—it even includes wind-noise reduction.
