The traditional approach that Dave O'Sullivan was taught in University was to look at the site of pain,

perform some mobilisations if appropriate and then load the area, usually with eccentrics.

But what happens when you use this approach with REAL LIFE patients? Dave

Download Free Physical

Rehabilitation

noticed some patients responded and got better SLOWLY with time, but he also noticed others didn't respond as the textbooks would have us believe. But what if there

was another way to look at the human body that considered the whole person in front of you and not just the site of pain? This book is that alternative and Dave O'Sullivan
