Aimed at academic, professional and general readers, Bush, city, cyberspace provides a snapshot of the state of Australian children's and adolescent literature in the early twenty-first century, and an insight into its history. In doing so, it promotes a sense of where Australian literature for young people may be going and captures a literary and critical mood with which readers in Australia and beyond will identify. The title of the work is intended to capture the fact that the field has changed dramatically in the century and a half that 'Australian children's literature' has existed, from the bush myths and heroism that inform the past and the present, through the recognition that the vast majority of authors and readers live in cities, to the third wave of 'cyberliterature' that incorporates multimedia, hypertext, weblinks and e-books - none of which lessens the enduring enthusiasm of practitioners and readers for books. Bush, city, cyberspace is not meant to be an encyclopedic volume. Rather, well-known, recent and/or award-winning works have been emphasised, with the addition of others where these help to illuminate particular points. The book is similar in coverage and approach to Australian Children's Literature: An Exploration of Genre and Theme, written by the same three authors and published by the Centre for Information Studies in 1995. In the intervening period, much has changed in the field, notable examples including the blurring of the dividing line between 'quality' and 'popular' literature; the blending of genres; the rise of a truly indigenous literature; the demise, to a significant extent, of 'Outbackery' in fiction; the acceptance of multiculturalism as the norm; and the advent of the literature of cyberspace, with new methods, and the sheer speed, of communication between writer and reader. All these trends, and others, are reflected in this work.

"Written to engage you with real world issues and questions in economics, this book provides up-to-date coverage of the financial crisis and its many subsequent implications, which are vital to understanding today's economic climate. Case studies help you to understand how economics works in practice, and to think critically"--Back cover.

Micro/Macro Economics for Life 2e addresses the growing market needs and trends toward a literacy targeted approach to teaching economics, supported by an active-learning pedagogy and premium online teaching and learning resources. Microeconomics for Life offers a new narrative-driven approach to learning and teaching economics that demonstrates the relevance of economics to students. Accessible language and graphs, engaging first-person writing, a less-mathematical approach, and practical examples connect economics to students' lives in a meaningful way. This text helps students become economically literate citizens, unlike traditional texts which prepare them to become economics majors.

"Divorce mediation offers mental health professionals and lawyers an effective way to help couples dissolve their marriages, minimizing the frustration and animosity commonly associated with the adversarial process. The rapid growth of divorce mediation centers is evidence of the need for specially trained professionals who can continue working with clients once the decision to divorce is made. This handbook will enable clinical psychologists, counselors, clergy, and social workers to expand their practice into this important field. Lawyers also will find the book useful in relating to divorce clients and to mediators. The author presents a model for helping couples negotiate mutually beneficial separation agreements while coping emotionally with divorce. He demonstrates how a mediator helps resolve key issues concerning the division of personal and real property, support, children, and plans for the future. He gives step-by-step guidelines for moving through the mediation process and illustrates this with nine case studies. Also included are a discussion of the special problems of children of divorcing couples, and appendices containing a manual for clients and sample separation agreements." -- Jacket.

"To change the way students see the world: this is my goal in teaching economics and in writing this book. Three facts about students are my guiding principles. First, they want to learn, but they are over-whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's world and be better prepared for life after school. So, they must be shown how to apply the timeless principles of economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles"--

Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses. Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. This analytical style, while not ultimately more demanding than disciplines, feels unfamiliar to most students and requires practice. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.

Rigorous and modern now with calculus integrated into the main text."

Microeconomics, Global Edition

**Set in Sydney in the 1970s and 1980s, 'Blue Murder' is the story of the friendship between drug dealer and robber Arthur Stanley 'Neddy' Smith and Detective Sergeant Roger 'The Dodger' Rogerson -- and the pot of gold and broken lives that friendship produced. Ian David, the writer of 'Police Crop', 'Joh's Jury' and other TV dramas, researched the story extensively. He met with Neddy Smith and conducted hundreds of interviews as well as consulting published works such as 'Darren Goodsir's Line of Fire' and Neddy Smith's own autobiography 'Neddy'. The result is a powerful and frightening story about police corruption and Sydney's underworld.**

**This book examines the fundamental question of how legislators and other rule-makers should handle remembering and forgetting information (especially personally identifiable information) in the digital age. It encompasses such topics as privacy, data protection, individual and collective memory, and the right to be forgotten when considering data storage, processing and deletion. The authors argue in support of maintaining the new digital default, that (personally identifiable) information should be remembered rather than forgotten. The book offers guidelines for legislators as well as private and public organizations on how to make decisions on remembering and forgetting personally identifiable information in the digital age. It draws on three main perspectives: law, based on a comprehensive analysis of Swiss law that serves as an example; technology, specifically search engines, internet archives, social media and the mobile internet; and an interdisciplinary perspective with contributions from various disciplines such as philosophy, anthropology, sociology, psychology, and economics, amongst others.. Thanks to this multifaceted approach, readers will benefit from a holistic view of the informational phenomenon of "remembering and forgetting". This book will appeal to lawyers, philosophers, sociologists, historians, economists, anthropologists, and psychologists among many others. Such wide appeal is due to its rich and interdisciplinary approach to the challenges for individuals and society at large with regard to remembering and forgetting in the digital age.**

**This best-selling text is still the most modern presentation of the subject. The Varian approach gives students tools they can use on exams, in the rest of their classes, and in their careers after graduation.**
