FOOD and interdisciplinary research are the central focus of the 1st International Conference on Food Design and Food Studies: Experiencing Food, Designing Dialogues, reflecting upon approaches evidencing how interdisciplinarity is not limited to the design of objects or services, but seeks awareness towards new lifestyles and innovative ways of dealing with food. This book encompasses a wide range of perspectives on the state of the art and research in the fields of Food and Design, making a

significant contribution to further development of these fields. Accordingly, it covers a broad variety of topics from Designing for/with Food, Educating People on Food, Experiencing Food and other Food for Thought.

This book includes a selection of reviewed papers presented at the 9th China Academic Conference on Printing and Packaging, which was held in November 2018 in Shandong, China. The conference was jointly organized by the China Academy of Printing Technology and Qilu University of Technology (Shandong Academy of Sciences).

With 8 keynote talks and over 200 presented papers on graphic communication and packaging technologies, the conference attracted more than 300 scientists. The proceedings cover the recent findings in color science and technology, image processing technology, digital media technology, mechanical engineering and numerical control, materials and detection, digital process management technology in printing and packaging, and other technologies. As such, the book is of interest to university researchers, R&D engineers and graduate students in the field of graphic arts, packaging, color

Learning from Singapore tells the inside story of the country's journey in transforming its education system from a struggling one to one that is hailed internationally as effective and successful. It is a story not of the glory of international test results, but of the hard work and tenacity of a few generations of policy makers, practitioners and teacher trainers. Despite its success, Singapore continues to reform its education system, and is willing to deal with difficult issues and challenges of change. Citing

Singapore's transformation, author Pak Tee Ng highlights how context and culture affect education policy formulation and implementation. Showing how difficult education reform can be when a system needs to negotiate between competing philosophies, significant trade-offs, or paradoxical positions, this book explores the successes and struggles of the Singapore system and examines its future direction and areas of tension. The book also explores how national education systems can be strengthened by embracing the creative tensions generated by paradoxes such as the co-existence of timely

"Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United States and about half that of Western European countries. In the last few years, there has been an increased advancement and evolution in semantic web and information systems in a variety of fields. The integration of these approaches to ontology engineering, sophisticated methods and algorithms for open linked data extraction, and advanced decision-making creates new opportunities for a

bright future. Innovations, Developments, and Applications of Semantic Web and Information Systems is a critical scholarly resource that discusses integrated methods of research and analytics in information technology. Featuring coverage on a broad range of topics, such as cognitive computing, artificial intelligence, machine learning, data analysis, and algorithms, this book is geared towards researchers, academicians, and professionals seeking current information on semantic web and information systems.

Barnes addresses a series of related issues associated with collection and display: how museums deal with difficult and controversial subjects; the role they play in mediating between the object and the audience; the role of the Other in the creation of Self and national identities; the nature, role and function of art in society; the museum as image-maker; the impact of communism (and Maoism) on the cultural history of the twentieth-century; and the appropriation of communist visual iconography. This book will be of interest to researchers and students of museology, visual and

Since independence in 1957, Malaysia has become a globally-recognised industrial trading partner. With a 60% Muslim population, it also enjoys the reputation of being a moderate and peaceful nation. However, with just a short time left to realising its Vision 2020 of developed nationhood, the pathway of nation building still seems ambiguous. There is a brewing tension in its race and ethnic relations which has permeated the various fronts, namely politics, society, economics and education. This book analyses the education policies that have been formulated and implemented in Malaysia

since independence. It demonstrates how these policy enactments have influenced the nation's growth and transformation, and the challenges faced in creating a model of equity and multicultural co-existence among its racially and ethnically diversified people. Shedding light on these issues, it points towards the major mending that is needed for Malaysia to become a truly developed nation. Chapters include: Education of ethnic minorities in Malaysia: Contesting issues in a multiethnic society Access and equity issues in Malaysian higher education Graduate employability in government discourse: A critical perspective This comprehensive book is a case study on Malaysia that will supplement researchers and
