Porsche Turbo: The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance, both on the track and on the street. Don't let this one fly past you!

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

It was no small leap for Porsche from its giant-killing Spyders to the powerful Type 917 that swept all before it. The gap was bridged by its 900-series sports-racing cars, here depicted in rare original photography from the Ludvigsen Library. Karl Ludvigsen has personally selected both dramatic action images and intimate technical details of the 904, 906, 907, 908 and 910, which with their air-cooled flat-six and flat-eight engines brought Porsche to the fore in both international sports-car racing and the European Hillclimb Championship, which Porsche won in 1966 and 1968. These were the years of spare-no-expense building of fresh cars for every race, funded secretly by Volkswagen, with exotic titanium and beryllium components. Led technically by the thrusting Ferdinand Piëch, Porsche built the ultra-light 908/03 expressly to win both the Targa Florio and Nürburgring — which it did. Porsche expert Karl Ludvigsen introduces this must-have pictorial panorama for all fans of the white racers from Zuffenhausen.

other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process. " —Harper's " One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs. " —The Nation " A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance. " —Los Angeles Free Press

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up

to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose *The Mercedes-Benz 300 SL Book* has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

The definitive guide to 100% original and correct Porsche 911 restoration, this book covers every inch of each air-cooled 911 generation in precise detail. It includes mechanical details, bodywork, interiors, and more, all illustrated with exquisite color photographs and in-depth text. The last word on the Porsche 911, this book is the resource that no collector--whether a practical restorer or a die-hard enthusiast--can afford to be without.

Regarded as one of the great automotive engineers of the twentieth century, Ferdinand Porsche is well remembered today for his remarkable automotive designs including the Volkswagen Beetle and Auto Union Grand Prix cars. Yet there is another side to his extraordinary career, for he was an equally inventive designer of military vehicles and machinery. In this field too he excelled. Indeed the sheer versatility of his contribution is astonishing. Karl Ludvigsen's study is the definitive guide. He tells the complete story, focusing on Porsche's relations with the German armed forces and on the stream of advanced designs he was responsible for. Included are Austro Daimler's pioneering aero engines, the Kübelwagen, Schwimmwagen, Type 100 Leopard tank, Ferdinand or Elefant tank destroyer and the astounding Type 205 Maus tank. He also describes Porsche's creative work on aero engines, tank engines and even a turbojet for the V-1 flying bomb. Karl Ludvigsen's account confirms the preeminence of Ferdinand Porsche as a brilliant and prolific engineer, one of the most remarkable of his generation. **REVIEWS ...hard to put down...**The author has

given us a eminently readable but learned treatise on a less known aspect of one of the greatest engineers of the twentieth century. The illustrations are well chosen and nicely reproduced, fitting the text and thus adding to the interest...with the added bonus of being written by Karl Ludvigsen it is a must have. Buy a copy and spend a day reading it, it is really hard to put down. Most enthusiastically recommended. The Bulletin" of the Vintage Sports Car Club UK ...crammed with information, original photographs, illustrations and drawings, we reckon it's an essential addition to any military vehicle enthusiast's reference library" Classic Military Vehicles In his new book, Ludvigsen approaches the legend from a new and surprisingly rich angle - the Professor's contribution to military ordnance, the design and production of which occupied him continuously throughout his long career. Ludvigsen acknowledges that some of the text has appeared in his other books, but here it is amplified, richly illustrated and arranged in a new context that, stripped of the distraction of Porsche's concurrent motor car endeavours, produces a compelling tale of a prolifically talented engineer dedicated to innovation and perfection stubbornly battling against the often seemingly impossible constraints imposed upon him. Even if Porsche had never designed a 'proper' car, he would have still had a remarkable CV. The Automobile (UK) A meticulous and enlightening effort, running to almost 300 pages and being richly illustrated with more than 200 photos and drawings. Readers come away with a clear reminder of just what a brilliant and prolific engineer Porsche was, but also a more informed view of the controversial nature of some of his efforts. Professional Engineering ...fascinating book on an unusually fascinating man, who's name is still a household word more than half a century after his death... This book doesn't shy away from what may best be considered the "dark side" of Porsche's life and times; the

dealings with the Nazi's, and his relationship with Adolph Hitler, nor the use of slave labor in the factories manufacturing his products. In-fighting among the "personalities" who ran the various industries and manufacturing plants is well described, as is Porsche's less than cordial relationship with Hitler's Minister of Armaments and War Production; Albert Speer. Kudos to the author for a job well done on such a complex subject! Armor Modeling and Preservation Society Professor Porsche's Wars is illustrated with over 200 images and is an in-depth account of Porsche's little-known career as a military engineer during both World Wars. It features details of Porsche's relations with the armed forces of Austria-Hungary, and later Germany under both the Weimar regime and Adolf Hitler's Third Reich. Bury Mercury A sobering account of a difficult time. Classic Cars We're all familiar with Ferdinand Porsche's automotive design work, but an oft-forgotten side of his career saw him designing many military vehicles. This book is a fascinating look at his work for the military, which spanned the first half of the twentieth century through both the First and Second World Wars. [It] chronicles Porsche's work for Adolf Hitler as one of his most trusted designers, where he was responsible for vehicles such as the Kubelwagen, the Schwimmwagen, and the Type 205 Maus tank. Porsche's work on aero and tank engines, and his involvement with the V-1 flying bomb, are also covered. GT Porsche I must say this book was not what I was expecting. It did not tell the story of the legendary sports car designer and manufacturer that we are all familiar with, but one of an innovative and forward thinking engineer, who was an active and influential part of the German 'War Machine' during both world wars. His design of the VW Beetle was not a surprise but his significant involvement in Aero engines, Marine engines, Tanks and even the V1 flying bomb certainly was. Ferdinand Porsche's relationship with Adolf

Hitler, post war arrest and subsequent imprisonment as a suspected war criminal also came as a surprise...this book will appeal to not just those with an interest in engineering, but also those with an interest in the history of the first half of the 20th Century. Icen Magazine Readers will have come to expect lavishly produced and thoroughly researched books on Porsche from Karl Ludvigsen but this latest work from the Suffolk domiciled authority on all things Porsche takes the reader along a slightly different road in that it describes the talented engineer's work on military projects rather than motor cars. ... This is a book that is hard to put down, especially for anyone with an engineering bent. The author has given us an eminently readable but learned treatise on a less known aspect of the work of one of the greatest engineers of the twentieth century. VSCC Magazine If you believe that Karl Ludvigsen has already illuminated all aspects of the Porsche brand and person, now this book arrives that deals with the less-known military designs. A comprehensive bibliography and index complete a work that is not just intended for those interested in automobiles. Austro Classic

Porsche Excellence was Expected : the Complete History of the Sports and Racing Cars Automobile Quarterly Porsche 70 Years There Is No Substitute Motorbooks International Erich Strenger (1922-1993), an author, photographer, designer, and illustrator, left his mark on the look of Porsche during the company's formative years in the early '50s and '60s with a design language that, for the most part, continues to bear his signature to this day. He also created countless print products for this successful sports car maker, including

Christophorus Zeitschrift für die Freunde des Hauses Porsche, the brainchild of Erich Strenger and Richard von Frankenberg. Over the course of a collaborative relationship with Porsche spanning more than thirty years, the graphic artist, who started out working alone, founded an advertising agency in the heart of Stuttgart with a staff of up to eleven permanent employees. There, Strenger would later create countless racing posters, much like those he had designed in his early days working for Dr. Ing. h.c. F. Porsche AG as a freelancer in the early '50s. Strenger was instrumental in influencing and molding the image of the Porsche brand as we know it today. This book showcases a first-ever comprehensive collection of his work, created over the course of his collaboration with Porsche between 1951 and 1988. This monographic and monothematic publication brings the noteworthy highlights of his work to the forefront, focusing attention on the designer's approaches and methods.

Officially licensed with the ACO, the organisers of the annual Le Mans 24 Hours race, this sumptuous book is the seventh title in this decade-by-decade series and completes coverage of the endurance classic from its very beginning to the end of the 20th century. This title covers the nine races of the 1930s (no race was held in 1936) in which honours were divided between Italian, French and British manufacturers. Each race is exhaustively covered in vivid photographs, an insightful commentary providing more detailed information than has ever been published about the period, and full statistics. Compiled by an acknowledged authority of this legendary race, this series of books is treasured by all enthusiasts of sports car racing. In the 1930 race Bentley achieved its fourth consecutive success, Woolf Barnato and Glen Kidston the winning drivers in the very same

'Speed Six' with which they had won in 1929. Two of Britain's greats of the era, Earl Howe and Henry Birkin, won for Alfa Romeo in 1931, beginning a four-race victory streak for the Italian manufacturer. Tazio Nuvolari, the outstanding Grand Prix ace of the pre-war decade, secured an intensely dramatic last-lap victory in 1933 in the closest Le Mans finish to date. Lagonda (1935) and Delahaye (1938) secured a win each, while Bugatti took two with the great Jean-Pierre Wimille driving its innovative Type 57 'Tank' cars, with all-enclosing bodywork. Highly detailed year-by-year treatment of the decade's nine races, giving unprecedented depth of information and photographic coverage for each year. Official status provides a number of unique features, including the reproduction of photographs and full-colour race poster artwork from the ACO's archives. Complete data for each year includes technical regulations, entry list, circuit changes (with diagram), full results and category awards. The whole work is beautifully designed and presented.
