The one-stop-shop for prospective handgun buyers. The market for new handguns is expanding rapidly, and that's good news for consumers. Each year more and more new models break cover and there has never been a better time to be in the market for a new handgun, whether you're a recreational shooter, a concealed carry permit holder, a hunter or a serious competitive shooter. Today's handguns offer superb machining and utilize some of the most technologically-advanced alloys, polymers and finishes to help make the current crop of handguns lightweight, accurate, durable, and affordable. This increase in product offerings stem from new interest in handguns, primarily as a result of nationwide issuance of concealed carry permits. As laws have been enacted that protect the rights of gun owners and defend our personal liberties, more and more new shooters are showing up on the range. But first-time shooters and new concealed carry permit holders are not the only segment of the handgun market that is seeing growth and interest. Pistol competitions have become more popular and more advanced, evolving from slow-fire matches at local gun clubs to modern IPSC, IDPA and 3-gun competitions. Handgun Buyer's Guide will help both the bewildered new shooter find their feet and purchase a handgun, find the best accessories, and locate a place to practice on hone their skills. You'll find all you need for owning a handgun in the Handgun Owner's Guide! Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home. A guide to the identification of 4,400 firearms with current market values. The most current, up to date, full color manual anywhere on the PA-63 pistol. Authored by

Shooter's Bible Guide to Firearms Assembly, Disassembly, and Cleaning

A comprehensive guide to Armenian writers and literature spanning five centuries. Combining features of a reference work, bibliographic guide, and literary history, it records the output of almost 400 authors who wrote both in Armenia and in the communities of the Armenian diaspora. Presents a general history of the literature, with chapters devoted to a single century and prefaced by information on the era's social, cultural, and religious milieus; followed by a section of biobibliographical entries for Armenian authors, a section of bibliographies and reference works, and a listing of anthologies of literature both in Armenian and in translation. Includes references to earlier authors and to sources of influence, both Armenian and non-Armenian. A final section contains bibliographies devoted to particular genres and periods, such as minstrels, folklore, and prosody. A thematic discussion of the works of more than 150 poets, historians, monks, and others highlights the themes that captured the imagination of Armenian authors.--From publisher description.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 23. Chapters: Walther PP, Ruby pistol, korpion vz. 61, Remington 51, Dreyse M1907, Mauser HSc, Kel-Tec P-32, .32 ACP, Colt Model 1903 Pocket Hammerless, Beretta 3032 Tomcat, FN Model 1910, MAS-38, Seecamp, SIG Sauer P230, Savage Model 1907, Le Francais, Beretta M 1935, MAB Model D pistol, JO.LO.AR., Vz. 50, FN M1900, Z vz. 27, Hino Komuro M1908 Pistol, Frommer Stop, Davis Warner Infallible, Bayard 1908, Ashani, Erma ESP 85A. Excerpt: The Walther PP series pistols are blowback-operated semi-automatic pistols. They feature an exposed hammer, a double-action trigger mechanism, a single-column magazine, and a fixed barrel which also acts as the guide rod for the recoil spring. The series includes the Walther PP, PPK, PPK/S, and PPK/E. They are manufactured by Carl Walther GmbH Sportwaffen in Germany, Manurhin in France following World War II, and then in the United States by Interarms in Alexandria, Virginia and currently Smith & Wesson. All production has been under license from Walther. The PP was released in 1929 and the PPK in 1931; both were popular with European police and civilians, for being reliable and concealable. During World War II they were issued to the

German military and police, the Luftwaffe, and Nazi Party officials; Adolf Hitler shot and killed himself with his PPK (a 7.65mm/.32ACP) in the Fuhrerbunker in Berlin. Moreover, the Walther PPK (also a 7.65mm/.32ACP) pistol is famous as fictional secret agent James Bond's signature gun in many of the films and novels. Ian Fleming's choice of the Walther PPK directly influenced its popularity and its notoriety. The most common variant is the Walther PPK, the Polizeipistole Kriminalmodell (Police Pistol Detective Model), indicating it was more concealable than the original PP and hence better suited to plainclothes or undercover work. Sometimes, the name...

Books in the Quality and Business Excellence series can help readers enhance customer value and satisfaction by integrating the customer's voice into design, manufacturing, supply chain, and field processes. Although there are many Six Sigma books on the market, few clarify the essential aspects of its implementation across various industries. The Tactical Guide to Six Sigma Implementation fills this need. Simplifying a complex subject and removing the intimidation of using statistics, the book takes readers through the five phases of the Six Sigma methodology—Define—Measure—Analyze—Improve—Control (DMAIC). In ten clearly written and easy-to-understand chapters, readers learn the purpose of each phase and what activities must be performed in each phase. The book illustrates the layout of the interaction of organizational processes—defining product and information flows separately such that each process receives product or information and, after completion of the process, supplies the output to the next process. The author identifies organizational processes through turtle and SIPOC diagrams, defining the process owner, inputs and outputs, and process customer for each process. He also explains how to determine the measures and goals of the process, and how to document the process so that further process improvements can be implemented through management reviews. The text presents a comprehensive process control plan assessment to comply with automotive, aerospace, and all types of manufacturing and service processes. It details 17 global quality management system processes covering management responsibility, resource management, product realization policies, and management analysis and improvement policies. It also provides comprehensive root cause analysis and problem solving techniques. Numerous figures, charts, formulae and forms are included throughout the book and all statistics are described to the exact level of understanding required. Books in this series are suitable for use as basic textbooks for Green Belt, Black Belt, BBA, and MBA courses in global quality, Lean Six Sigma, and business

excellence.

Gun Trader's Guide to Handguns

Over the last three decades the process industries have grown very rapidly, with corresponding increases in the quantities of hazardous materials in process, storage or transport. Plants have become larger and are often situated in or close to densely populated areas. Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough, Bhopal, Chernobyl, Three Mile Island, the Phillips 66 incident, and Piper Alpha to name but a few. The field of Loss Prevention is, and continues to, be of supreme importance to countless companies, municipalities and governments around

the world, because of the trend for processing plants to become larger and often be situated in or close to densely populated areas, thus increasing the hazard of loss of life or property. This book is a detailed guidebook to defending against these, and many other, hazards. It could without exaggeration be referred to as the "bible" for the process industries. This is THE standard reference work for chemical and process engineering safety professionals. For years, it has been the most complete collection of information on the theory, practice, design elements, equipment, regulations and laws covering the field of process safety. An entire library of alternative books (and cross-referencing systems) would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers and managers can be found in this all-encompassing reference instead. Frank Lees' world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field. Sam Mannan is professor of chemical engineering at Texas A&M University, and heads the Mary Kay O'Connor Process Safety Center at Texas A&M. He received his MS and Ph.D. in chemical engineering from the University of Oklahoma, and joined the chemical engineering department at Texas A&M University as a professor in 1997. He has over 20 years of experience as an engineer, working both in industry and academia. New detail is added to chapters on fire safety, engineering, explosion hazards, analysis and suppression, and new appendices feature more recent disasters. The many thousands of references have been updated along with standards and codes of practice issued by authorities in the US, UK/Europe and internationally. In addition to all this, more regulatory relevance and case studies have been included in this edition. Written in a clear and concise style, Loss Prevention in the Process Industries covers traditional areas of personal safety as well as the more technological aspects and thus provides balanced and in-depth coverage of the whole field of safety and loss prevention. * A must-have standard reference for chemical and process engineering safety professionals * The most complete collection of information on the theory, practice, design elements, equipment and laws that pertain to process safety * Only single work to provide everything; principles, practice, codes, standards, data and references needed by those practicing in the field
