The debut monograph from award-winning and acclaimed architecture and interior design practice Universal Design Studio - and the perfect expression of this award-winning studio's ethos and approach: to design from the inside out

Written by the chair of the LEED-Neighborhood Development (LEED-ND) initiative, Sustainable Urbanism: Urban Design with Nature is both an urgent call to action and a comprehensive introduction to "sustainable urbanism"--the emerging and growing design reform movement that combines the creation and enhancement of walkable and diverse

places with the need to build high-performance infrastructure and buildings. Providing a historic perspective on the standards and regulations that got us to where we are today in terms of urban lifestyle and attempts at reform, Douglas Farr makes a powerful case for sustainable urbanism, showing where we went wrong, and where we need to go. He then explains how to implement sustainable urbanism through leadership and communication in cities, communities, and neighborhoods. Essays written by Farr and others delve into such issues as: Increasing sustainability through density. Integrating transportation and land use. Creating sustainable neighborhoods, including housing, car-free areas, locally-owned stores, walkable neighborhoods, and

universal accessibility. The health and environmental benefits of linking humans to nature, including walk-to open spaces, neighborhood stormwater systems and waste treatment, and food production. High performance buildings and district energy systems. Enriching the argument are in-depth case studies in sustainable urbanism, from BedZED in London, England and Newington in Sydney, Australia, to New Railroad Square in Santa Rosa, California and Dongtan, Shanghai, China. An epilogue looks to the future of sustainable urbanism over the next 200 years. At once solidly researched and passionately argued, Sustainable Urbanism is the ideal guidebook for urban designers, planners, and architects who are eager to make a positive impact on

The impact of child maltreatment on victims, families, and society—from immediate medical care and legal services to long-term mental health care and law enforcement—cannot be understated. And it remains a severe problem in spite of increasing public awareness and stricter laws. To keep up with growing body of professionals staying informed on this subject, the third edition of *A Practical Guide to the Evaluation of Child Physical Abuse and Neglect* assists the reader in recognizing abuse/neglect (exclusive of sexual abuse) in children and youth, and determining its extent. Illustrated with clinical photographs, the Guide details systematic evaluation procedures, explains the tasks of an evaluation team, and expands and

“Designing Inclusive Futures” reflects the need to explore, in a coherent way, the issues and practicalities that lie behind design that is intended to extend our active future lives. This encompasses design for inclusion in daily life at home but also extends to the workplace and for products within these contexts. For example, given trends in employment sector growth, skills requirements, labour supply and demographic change, there is a need to predict the critical areas where individual capabilities are mismatched with the physical, social and organisational demands of work. This mismatch, which can be addressed within the domain of inclusive design, is pervasively linked to real artefacts in workspaces and their intersection with

to meet WHO's objective of healthful housing for all by the year 2000. The principles of healthy housing have universal applicability, as most countries of the developed world have areas of slum or otherwise insanitary housing. It is hoped that this guide will be used extensively as a reference to basic health requirements for new housing and human settlements and as a guide for assessing the hygienic quality of existing housing. The book would sit well alongside inter-professional and community education programmes. Timely and useful resource that guides educators in using

gaining increasingly wide attention in recent years. As greater numbers of students with disabilities attend postsecondary educational institutions, administrators have expressed increased interest in making their programs accessible to all students. This book provides both theoretical and practical guidance for schools as they work to turn this admirable goal into a reality. It addresses a comprehensive range of topics on universal design for higher education institutions, thus making a crucial contribution to the growing body of literature on special

Family-School-Community Partnering (FSCP) is a multidimensional process in which schools, families, and communities work together to ensure the academic, social, and emotional success of students. In this new edition, the authors evaluate advances to a multitiered model of FSCP that further incorporates community alliances. Section I covers legislative, empirical, and theoretical underpinnings and

updates. Practical strategies are discussed to develop, deliver, and evaluate a cohesive system of support to improve student outcomes. Chapter addendums detail the specific approaches and associated resources to advance FSCP from infancy through adulthood. In Section II, current researchers and practitioners consider how to enhance collaborative partnerships with military, migrant/refugee, and rural communities and support gender identity and varied developmental abilities. Four culminating case stories are designed to facilitate ideas for intentional integration of FSCP domains into readers' ongoing practices. School psychologists, counselors,

Mastering the Way You See the World Inspired by Edward de Bono's Six Thinking Hats method, Jim Gilmore has created a unique and useful tool to help our ability to perceive. In his latest book, Look: A Practical Guide for Improving Your Observational Skills, Gilmore introduces the metaphor of "six looking glasses." Each looking glass represents a particular skill to master in order to enhance the way we look at the world. The six skills include binoculars, bifocals, magnifying glass, microscope, rose-colored glasses, and

Type

blindfold looking. Each looking glass provides an observational lens through which to see the world differently. This framework will help its users to:

- See the big picture**
- Overcome personal bias**
- Pinpoint significance**
- Better scrutinize numerous details**
- Uncover potential opportunities**
- See what's in the mind's eye**

These varying perspectives offer myriad practical applications: They can help any executive, manager, or designer more richly observe customer behavior, philanthropists and policy makers more keenly identify human needs, and anyone else interested in innovative thinking to first ground their ideation in practical observation. Gilmore

Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. Great design can be an agent of social change. The environmental crisis is the greatest issue of today, and according to author David Berman, consumerism is its largest cause ... often fuelled by convincing graphic and product design intended to invent 'needs'. Alternatively, creative professionals can use their skills to help spread messages and ideas the World really needs to hear, doing good by how we design and how we use design. This book offers a powerful and hopeful message that includes solutions that everyone will want to hear. In this provocative and

dramatically-illustrated book, David Berman argues that we live in an age where the democratisation of technology offers us each an opportunity to leave a greater legacy by the creative ideas we choose to share rather than the genes we strive to propagate. Indeed, the future of civilization has become our common design project. He believes that communications professionals have more conspicuous power than they realize, and play a core role in helping some corporations mislead audiences in order to invent unfulfilled 'needs' in larger and larger markets. In a World

where design has become a recognized corporate asset, designers and their clients have the opportunity to use their persuasive skills responsibly and to accelerate awareness. Recent developments regarding professionalism and ethics offer powerful hope that there is great opportunity for designers and other professionals to choose what their still-young profession will be about: creating visual lies to help sell stuff or helping repair the World by bridging knowledge and understanding.
