Higher Tier  
Application in  
Computer  
Network.

Forecasting is  
required in  
many situations.

Stocking an  
inventory may  
require

forecasts of  
demand months  
in advance. Tele

communication  
routing requires  
traffic forecasts  
a few minutes  
ahead.

Whatever the  
circumstances  
or time horizons  
involved,  
forecasting is an  
important aid in  
effective and

efficient  
planning. This  
textbook  
provides a  
comprehensive  
introduction to  
forecasting  
methods and  
presents enough  
information  
about each  
method for

This book  
provides  
insights into  
waste  
management  
practices in  
developing  
countries, and  
the application

of research and  
innovation in  
finding  
appropriate  
solutions to  
improved waste  
management.  
The chapters  
have been  
selected with a  
focus on organic  
waste

beneficiation, a  
significant  
waste stream in  
developing  
countries; the  
role of  
government and  
associated  
policy  
interventions;  
citizen  
behaviour in

support of  
Higher Tier  
greater waste  
recycling; and  
the safe  
management of  
hazardous  
waste,  
particularly  
healthcare risk  
waste.

Higher Tier  
From law schools  
to the prestigious  
firms that

represent the  
pinnacle of a legal  
career, a crisis is  
unfolding. News  
headlines tell part  
of the story—the  
growing  
oversupply of new  
lawyers,

widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of

depression, life-  
consuming hours,  
and little

assurance of  
financial stability.

The Great  
Recession has only  
worsened these  
trends, but  
correction is  
possible and, now,  
imperative. In The

seismic  
probabilistic risk  
assessment (S-  
PRA) and related  
studies which have  
become more  
important to  
increase the safety  
of nuclear facilities  
against  
earthquakes and  
tsunamis in the

face of the many  
uncertainties after  
the Fukushima  
accident. The  
topics are (1)  
Active faults and  
active tectonics  
important for  
seismic hazard  
assessment of  
nuclear  
facilities,(2)

Higher Tier  
Seismic source modeling and simulation and modeling techniques indispensable for strong ground motion prediction, and (3) PRA with external hazard and risk communication.

The Fukushima accident has showed us the limitations of the deterministic evaluation approach to external events (an earthquake and tsunami) in which there are many uncertainties.

Bookmark File  
PDF Predicted  
Paper 2 June 2014

Higher Tier  
Furthermore,  
public anxiety  
regarding nuclear  
safety because of  
an unexpected  
threat caused by  
an earthquake or  
tsunami is  
growing. The  
current policy on  
the estimation of  
the design basis of

Higher Tier  
ground motion as  
well as tsunami  
height still has not  
been improved  
following the  
Fukushima  
accident. In  
particular, the risk  
concept in a  
nuclear system  
regarding seismic  
motion and a

tsunami beyond  
the design basis is  
indispensable.

Therefore,  
research and  
development for  
PRA enhancing  
nuclear safety are  
being actively  
pursued not only  
in Japan but also  
worldwide. This
