This timely book explores pertinent questions around the legitimacy and effectiveness of EU agencies’ soft law, with a particular focus on the European Securities and Markets Authority (ESMA). It examines the variety of ESMA’s existing and newly granted soft law-making powers, which were intended to deal with the lack of effectiveness of its predecessor but are now called into question due to the ‘hard’ effect of these soft laws. The new edition of the book Study Guide for CTET Paper 1 - English (Class 1 - 5 teachers), English 5th edition, has been updated with the CTET July 2013 to Sep 2016 Solved question papers. • The languages covered in the book are English (1st language) and Hindi (2nd language). • The book provides separate sections for Child Development & Pedagogy, English Language, Hindi Language, EVS and Mathematics. • Each section has been divided into chapters. The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term ‘critical’ has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become ‘naturalized’ and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Throughout the world, teaching is looked at as one of the most respected and noble profession a person could have. A great teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation. Among various exams CTET is the most popular teaching exam in the country. Central Teaching Eligibility Test (CTET) is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher. The exam is conducted into 2 papers: Paper 1 for class 1-5 and Paper 2 for class 6-8. Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers. The new edition of Study Guide ‘Success Master CTET Paper – I for (Class I – V)’ has been prepared completely on the latest exam pattern. The book has been divided into 5 key sections and further divided into chapters providing the focused study material. After covering theoretical part this book also concentrates on the practice part, it provides Previous Years’ Solved Paper, 2 practice sets and more than 3000 MCQs for thorough practice. Ample numbers of questions have been given which are covered in a Chapterwise manner that allows candidates to understand the trend of the questions as well as the exam. This book will prove to be highly useful for the CTET Paper 1 candidates in achieving the good rank in the exam. This book focuses on understanding the process of problem construction in oral communication in foreign language contexts, examining how speakers of English as a second language approach issues in oral communication, as well as the strategies they employ to overcome these difficulties. Using theories of general communication, and in particular current approaches to L2 oral communication and strategies in interactional discourse, the authors construct a theoretical framework for defining, identifying and classifying learners’ problems and coping strategies when speaking English as a second or foreign language. The book offers a coherent process-oriented description of the complex and multidimensional nature and typology of oral interaction problems in EFL contexts, and it will be of interest to practitioners, teachers, researchers, students, and curriculum designers in Applied Linguistics and TESOL.

The future of the decades-long effort to prevent the further spread of weapons of mass destruction is at a crossroads today. If international nonproliferation efforts are to be successful, an integrated, multi-tiered response will almost certainly be necessary. A serious, thorough, and clear-eyed examination of the range of threats, challenges, and opportunities facing the international community is a necessary first step. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized, leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts: Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. Part II explains the various tools developed by the international community to address these proliferation threats. Part III addresses the proliferation risks and political challenges arising from nuclear energy production, including potential proliferation by aspiring states and nonstate groups. This Handbook will be of great interest to students and practitioners of nuclear proliferation, arms control, global governance, diplomacy, and global security and IR general.

CTET and TET English Language and Pedagogy Paper 1 and 2 for 2021 ExamsArihant Publications India limited Gerald Howard-Smith ’s life is intriguing both in its own right and as a vehicle for exploring the world in which he lived. Tall, boisterous and sometimes rather irascible, he was one of the so-called ‘Lost Generation’ whose lives were cut short by the First World War. Brought up in London, and educated at Eton and Cambridge, he excelled both at cricket and athletics. After qualifying as a solicitor he moved to Wolverhampton and threw himself into the local sporting scene, making a considerable name for himself in the years before the First World War. Volunteering for military service in 1914, he was decorated for bravery before being killed in action two years later. Reporting his death, the War History of the South Staffordshire Regiment claimed that, ‘In his men’s eyes he lived as a loose-limbed hero, and in him they lost a very humorous and a very gallant gentleman.’ As well as telling the fascinating story of Gerald Howard-Smith for the first time, this important new biography explores such complex and important issues as childhood and adolescence, class relations, sporting achievement, manliness and masculinity, metropolitan-provincial relationships, and forms of commemoration. It will therefore be of interest to educationalists, sports historians, local and regional historians, and those interested in class, gender and civilian-military relations – indeed all those seeking to understand the economic, social, and cultural life of late nineteenth and early twentieth-century Britain.

Timely, thoughtful, and comprehensive, this text directly supports pre-service and in-service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of the Common Core State Standards. Adopting a critical inquiry approach, it demonstrates how the Standards’ highest and best intentions for student success can be implemented from a critical, culturally relevant perspective firmly grounded in current literacy learning theory and research. It provides specific examples of teachers using the critical inquiry curriculum framework of identifying problems and issues, adopting alternative perspectives, and entertaining change in their classrooms to illustrate how the Standards can not only be addressed but also surpassed through engaging instruction. The Second Edition provides new material on adopting a critical inquiry approach to enhance student engagement and critical thinking planning instruction to effectively implement the CCSS in the classroom fostering critical response to literary and informational texts using YA literature and literature by authors of color integrating drama activities into literature and speaking/listening instruction teaching informational, explanatory, argumentative, and narrative writing working with ELL students to address the language Standards using digital tools and apps to respond to and create digital texts employing formative assessment to provide supportive feedback preparing students for the PARCC and Smarter Balanced assessments using the book’s wiki site <http://englishccss.pbworks.com> for further resources

Different regions of the world are making increasing demands for educational reform, especially when institutions are dissatisfied with the level of proficiency of their graduates. Since the realization of how important English education is to global success, reform to English education is becoming progressively vital in societies all over the world. The Handbook of Research on Curriculum Reform Initiatives in English Education provides research exploring the theoretical and practical aspects of a variety of areas related to English education and reform, as well as featuring coverage on a broad range of topics such as teachers’ roles, teaching methods, and professional development. This book is ideally designed for researchers, educators, administrators, policymakers, interpreters, translators, and linguists seeking current research on the existing body of knowledge about curriculum reform in English education in an international context.

Much of the literature on the emerging role of the EU as a non-proliferation actor has only a minimal engagement with theory. This collection aims to rectify this by placing the role of the EU in the non-proliferation of nuclear weapons within an analytical framework inspired by emerging literature on the performance of international organisations.

English for Specific Purposes offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

The United States Medical Licensing Examination® (USMLE®) is a three step examination for medical licensure in the United States and is sponsored by the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners® (NBME®). The USMLE assesses a physician’s ability to apply knowledge, concepts and principles, and to demonstrate fundamental patient-centred skills that are important in health and disease, and that constitute the basis of safe and effective patient care. Each of the three steps of the USMLE complements the others - medical students that aim to complete their degrees and plan to practice medicine in the USA have to pass all three USMLE Step examinations. USMLE Step 1 is designed to assess whether medical students or graduates can apply medical knowledge, skills and understanding of clinical science essential for provision of patient care under supervision. Step 2 is further divided into two separate exams – USMLE Step 2 CK and USMLE Step 2 CS. USMLE Step 2 CK assesses clinical knowledge through a traditional, multiple-choice examination. USMLE Step 2 CS tests clinical skills through simulated patient interactions. (www.usmle.org). Platinum Notes USMLE Step-2 is an affordable, comprehensive revision aid to help medical students and graduates in their preparation for Step 2 of the USMLE examinations. The book brings together all the latest topics and USMLE exam type questions into just one volume, minimizing the need for multiple revision resources. Revision questions at the end of each subject are included.

Over 90 per cent of the world population lives in countries that share a river basin with others. Freshwater resources are scarce and different nations, actors and users compete for limited resources in transboundary river basins; often conflicting with each other. Water is a resource with no substitute: it cannot be secured in sufficiently large quantities through long-distance trade deals; and, due to the interconnectivity of the hydrological system, the actions of one country in its water management have a direct bearing on the interests of neighbouring countries. For instance, in the Mekong River Basin, current hydropower and navigation developments in certain countries impact on traditional sources of income such as fisheries, and rice production in others. These kinds of changes in water use have given rise to conflict between countries in that region and others, but have also led, in some cases, to greater cooperation. The past few decades have seen a number of new agreements about the sharing of river resources and cooperation between riparian states. Negotiating for Water Resources explores the drivers of conflict and cooperation between states in transnational river basins. Drawing on extensive fieldwork and interviews on the Mekong, Danube and La Plata River Basins, the book provides a three level analysis across three case studies, including the regional framework (EU, ASEAN and Mercosur), the River Basin Organisations (ICPDR, MRC and CTC) and the micro-level. The key question of the book is: To what extent do power asymmetries prevent or inhibit cooperation between riparian states over water resources? This is linked to the question of how institutions contribute to mitigate competition for natural resources and how states interact in a multilateral arena. Overall, the book argues that cooperation in transboundary river basins is possible even where there are asymmetric power relations, challenging realist assumptions about competition and conflict over resources.

Educational technologies have revolutionized the learning and teaching environments. Offline/online applications and social media have changed the conventional learning and teaching habits and competencies. In terms of learners, it has been empirically proven that the use of educational technologies in the classroom make learning easier and more enjoyable. On the other hand, it also poses threats to students such as cyberbullying and online addiction. While exploiting the opportunities of technological use in the classroom, educators must also remain vigilant and formulate ways to overcome the challenges and risks brought by technology. Enriching Teaching and Learning Environments With Contemporary Technologies is an essential research publication that aims to present exemplary practices of technology use and their management in pedagogical purposes in learning and teaching environments. The book also analyzes problems that may arise and develops policies on educational technologies and the exploitation of technology with pedagogical purposes as part of the discussion to solve these challenges. Featuring a wide range of topics such as augmented reality, mass media, and religious education, this book is ideal for educators who want to use technology in class, educational administrators who have responsibilities for developing policies on educational technologies and managing the use of them, and researchers who want to carry out a deep investigation into the subject. Additionally, educational software developers, academicians, instructional designers, curriculum developers, education professionals, and students will also benefit from the research contained within the book.
