*At last, a book that, with honesty and humor, reveals the consultant's hidden playbook. A top-level consultant who came back in from the cold to become a corporate executive with one of the top U.S. banks, Romaine chronicles the behind-the-scenes deal making among executives, consultants, and third-party outsourcers that typifies all too many of today's corporations. . . . Romaine also presents sound recommendations that can help responsible managers and consultants survive and win. - M. A. Turin, Former IBM Group Director for International Technical Support, Vice President of Gartner Group, President of Turin Associates. . . intriguing and very relevant, particularly in light of Enron. - Ralph NaderEven if you're not in business, it's an interesting story, and worth the read. - ForewordFinally, the real story about corporate America with its increased reliance on consultants. Since the 1990s, consulting solutions have become the de facto standard for solving business problems and providing cover for corporate decision makers. This is not the typical CEO whitewash, or business management primer. Steve Romaine offers a view never before shared with management or stockholders as he takes a hired gun's journey beginning at the outside looking in, and ending at the pinnacle of a corporation's power.Based on his experience of working for IBM, his later role as a self-employed consultant, and finally his responsibilities as senior vice president for NationsBank, Romaine makes it clear that the issues leading to the collapse of Enron were not isolated events. Soldier of Fortune 500 explores corporate cronyism between executives and their consultants, and builds a convincing case of how, without the proper safeguards, such cozy relationships can lead to pervasive problems, placing stockholders, employees, and the future viability of the American corporation at risk.This book is a must read for corporate managers, employees, and anyone involved with the consulting business.Steve Romaine (Fairfield, CT), now an independent consultant, has held high-level consulting and managerial positions with KPMG Consulting, The Monitor Company, NationsBank, Informed Technology Decisions, and IBM. Social Media for Project Managers goes beyond Facebook, Twitter and LinkedIn to explore a whole range of collaboration tools available online like wikis, microblogs and document management tools. The poor health of today's roads--a subject close to the hearts of motorists, taxpayers, and government treasurers around the world--has resulted from faulty incentives that misdirect government decision-makers, according to the contributors to Street Smart. During the 1990s, the U.S. Interstate Highway System growing by only one seventh the rate of traffic growth. The poor maintenance of existing roads is another concern. In cities around the world, highly political and wasteful government decision-making has led to excessive traffic congestion that is a safety, and caused loss of leisure time. Street Smart examines the privatization of roads in theory and in practice. The authors see at least four possible roles for private companies, beyond the well-known one of working under contract to design, build, or maintain governmental infrastructure: licensing vehicles and drivers; management of government-owned facilities; franchising; and outright private ownership. Two chapters describe the history of private roads in the United Kingdom and the United States. Contemporary examples are provided of road pricing, privatization, and toll roads in environs as diverse as Singapore, Southern California, and Scandinavia, and cities as different as Bergen, Norway, and London, England. Finally, several chapters examine strategies for implementing privatization. The principles governing providing scarce resources in free societies are explored, such as necessities as energy, food, and water so why not to "road space"? The main obstacle to private, or semi-private, ownership of roads is likely to remain the reluctance of the political class to give up a lucrative source of power and influence. Those who want decisions about roads to be made in the interplay of consumers and suppliers in free markets, rat
