

Psychology Ap Edition

In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology’s rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution—and the authors’ excitement about it. This unique book closes the gap between psychology books and the research that made them possible. Its journey through the “headline history” of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider’s look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior.

For individuals with an interest in an introduction to psychology.

Through close collaboration, these authors produce a unified voice that will teach, illuminate, and inspire your AP® students.

For courses in Introductory Psychology The most learner-centered and assessment-driven brief text available Throughout Psychology: An Exploration , 4th Edition, Sandra Ciccarelli and J. Noland White employ a learner-centered, assessment-driven approach that maximizes student engagement, and helps educators keep students on track. In this brief text, the authors draw students into the discipline by showing how psychology relates to their own lives. Clear learning objectives, based on the recommended APA undergraduate learning outcomes, guide students through the material. And assessment tied to these learning objectives lets students check their understanding, while allowing instructors to monitor class progress and intervene when necessary to bolster student performance. Available to package with Psychology: An Exploration, 4th Edition, MyLab(TM) Psychology is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Myers is best known for his top-selling college psychology texts, used successfully across North America in thousands of AP® courses. As effective as Myers’ college texts have been for the AP® course, we believe his new text will be even better, because Myers’ Psychology for AP® has been written especially for the AP® course!

5-Steps, Barron’s and the other review books are great resources for the end of the year, but the Tamm’s Textbook Tools line accompanies kids all year long. They are filled with assignments that follow the regular text as the appendix of Ciccarelli & White’s 4th AP edition of Psychology*, published by Pearson. Teachers can copy vocab and chapter activities at will, and they are perfect if there is a substitute. When publishers started putting the majority of their content online, it opened a niche for traditional paper assignments, which this workbook fills. It doesn’t matter whether the textbook is written in ink or electrons, students still need to physically write and keep a notebook for themselves. Portfolios still matter. This independently made series challenges students to define the concepts, apply them, and give examples. Easily collectible, this item may also be used as a student consumable. Find TTT on FB.
