"Born in the cauldron of personal experience of suffering and healing and honed through years of professional experience, this book will help anyone understand the attractors of love and consequent suffering. I recommend it to couples who are mystified by the depth and repetition of their pain and joy and to therapists whose destiny is to help them." ~ Harville Hendrix, Ph.D., co-author with Helen LaKelly Hunt of Making Marriage Simple: Transform the Relationship you Have Into the Relationship you Want Since the dawn of civilization, men and women have been magnetically and irresistibly drawn together into romantic relationships, not so much by what they see, feel and think, but more by invisible forces. When individuals with healthy emotional backgrounds meet, the irresistible "love force" creates a sustainable, reciprocal and stable relationship. Codependents and emotional manipulators are similarly enveloped in a seductive dreamlike state; however, it will later unfold into a painful "seesaw" of love, pain, hope and disappointment. The soul mate of the codependent's dreams will become the emotional manipulator of their nightmares. Readers of the Human Magnet Syndrome will better understand why they, despite their dreams for true love, find themselves hopelessly and painfully in love with partners who hurt them. This book will guide and inspire both the layman and the professional. En gennemgang af kontroversielle og vigtige forhold i f.m. klargøring og gennemførelse af flyvningen i moderne luftfartøjer, herunder samarbejdet i cockpit ved godt airmanship og korrekt udnyttelse af hjælpemidler til rådighed.

James Joyces roman Portræt af kunstneren som ung mand (1916) udkom første gang på dansk i 1941. Denne udgave er en oversættelse fra 2009 ved en af landets dygtigste oversættere, Anne Marie Bjerg. Joyces klassiker er delvis selvbiografisk og en kraftfuld såvel som følsom skildring af en katolsk barndom i Irland. Beretningen om den unge Stephen Dedalus' genvordigheder på en jesuitisk kostskole og om hans intellektuelle og følelsesmæssige udvikling er fortællingen om en kunstners kamp for at finde sit eget udtryk. En kamp med synd, renhed og fromhed og et opgør med skole, fædreland og kirke. Bogen skildrer hovedpersonen Stephen Dedalus' opvækst i det katolske Dublin, hans opgør med den jesuitiske opdragelses undertrykkende bånd, hans flugt, hans brud med familie og fædreland og hans kamp for at blive et frit og selvstændigt menneske. Via Joyces bevidsthedsstrøm opløser handlingen sig i en række erindringsbilleder, der samler sig i et af forrige århundredes mest særprægede og suggestive kunstværker.

Du tycker att allt är dåligt men det kommer att bli sämre. Du tror att du är intelligent men det är du inte. Du tror att du är intressant men du är tråkig. Du tror att du är snygg men du är ful. Du tror att du är snäll men du är elak. Du tror att du kan prata franska men det kan du inte. Du säger att du är kär men du verkar inte kär. The Psychology of Money

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Techniques That Actually Work. Key strategies to help you work smarter, not harder Psychology-based study tips to give you an extra edge *Everything You Need to Know to Help Achieve a High Score*. Thorough coverage of all GRE Psychology topics, including sensation and perception, physiological and behavioral neuroscience, psychological disorders, measurement and methodology, and much more Thematic organization to help you better absorb the information you need to know

The author demonstrates that there exist many human intelligences, common to all cultures - each with its own pattern of development and brain activity, and each different in kind from the others. These potentials include linguistic, musical and logical/mathematical capacities, as well as spatial and bodily intelligences, and the ability to arrive at an emotional and mental sense of self and other people. Rather than reducing an individual's potential to a single score on an IQ test, it is the fostering and education of all these intelligences that should be our concern.

On Law and Justice by Alf Ross (1899-1979) is a classic work of twentieth-century legal philosophy. The first translation into English was notably poor and abridged, and it misrepresented Ross's views. Translated from scratch and in full length from the original Danish, this new critical edition casts light on Ross's work and resituates it firmly in the context of current debates in the field. Ross was, in H.L.A. Hart's words, 'the most acute and best-equipped philosopher' of Scandinavian legal realism. On Law and Justice provides a comprehensive outline of his legal realist position, offering a consistently empirical research programme that simultaneously recognizes the distinctly normative character of law. Ross's legal realism avoids the standard critiques against behaviourist reductionism while still remaining categorically distinct from legal positivism and natural law.

Hvordan laver man et filmmanuskript? Det findes der ikke nogen enkelt opskrift på, men derfor har filmen alligevel visse elementer, som man må tage højde for i arbejdet med manuskriptet. I denne bog, der udkom første gang i 1940, gennemgår den danske manuskriptforfatter og instruktør Karl Roos blandt andet filmens sprog og fortælleteknik samt en del af de tekniske detaljer, man må have med i overvejelserne, når man laver film. Karl Roos (1914-1951) var en dansk manuskriptforfatter, kortfilminstruktør og filmskribent. Han var forfatter og medforfatter til flere bøger om film og filmteori og var op gennem 1940'erne desuden speaker på både danske og udenlandske dokumentarfilm.

Deep down, most people think that happiness comes from having or doing something. Here, in Alan Watts's groundbreaking second book (originally published in 1940), he offers a more challenging thesis: authentic happiness comes from embracing life as a whole in all its contradictions and paradoxes, an attitude that Watts calls the "way of acceptance." Drawing on Eastern philosophy, Western mysticism, and analytic psychology, Watts demonstrates that happiness comes from accepting both the outer world around us and the inner world inside us — the unconscious mind, with its irrational desires, lurking beyond the awareness of the ego. Although written early in his career, The Meaning of Happiness displays the hallmarks of his mature style: the crystal-clear writing, the homespun analogies, the dry wit, and the breadth of knowledge that made Alan Watts one of the most influential philosophers of his generation.
