After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

Praise for the Fifth Edition of The Responsible Administrator "Cooper's fifth edition is the definitive text for students and practitioners who want to have a successful administrative career. Moral reasoning, as Cooper so adeptly points out, is essential in today's rapidly changing and complex global environment."—Donald C. Menzel, president, American Society for Public Administration, and professor emeritus, public administration, Northern Illinois University "The Responsible Administrator is at once the most sophisticated and the most practical book available on public sector ethics. It is conceptually clear and jargon-free, which is extraordinary among books on administrative ethics."—H. George Frederickson, Stone Distinguished Professor of Public Administration, University of Kansas "Remarkably effective in linking the science of what should be done with a prescriptive for how to actually do it, the fifth edition of Cooper's book keeps pace with the dynamic changes in the field, both for those who study it and those who practice it. The information presented in these pages can be found nowhere else, and it is information we cannot ethically afford to ignore."—Carole L. Jurkiewicz, John W. Dupuy Endowed Professor, and Woman's Hospital Distinguished Professor of Healthcare Management, Louisiana State University, E. J. Research on the work-integrated learning of student teachers

Corporate Citizenship

**This book presents an international perspective on environmental educational and specifically the influence that context has on this aspect of curriculum. The focus is on environmental education both formal and non formal and the factors that impact upon its effectiveness, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc. ).**

**This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.**

**Now in its sixth edition, JAVASCRIPT guides beginning programmers through web application development using the JavaScript programming language. As with previous editions of the book, the authors introduce key web authoring techniques with a strong focus on industry application. New coverage includes developing for touchscreen and mobile devices, and using the jQuery library. A real-world project, similar to what students would encounter in a professional setting, is developed chapter by chapter. Because professional web development jobs often require programmers to add features to existing sites, each chapter project uses a professionally designed web site. After completing a course using this textbook, students will be able to use JavaScript to build professional quality, dynamic web sites. "Scientific studies of art and archaeology are a necessary complement to cultural heritage conservation, preservation and investigation. Nuclear techniques, such as neutron activation analysis, X ray fluorescence analysis and ion beam analysis, have a potential for non-destructive and reliable investigation of precious artefacts and materials, such as ceramics, stone, metal, and pigments from paintings. Such information can be helpful in repair of damaged objects, in identification of fraudulent artefacts and in the appropriate categorization of historic artefacts."--Page 4 of cover.

Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.

This fully updated second edition of Teaching English, Language and Literacy is an essential introduction for anyone learning to teach English at primary school level. Designed for students on initial teacher training courses, but also of great use to those teachers wanting to keep pace with the latest developments in their specialist subject. The book covers the theory and practice of teaching English, language and literacy and includes comprehensive analysis of the Primary National Strategy (PNS) Literacy Framework. Each chapter has a specific glossary to explain terms and gives suggestions for further reading. This second edition covers key areas that students, teachers and English co-ordinators have to manage, and includes advice on: developing reading, including advice on choosing texts, and the role of phonics improving writing skills, including advice on grammar and punctuation planning and assessing speaking and listening lessons working effectively with pupils who are multilingual understanding historical developments in the subject the latest thinking in educational policy and practice, the use of multimedia maintaining good home-school links. gender and the teaching of English language and literacy All these chapters include clear examples of practice, coverage of key issues, analysis of research, and reflections on national policy to encourage the best possible response to the demands of the National Curriculum.

"Given the common acknowledgement that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage of managing strategic risk."--Publisher's description.

*Originally published in The Hafner Library of Classics in 1953, The Political Ideas of St. Thomas Aquinas provides important insights into the human side of one of the most influential medieval philosophers. St. Thomas Aquinas (c. 1226–1274) is recognized for having synthesized Christian theology with Aristotelian metaphysics, and for his spirited philosophical defense of Christianity that was addressed to the non-Christian reader. In this collection, editor Dino Bigongiari has selected Aquinas's key writings on politics, justice, social problems, and forms of government, including the philosopher's main works: Regimine Principis (On Kinship) and The Summa Theologica. In an authoritative discussion of the historical background and evolution of St. Thomas Aquinas's political ideas, Dr. Bigongiari's commentary explains this philosopher's enduring influence and legacy. Accompanying explanatory notes and a helpful glossary of unusual terms and familiar words help to make this practical volume an ideal text for students and general readers alike.*

*Written with undergraduate and postgraduate students in mind, this second edition provides new perspectives on the meaning of marketing. Delineating the basic principles of Relationship Marketing (RM) and Customer Relationship Management (CRM), this reference offers guidelines for planning and implementing CRM strategy. It argues that companies should move away from marketing to anonymous masses and toward developing and managing relationships with identifiable customers and stakeholders.*

*Now you can offer your students a structured, applied approach to behavioral finance with the first academic text of its kind- Ackert/Deaves' BEHAVIORAL FINANCE: PSYCHOLOGY, DECISION MAKING, AND MARKETS. This comprehensive text--ideal for your behavioral finance elective-- links finance theory and practice to human behavior. The book begins by building upon the established, conventional principles of finance that students have already learned in their principles course. The authors then move into psychological principles of behavioral finance, including heuristics and biases, overconfidence, emotion and social forces. Students learn how human behavior influences the decisions of individual investors and professional finance practitioners, managers, and markets. Your students gain a strong understanding of how social forces impact people's choices. The book clearly explains what behavioral finance indicates about observed market outcomes as well as how psychological biases potentially impact the behavior of managers. Students learn the implications of behavioral finance on retirement, pensions, education, debiasing, and client management. This book is unique as it spends a significant amount of time examining how behavioral finance can be used effectively by practitioners today. The book's solid academic approach provides opportunities for students to utilize theory and complete applications in every chapter. A wide variety of end-of-chapter exercises, discussion questions, simulations and experiments reinforce the book's applied approach, while useful instructor supplements ensure you have the resources to clearly present theories of behavioral finance and their applications. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.*

*This book has been written to explain some of the fundamental issues of public administration to a wide audience. The author, Emeritus Professor and former head of the Department of Political Science at The University of Hong Kong, has had many years experience in the study and teaching of public administration in both European and African states (in the 50s and 60s) and Asia (in the 70s and 80s).*

"A rare blend of a well-organized, comprehensive guide to portfolio management and a deep, cutting-edge treatment of the key topics by distinguished authors who have all practiced what they preach. The subtitle, A Dynamic Process, points to the fresh, modern ideas that sparkle throughout this new edition. Just reading Peter Bernstein's thoughtful Foreword can move you forward in your thinking about this critical subject." —Martin L. Leibowitz, Morgan Stanley "Managing Investment Portfolios remains the definitive volume in explaining investment management as a process, providing organization and structure to a complex, multipart set of concepts and procedures. Anyone involved in the management of portfolios will benefit from a careful reading of this new edition." —Charles P. Jones, CFA, Edwin Gill Professor of Finance, College of Management, North Carolina State University

Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and call-outs to related Internet sites

This fully revised third edition brings a fresh approach to the fundamentals of mass media and communication law in a presentation that undergraduate students find engaging and accessible. Designed for students of communication that are new to law, this volume presents key principles and emphasizes the impact of timely, landmark cases on today ' s media world, providing an applied learning experience. This new edition offers expanded coverage of digital media law and social media, a wealth of new case studies, expanded discussions of current political, social, and cultural issues, and new features focused on ethical considerations and on international comparative law. Communication Law serves as a core textbook for undergraduate courses in communication and mass media law. Online resources for instructors, including an Instructor ' s Manual, Test Bank, and PowerPoint slides, are available at: www.routledge.com/9780367546694

This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.

*“Creativity and innovation are to events, what the heart and soul are to the living.” The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation.*

*Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.*
