The topics are related to financial markets, financial institutions and financial instruments. Examples are presented so that the students and anyone interested in learning about financial markets can easily understand the concepts. The main objective of this book is to enable key concepts and issues that underlie financial markets to be accessible to all. Each chapter comes with review questions to assist students and readers in checking their understanding of the subject matter.

Cybercrimes are easier than ever to pull off. No global police force exists to go after these criminals, so cybercrimes are increasing exponentially year after year. The FBI estimates that over twelve million cybercrimes and scams occurred in the United States in 2013 alone. Scammers are sophisticated, professional, and intelligent. They target potential victims carefully and these victims include homemakers, celebrities, professional athletes...anyone with assets! In this book, Debra Danielsen describes how she was conned out of \$250,000 by a man she met on Match.com. Vapor includes industry expert recommendations for both individuals and businesses on how to protect your assets from cyber scammers. The lessons in Vapor will teach you how to keep your own assets from being vaporized.

This book by a leading expert considers the growth of an inefficient superlayer in Southeast Asian economies and assesses the problems that this poses for future economic development. Yoshihara argues that as technological backwardness, the low quality of government intervention, and discrimination against those of Chinese descent have prevented capitalism from stimulating development, there has emerged a brand of ersatz capitalism very different from the capitalism in Japan and the West. He goes on to offer recommendations for creating a dynamic capitalism while acknowledging that obstacles to their implementation exist in current Southeast Asian social and political systems.
