Since the financial crisis of 2007/2008, a renewed discussion on the ethics and finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

*With this pioneering project, Margrit Pernau brings the 'history of emotions' approach to South Asian studies. A theoretically sophisticated and erudite investigation, Emotions and Modernity in Colonial India maps the history of emotions in India between the uprising of 1857 and World War I. Situating the prevalent experiences, interpretations, and practices of emotions of the time within the context of the major political events of colonial India, Pernau goes beyond the dominant narrative of colonial modernity and its fixation with discipline and restraint, and traces the contemporary transformation from a balance in emotions to the resurgence of fervor. The current volume is based on a large archive of sources in Urdu, many being explored for the first time. Pernau grounds her work on such diverse sources as philosophical and theological treatises on questions of morality, advice literature, journals and newspapers, nostalgic descriptions of courtly culture, and even children's literature. This close look into individual experiences, practices, and interpretations reveals the myriad emotions of the day, and the importance of these micro-histories in presenting an alternative account of colonial India.*
