**The obituary page of The New York Times is a celebration of extraordinary lives. This groundbreaking book includes 300 of the most important and fascinating obituaries the Times has ever published. The obituary page is the section many readers first turn to not only see who died, but to read some of the most inspiring, insightful, often funny, and elegantly written stories celebrating the lives of the men and women who have influenced on our world. William McDonald, The Times' obituary editor who was recently featured in the award-winning documentary Obit, selected 320 of the most important and influential obits**

McDonald's restaurants are found in over 100 countries, serving tens of millions of people each day. What are the cultural implications of this phenomenal success? The widely read—and widely acclaimed—Golden Arches East argues that McDonald's has largely become divorced from its American roots and become a "local" institution for an entire generation of affluent consumers in Hong Kong, Beijing, Taipei, Seoul,

and Tokyo. In the second edition, James L. Watson also covers recent attacks on the fast-food chain as a symbol of American imperialism, and the company's role in the obesity controversy currently raging in the U.S. food industry, bringing the story of East Asian franchises into the twenty-first century. Praise for the First Edition: "Golden Arches East is a fascinating study that explores issues of globalization by focusing on the role of McDonald's in five Asian economies and [concludes] that in many countries McDonald's has been absorbed by local communities and become assimilated, so that it is no longer thought of as a foreign restaurant and in some ways no longer functions as one." —Nicholas Kristof, New York Times Book Review "This is an important book because it shows accurately and with subtlety how

transnational culture emerges. It must be read by anyone interested in globalization. It is concise enough to be used for courses in anthropology and Asian studies." —Joseph Bosco, China Journal "The strength of this book is that the contributors contextualize not just the food side of McDonald's, but the social and cultural activity on which this culture is embedded. These are culturally rich stories from the anthropology of everyday life." —Paul Noguchi, Journal of Asian Studies "Here is the rare academic study that belongs in every library."—Library Journal

Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is

coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit

maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

one's life to the government of biblical principles: faith, love, obedience to God's Word, and intimacy with God. At eighteen years old, Dencle's journey takes a sudden, dramatic turn, and what began as a normal summer day in tropical Jamaica, a few miles away from the world-famous Negril beach, ends with radical changes in the values and pursuits of this teenager. One question led to another, and before he could fully appreciate what was happening, Dencle walked past his friends, all the way to the front of the church, knelt down

Meinel and Marjorie P. Meinel stood at the confluence of several overarching technological developments during their lifetimes, including postwar aerial surveillance by spy planes and satellites, solar energy, the evolution of telescope design, interdisciplinary optics, and photonics. Yet, their incredible stories and their long list of scientific contributions have never been adequately recognized in one place. In this book, James Breckinridge and Alec M. Pridgeon correct this oversight by sharing the story of this powerful duo. The book follows their lives and covers large scientific developments between World War II to the

Cold War. James B. Breckinridge, a previous advisee and later colleague to the Meinels, and historian and scientist Alec M. Pridgeon collected more than 200 hours of oral interviews with those who worked closely with the Meinels and some who built their careers around the findings made possible by their work. The book shares and analyzes the work done by the Meinels, and it also includes incredible insights from an unpublished Meinel autobiography.
