Now available together as a set for a discounted price: Writing A Successful Research Paper: A Simple Approach, by Stanley Chodorow, with, Writing with Sources, (Second Edition): A Guide for Students, by Gordon Harvey.

Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

Ten Steps to the Perfect Research Paper

A young Russian woman comes into her own in the midst of revolution and civil war in this "brilliant" novel set in "a world of furious beauty" (Los Angeles Review of Books). After the loves and betrayals of The Revolution of Marina M., young poet Marina Makarova finds herself alone amid the devastation of the Russian Civil War -- pregnant and adrift, forced to rely on her own resourcefulness to find a place to wait out the birth of her child and eventually make her way back to her native city, Petrograd. After two years of revolution, the city that was once St. Petersburg is almost unrecognizable, the haunted, half-emptied, starving Capital of Once Had Been, its streets teeming with homeless children. Moved by their plight, though hardly better off herself, she takes on the challenge of caring for these orphans, until they become the tool of tragedy from an unexpected direction. Shaped by her country's ordeals and her own trials -- betrayal and privation and inconceivable loss -- Marina evolves as a poet and a woman of sensibility and substance hardly imaginable at the beginning of her transformative odyssey. Chimes of a Lost Cathedral is the culmination of one woman's s journey through some of the most dramatic events of the last century -- the epic story of an artist who discovers her full power, passion, and creativity just as her revolution reveals its true direction for the future.

Covering both theoretical and practical approaches, Writing the Research Paper guides students studying in English as a second or additional language through the skills necessary for success in university-level writing and research. The book begins with theoretical considerations, such as research, argumentation and critical thinking. It then offers a broad range of practical assistance covering all aspects of the writing process, including topic selection, argument, counter-argument, paragraph structure and cohesion. The book is accompanied by a companion website, writingtheresearchpaper.com. The website hosts many features, including chapter summaries, exercises, quizzes, PowerPoints, additional learning material, and technology assistance. The website also hosts numerous authentic examples of student papers at each of the critical stages of the writing process.

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of Writing a Research Paper (by Lionel Menasche, 1998) and partly a companion to The ESL Writer's Handbook. Like WRP, teachers can move through the writing process in stages to end up with a thorough and coherent research paper. Like a handbook, the text is less dense, with explanations provided in sections for easy comprehension and practice exercises included.

The Basics of Public Budgeting and Financial Management brings budgetary theory and practice together, filling the void between the two that has existed in the field of budgeting and public finance. This book bridges the gap by providing students with applications and exercises that

reinforce budgetary theory. These exercises are the key to ensuring that students leave the classroom with knowledge and marketable skills. Specifically, students will be exposed to basic budget and finance concepts, but more importantly they will complete assignments where they apply the information in various settings. For example: creating tax structures, conducting a financial management plan, risk assessments, cost benefit analysis, and so on. This handbook also shows students how to best utilize tools that allow them to visually display budgets and other budgetary data. Students will gain the solid foundation needed to begin work in a budget office. While the original purpose of the book is the same, the third edition of the book provides a few new thematic sections as well as homework questions and classroom assignments that reinforce the topical areas. The ancillary materials make the process very easy for an instructor to organize their lectures around thematic areas. The book is a must read for instructor[s] who are considering a course that introduces students to budgeting and finance and those who want student[s] to learn the basic components of budgeting and financial management.

You have found the book to help you survive your whole high school and college years! Have you ever had a essay paper due and just had nothing...no ideas, nowhere to begin, nowhere to start...just staring at a blank screen or piece of paper? This book is here to help you find a topic to write on and even before that, show you the steps you need to take so you don't waste your time before you even begin starting your research and writing your paper. You will find the following categories with tons of topics in each: -Animal, Energy, and Environment -Business -Crime and Law -Drug and Drug Abuse -Education -Family and Children Issues -Government and Political Issues -Health -Media and Communications -Psychology -Religion -Science and Technology -Social Issues -Terrorism -Women and Gender -World Issues Don't worry if you don't see your specific category, because it could be a topic. Even if it isn't, these topics are great starting points to add another topic to one you currently have and/or are maybe struggling with. It could also give you ideas on where to take a topic if you already have one chosen. Usually combining two topics can lead to a more in-depth and focused research paper, but it really depends on what your assignment asks for. In addition there are over 30 questions to help focus your research, find your supporting points, and help to begin your paper and write your thesis. No topic and no supporting points equal no thesis, no research paper and the clock is tick tick ticking. There are also quick links within the e-book to help you navigate and jump around within the categories with ease and convenience, if you decide you want to change topics. This book will be a great addition to help any student who needs help finding a research topic and starting their paper!

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

All of us in biomedicine understand the urgency of getting experimental results into print as quickly as possible. Yet this critical step in the cascade from research conception to publication receives almost no attention in our formal training. It is as if we have been put to sea without a compass. Our collective failure to achieve widespread literacy in our own language - Biomedical Language - seriously impedes the important process of d- seminating new biomedical knowledge and thereby improving the human condition. It is also a significant personal concern for researchers and clinicians in the highly competitive, publish-or-perish environment of c- temporary academia. Of course, if we are clever or lucky enough to come up with that Nobel Prize-winning discovery, great science will carry the day and we are likely to get published even if our writing is fairly horrid. But most of us who publish are "bread-and-butter" scientists. We compete for space in journals which may only accept 10% or 20% of the submissions that they receive each year. For us, convincing, engaging writing will make the difference between being published or rejected, or at least it will make the

difference between being published on first submission or having to go through a number of revisions (or journals). None of this is to propose that good writing can make a silk purse out of a sow's ear. Scientific content is the sine qua non of biomedical writing.
