"Glad you like her, fellows," replied Dick Hamilton, to the remarks of his chums, Paul Drew and Innis Beeby, as he turned the wheel of a new motor-boat and sent the craft about in a graceful sweep toward a small dock which connected with a little excursion resort on the Kentfield river. "Like her! Who could help it?" asked Paul, looking about admiringly at the fittings of the craft. "Why, you could go on a regular cruise in her!"

Robert Peurifoy was a giant in the field of construction engineering and authored several books during his lifetime. This book last published in 1989 and will capitalize on the well-known name of the author. In this edition, computer

calculations of costs and of modeling have been added as well as updated statistics, computer related examples and new problems. Civil, Environmental, and Construction Management Engineering Majors and Professionals will benefit from having this title on their shelf. This edition retains the conceptual strengths of the Peurifoy approach and organization from the previous edition but the new problems and computer-based examples and new up-to-date construction data make it the only choice in academia or industry.

Pride and Prejudice goes Hollywood in this winning romantic comedy inspired by Jane Austen's classic. In her teen fiction debut, the author of Knitting Under the Influence goes back to high school for a tale of sisters, misinformation, and star-crossed love. Will Elise's love life be an epic win or an epic fail? At Coral Tree Prep in Los Angeles, who your parents are can make or break you. Case in point: As the son of Hollywood royalty, Derek Edwards is pretty much prince of the school—not that he deigns to acknowledge many of his loyal subjects. As the daughter of the new principal, Elise Benton isn't exactly on everyone's must-sit-next-to-at-lunch list. When Elise's beautiful sister catches the eye of the prince's best friend, Elise gets to spend a lot of time with Derek, making her the envy of every girl on campus. Except she refuses to fall for any of his rare smiles and instead warms up to his enemy, the surprisingly charming social outcast Webster Grant. But in this hilarious tale of fitting in and flirting, not all snubs are undeserved, not all celebrity brats are bratty, and pride and prejudice can get in the way of true love for only so long.

This edited book provides a contemporary, critical and thought-provoking analysis of the internal and external threats to Western multilateral development finance in the twenty-first

century. It draws on the expertise of scholars with a range of backgrounds providing a critical exploration of the neoliberal multilateral development aid. The contributions focus on how Western institutions have historically dominated development aid, and juxtapose this hegemony with the recent challenges from right-wing populist and the Beijing Consensus ideologies and practices. This book argues that the rise of right-wing populism has brought internal challenges to traditional powers within the multilateral development system. External challenges arise from the influence of China and regional development banks by providing alternatives to established Western dominated aid sources and architecture. From this vantagepoint, Rethinking Multilateralism in Foreign Aid puts forward new ideas for addressing the current global social, political and economic challenges concerning multilateral development aid. This book will be of interest to researchers, academics and students in the field of International Development and Global Governance, decision-makers at government level as well as to those working in international aid institutions, regional and bilateral aid agencies, and non-governmental organisations.

It's Little Red Riding Hood as you've never seen her before in this funny, feminist spin on the fairy tale, from award-winning author Ursula Vernon. Most monsters know better than to mess with Princess Harriet Hamsterbone. She's a fearsome warrior, an accomplished jousting, and is so convincing that she once converted a beastly Ogrescat to vegetarianism. So why would a pack of weasel-wolf monsters come to her for help? Well, there's something downright spooky going on in the forest where they live, and it all centers around a mysterious girl in a red cape. No one knows better than Harriet that little girls aren't always sweet. Luckily there's no problem too big or bad for this princess to solve. In this sixth installment of her whip-smart Hamster Princess series, Ursula Vernon once again upends fairy tale tropes and subverts gender stereotypes to brilliant effect. This is a "Once Upon a Time" like you've never seen before.

The importance of small fishing craft to the world catch of fish cannot be underestimated but little attention has in the past been given to their design. The primary purpose of this book is to disseminate the specialized knowledge needed for designing improved small fishing vessels. It has been structured to cover every item which needs to be taken into account, working in easy stages from background material to the specification for a finished design. The logical and well-balanced format takes the reader through general principles to factors specific to fishing vessels and the content is so comprehensive that much will be of equal value to users and designers of larger vessels. It is an invaluable volume enhanced by detailed drawings of exceptional standard.

The revision of this best-selling text for a junior/senior course in Foundation Analysis and Design now includes an IBM computer disk containing 16 compiled programs together with the data sets used to produce the output sheets, as well as new material on sloping ground, pile and pile group analysis, and procedures for an improved analysis of lateral piles. Bearing capacity analysis has been substantially revised for footings with horizontal as well as vertical loads. Footing design for overturning now incorporates the use of the same uniform linear pressure concept used in ascertaining the bearing capacity. Increased emphasis is placed on geotextiles for retaining walls and soil nailing.
