**NATIONAL BESTSELLER** • The Dexter series continues with a deadly duel with a

copycat. • **The Killer Character That Inspired the Hit Showtime Series Dexter** Dexter is displeased. Like any self-respecting, totally decent, soundly homicidal guy, Dexter Morgan takes great pride in his work and is careful to remain anonymous. So he is, naturally, upset to discover that someone has identified him and—worst of all—is now turning his own methods against him. The situation soon becomes more complicated when a brutal cop-killer begins targeting Miami's police detectives—leaving behind bodies that are battered beyond recognition—and stoking the department's worst fears. As his colleagues grow more paranoid of the psychotic killer in their midst, Dexter's position is increasingly perilous. He is running out of time to track down this copycat and deliver his usual special justice, before his dark hobby is revealed to the world.

**Contemporary Mathematics for Business and Consumers** is an adventure into today's business world of the new millennium and its associated mathematical procedures. The book is designed to provide solid mathematical preparation and foundation for students going on to courses and careers in accounting, marketing, retailing, banking, office administration, finance, insurance, real estate, and business administration. In addition, it is ideal for use in small businesses or for personal consumer needs. This is not just a textbook, but a "reference manual" for consumers and business persons alike.

This cynical and immensely entertaining book describes the scanner world, the people in it, the equipment they use, and how they acquire and tune in to the "secret" frequencies.

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis.

Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. How to find the soft innovation that will make your product, service, school, church, or career worth talking about. We live in an era of too much noise, too much clutter, too many choices, and too much spam. And as Seth Godin's 200,000-copy bestseller *Purple Cow* taught the business world, the old ways of marketing simply don't work anymore. The best way to sell anything these days is through word of mouth and the only real way to get

word of mouth is to create something remarkable. Free Prize Inside, the sequel to Purple Cow, explains how to do just that. It's jammed with practical ideas you can use right now to make your product or service remarkable, so that it will virtually sell itself. Remember when cereal came with a free prize inside? Even if you already liked the cereal, it was the little plastic toy that made it irresistible. Godin explains how you can think of a bonus that will make your customers feel just as excited, no matter what business you're in. Consider these free prizes: □ The Tupperware party, which turned buying plastic bowls into a social event □ Flintstones vitamins, which turned a serious product into something fun □ The free change-counting machine at every Commerce Bank branch □ The little blue box from Tiffany, which makes people happy before they even open it This book offers a way to create free prizes quickly, cheaply, and reliably and persuade others in your organization to help you bring them to life.

Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

Lead Generation for the Complex Sale arms you with a sophisticated multimodal

approach to generating highly profitable leads. Brian Carroll, CEO of InTouch Incorporated and expert in lead generation solutions, reveals key strategies that you can implement immediately to win new customers, accelerate growth, and improve your sales performance. You'll start by defining your ideal leads and targeting your ideal customer. Then, you'll construct your lead generation plan, a crucial step to staying ahead of your competition long-term. To help you put your plan into action, Carroll guides you step by step to:

- Align sales and marketing efforts to optimize the number of leads
- Use multiple lead generation vehicles, including e-mail, referrals, public relations, speaking events, webinars, and more
- Create value for the prospective customer throughout the buying process
- Manage a large group of leads without feeling overwhelmed
- Identify and prioritize your best prospects
- Increase the percentage of leads who become profitable customers
- Avoid lulls in the sales cycle

With *Lead Generation for the Complex Sale* you'll learn how to target prospects early in the buying process and make the most efficient use of sales productivity and marketing resources. "This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future." —Ralph Nader, *Consumer Advocate* This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book

summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

Human Resources used to be about recruiting good people, preparing them for assignments, motivating them to perform, and retaining them. Do these things well and your well-oiled machine will operate as planned. But in today's turbulent and increasingly broadening economy, HR must go beyond its traditional focus if a company is to also expand and become as far-reaching as the times are trying to take it. While the core plan of recruit, prepare, motivate, and retain is still essential, High-Impact Human Capital Strategy examines 12 critical forces that must also be evaluated and maximized if a company is to continue its success, including: globalization, changes in workforce demographics, skill shortages and mismatches in labor markets, environmental matters, and more. Readers will learn how to design human capital programs that:

- Incorporate each of the 12 critical forces into an effective overall plan
- Connect with business measures
- Achieve positive ROI
- Ensure critical talent is in place
- Boost engagement
- Address work/life balance and other social issues
- Reduce the need to

This highly anticipated print collection gathers articles published in the much-

loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master

AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to

build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

- Build an intelligent machine translation system using seq-2-seq neural translation machines
- Create AI applications using GAN and deploy smart mobile apps using TensorFlow
- Translate videos into text using CNN and RNN
- Implement smart AI Chatbots, and integrate and extend them in several domains
- Create smart reinforcement, learning-based applications using Q-Learning
- Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

When customers are truly thrilled about their experience with a product or service, they have the potential to become one of its influential evangelists. Savvy marketing professionals know that this group of true believers can be leveraged as a potent force to build word of mouth that leads to new customers. Creating Customer Evangelists explains how to develop marketing and sales

strategies that create communities of passionate customers. By cultivating a dialogue and then creating emotion-driven relationships with customers, companies can inspire grassroots support. Creating Customer Evangelists shows how to convert good customers into exceptional ones who willingly spread the word. "Lessons of customer evangelism related through real life company stories make this book an absorbing read." -- Harvard Business School "I'll admit it: at first, I was a skeptic. But halfway through this savvy and compelling book, I became a convert. And by the time I'd turned the last page, I'd become an evangelist. Say it with me, brothers and sisters: customer evangelism is the future!" -- Dan Pink, author of Drive and A Whole New Mind "An inspiring and thorough book packed with real life examples, action items and insight." -- Emanuel Rosen, author of The Anatomy of Buzz Jackie Huba and Ben McConnell, authors of Citizen Marketers, popularized the term "customer evangelism." The Seth Godin-edited New York Times bestseller The Big Moo featured them among 33 of "the world's smartest business thinkers."
