Building Surveys

the Roof Construction Manual is a comprehensive reference work on the construction of pitched roofs, containing over 1800 plans and 220 photographs. Thirteen fundamental roof types and the relevant materials including thatch, wood, slate, tile, concrete, fibrous cement, bitumen, glass, metal, membranes, and synthetic materials are documented in detail. Essential topics such as ventilation, vapour and wind seals, insulation and drainage, renovation and energy conservation are examined. As with all the Construction Manuals, some 38 built examples illustrate the theoretical details, paying particular attention to important features such as the ridge, hip, eaves, roof valley, verge, and penetration. A compact presentation of the load-bearing physics and structures as well as current norms and standards make this volume an indispensable standard work for all architects and engineers.

Traditional Domestic Architecture of the Arab Region

Since the first edition was published in 1983, Building Surveys has been the core text in its field for students and professionals alike.

Covering everything needed for initial inspections such as equipment, know-how and procedures to writing an accurate report, this book is a proven indispensable guide. It considers all the structural elements required when surveying a property for example, foundations, walls and roofs as well as what to look out for and how to deal with it. Legal

considerations and recent cases are used to illustrate good working practice making this a comprehensive text to this important subject. * Based on real-life experience of professional surveyors * Covers knowledge, techniques and equipment needed to inspect and report on a range of properties * Legal and regulatory requirements fully updated and explained including the changed circumstances in relation to the governments Home Information Packs and in particular the relegation of the Home Condition Report to the status of optional, rather than obligatory, part of the pack. * Claims against surveyors has resulted in the much greater use of action paragraphs in surveyors reports and new to this edition the specimen report in the book has been re-written to reflect this * Additional colour photographs have been added which improve the readability and look of the book and enhance the text.
