Sick of working your dumb job? Why not learn to make the big bucks and start programming for a living? This book aims to give you everything you need to get started in the high profit world of software development. You don't have to be a math genius either.

Lauren Richmond isn't a fan of Christmas. Which is why she rarely makes the trip home to the Midwest for the holidays. After all, she has plenty to keep her busy--namely, her duties as a set decorator on a TV sitcom. But this December, Lauren's brother and his wife are expecting a baby, so her brother arranges a ride home for her with his good friend, Will. Unfortunately for Lauren, she's been trying to forget college baseball coach and childhood crush Will Sinclair for more than ten years. Now, thanks to her fear of flying, she's stuck in a car with him from California to Illinois. She's circumspect and organized. He's flirty and spontaneous. She's convinced that people don't change. He's trying to prove to her (and himself) that he has. On this cross-country road trip, they'll both discover that history doesn't exactly repeat itself. . . but like any good Christmas carol, it does have a second verse.

Classical physics states that physical reality is local--a point in space cannot influence another point beyond a relatively short distance. However, In 1997, experiments were conducted in which light particles (photons) originated under certain conditions and traveled in opposite directions to detectors located about seven miles apart. The amazing results indicated that the photons "interacted" or "communicated" with one another instantly or "in no time." Since a distance of seven miles is quite vast in quantum physics, this led physicists to an extraordinary conclusion--even if experiments could somehow be conducted in which the distance between the detectors was half-way across the known universe, the results would indicate that interaction or communication between the photons would be instantaneous. What was revealed in these little-known experiments in 1997 is that physical reality is non-local--a discovery that Robert Nadeau and Menas Kafatos view as "the most momentous in the history of science." In The Non-Local Universe, Nadeau and Kafatos offer a revolutionary look at the breathtaking implications of non-locality. They argue that since every particle in the universe has been "entangled" with other particles like the two photons in the 1997 experiments, physical reality on the most basic level is an undivided wholeness. In addition to demonstrating that physical processes are vastly interdependent and interactive, they also show that more complex systems in both physics and biology display emergent properties and/or behaviors that cannot be explained in the terms of the sum of parts. One of the most startling implications of non-locality in human terms, claim the authors, is that there is no longer any basis for believing in the stark division between mind and world that has preoccupied much of western thought since the seventeenth century. And they also make a convincing case that human consciousness can now be viewed as emergent from and seamlessly connected with the entire cosmos. In pursuing this groundbreaking argument, the authors not only provide a fascinating history of developments that led to the discovery of non-locality and the sometimes heated debate between the great scientists responsible for these discoveries. They also argue that advances in scientific knowledge have further eroded the boundaries between physics and biology, and that recent studies on the evolution of the human brain suggest that the logical foundations of mathematics and ordinary language are much more similar than we previously imagined. What this new knowledge reveals, the authors conclude, is that the connection between mind and nature is far more intimate than we previously dared to imagine. What they offer is a revolutionary look at the implications of non-locality, implications that reach deep into that most intimate aspect of humanity--consciousness.

'Life Can Be a Miracle' is possibly the most unexpected course in miracles (in a novel) you may encounter. The book comes from one of the enigmatic parts of the world: the Balkans, and particularly from the oldest and rather mysterious country there, Bulgaria. Like the unique asymetric rhythms of Bulgarian music that astonish Western even temperament, the approach to reality this book offers may shake up your structured, algorithmic and perhaps boring or ineffective approach to life. 'Life Can Be a Miracle' brings an unusually optimistic breath of fresh air, as warm as a Balkan summer, to our way of perceiving reality. This is the right book for readers who want a fresh take on reality, who do not take themselves too seriously and who would like to explore new and different ways to relate to themselves and to the world -- not as alien and hostile subjects, but rather as allies who share and exchange extraordinary resources in surprising ways. How can a tiny piece of blue cheese lead you to your ultimate life purpose, removing all the barriers you have built against a joyful, fulfilled, miraculous life? This and many more incredibly fun and easy-to-apply techniques can be found in this fascinating, original and inspiring novel.

A Financial Times Book of the Month pick for April! Is it worth swimming in shark-infested waters to surf a 50-foot, career-record wave? Is it riskier to make an action movie or a horror movie? Should sex workers forfeit 50 percent of their income for added security or take a chance and keep the extra money? Most people wouldn't expect an economist to have an answer to these questions--or to other questions of daily life, such as who to date or how early to leave for the airport. But those people haven't met Allison Schragger, an economist and award-winning journalist who has spent her career examining how people manage risk in their lives and careers. Whether we realize it or not, we all take risks large and small every day. Even the most cautious among us cannot opt out--the question is always which risks to take, not whether to take them at all. What most of us don't know is how to measure those risks and maximize the chances of getting what we want out of life. In An Economist Walks into a Brothel, Schragger equips readers with five principles for dealing with risk, principles used by some of the world's most interesting risk takers. For instance, she interviews a professional poker player about how to stay rational when the stakes are high, a paparazzo in Manhattan about how to spot different kinds of risk, horse breeders in Kentucky about how to diversify risk and minimize losses, and a war general who led troops in Iraq about how to prepare for what we don't see coming. When you start to look at risky decisions through Schragger's new framework, you can increase the upside to any situation and better mitigate the downside.

Watch a Video Watch a video Download the cheat sheet for Roger Lowenstein's The End of Wall Street » The roots of the mortgage bubble and the story of the Wall Street collapse--and the government's unprecedented response--from our most trusted business journalist. The End of Wall Street is a blow-by-blow account of America's biggest financial collapse since the Great Depression. Drawing on 180 interviews, including sit-downs with top government officials and Wall Street CEOs, Lowenstein tells, with grace, wit, and razor-sharp understanding, the full story of the end of Wall Street as we knew it. Displaying the qualities that made When Genius Failed a timeless classic of Wall Street--his sixth sense for narrative drama and his unmatched ability to tell complicated financial stories in ways that resonate with the ordinary reader--Roger Lowenstein weaves a financial, economic, and sociological thriller that indicts America for succumbing to the siren song of easy debt and speculative mortgages. The End of Wall Street is rife with historical lessons and bursting with fast-paced action. Lowenstein introduces his story with precisely etched, laserlike profiles of Angelo Mozilo, the Johnny Appleseed of subprime mortgages who spreads toxic loans across the landscape like wild crabapples, and moves to a damning explication of how rating agencies helped gift wrap faulty loans in the guise of triple-A paper and a takedown of the academic formulas that--once again--proved the ruin of investors and banks. Lowenstein excels with a series of searing profiles of banking CEOs, such as the ferretlike Dick Fuld of Lehman and the bloodless Jamie Dimon of JP Morgan, and of government officials from the restless, deal-obsessed Hank Paulson and the overmatched Tim Geithner to the cerebral academic Ben Bernanke, who sought to avoid a repeat of the one crisis he spent a lifetime trying to understand--the Great Depression. Finally, we come to understand the majesty of Lowenstein's theme of liquidity and capital, which explains the origins of the crisis and that positions the collapse of 2008 as the greatest ever of Wall Street's unlearned lessons. The End of Wall Street will be essential reading as we work to identify the lessons of the market failure and start to reb...

This book has completely changed thousands of lives all around the world and it's going to make yours better too. Several times a day, people go out of their way to contact me and tell me that this book, Declare War on Yourself, is "like drinking out of a fire hydrant", "the bible of becoming better", "better than every single book I've ever read on self-improvement", and "the only book they've ever kept on the nightstand to read daily." They tell me they NEVER reach out to authors but this book "compelled" them to do so because it has made such a huge impact on their life. A week ago, a skeptical investigative journalist reached out to me for a phone call. When I spoke to him, he said the book was so good and eye-opening that he had to speak to me himself and see if I was "the real deal or full of shit and stealing other people's content and ideas". 5 minutes into the conversation, he told me he's listened to the book 4 times and each time, he has to get a notebook, write down several pages of notes, highlight them, and then underline them. That after 35 years of reading books from every self-help author he can think of, he's never seen so much powerful information jam-packed into one single book and he doesn't understand why this isn't on every bookshelf in the world. Declare War on Yourself is straightforward, honest, and blunt. I tell you the truth even if it hurts your feelings. While most authors are busy trying to turn you into a fan and get you to like them, follow them on social media, and think they're a great person, I'm busy trying to teach you every single thing I know on how to make your life better. That's all I care about. I cut straight to the heart of what's causing your problems in your life, why those problems aren't going away, and EXACTLY what you need to do to get it all under control. I teach you how having the wrong mindset is negatively impacting your life, relationships, and results and which changes will improve your thinking, behavior, and habits so things are more likely to just fall into place for you. If you can handle some tough love with a little stank on it and be open-minded enough to toss around some new ideas for your life, then this book will help you. Even if it's not one constant massive eye-opening moment after another like a lot of readers claim to experience from this book, I guarantee you will take something from it that you'll use for the rest of your life. That in and of itself is worth the small price of this book. Here's what you're going to learn in this one-of-a-kind book: - What it actually means to have your act together - Why only 3% of us actually have our life together - Why society's definition of "having your act together" is wrong - Real reasons we're lazy, we don't push ourselves, and we keep giving up - Which people and situations keeping you from getting your act together - How what you're programming your mind with is helping you or hurting you and why there is no in between. - How much time you're actually wasting on useless thoughts, people, and activities - Which things are realistically stopping you from moving in the right direction - Which thoughts, emotions, feelings, people, places, and things getting in your way - Which emotions are sabotaging you,

holding you back, and pushing you backwards - How to eliminate “chaos” from your mind, daily routine, and life and why it's important - How to eliminate the distractions keeping you from focusing - How to replace the trash habits that are causing your problems - What you need to accept about yourself and your life in order to do better - EXACTLY which things are making you unhappy, unproductive, and unsuccessful - How to reach goals faster and easier and make it a permanent habit - Which “failure” mindsets to eliminate - The powerful mindsets of the world’s most elite people and how it multiplies their success - Mental toughness – how to develop it and why you need it - How to make self-control and self-discipline easier so it's not as painful - How controlling emotions plays a big part in bad situations - What to do when everything is spinning out-of-control and you feel like giving up on yourself and life - How to talk to yourself and treat yourself during difficult times and situations - How to make big challenges small enough to handle easily - A cheap, effective, and easy-to-get tool that helps you clear your mind - How “micro-emotions” are effecting you every minute of every day and holding you back - How to “zero out” and relax when emotions are getting too extreme - How often you should share your emotions with others and what it makes them think of you - How the world’s most effective and elite people handle their emotions to get their “edge” - How the state of your home relates to directly to how much you have your act together - The first thing you should do when you wake up and why it's important - Which parts of your home to keep clean and organized and why it's important - The best time of day to do your home cleaning so it’s the faster and easier - The proper relationship with your superiors and co-workers - Besides making money, what you should and should not be at work for - What to before you start your work day so it goes smoothly - Tools to make your job easier and help you power through boring tasks and projects - How to improve focus, get things done, and become more productive - How to manage your time and evaluate progress - How getting your social act together makes you more likable and trustworthy - How to set social boundaries with yourself and others and why it's important - Social formalities that get you more respect - Powerful social techniques to get the attention of the right people - Habits, behaviors, and thoughts you don’t need in your social life - Having a proper relationship with your money so you can make more and keep what you have - The one position that makes you financially happier - Money’s real purpose and what it doesn't do for you - The real differences between broke people and rich people - When and how you should use credit and debt - Why you should save money and how much you should be saving to for when shit hits the fan - How important your time should be to you and how to spend it wisely - Plans, processes, and procedures that help you reach your goals faster - How to become extremely specific about your goals - What setbacks in all areas of your life mean and how to handle them - The most important things to do before you get your day started - How to get your mind on the right track so you’re thinking the right thoughts, having the right feelings, and doing the right things - How to hit your targets, avoid distractions, and make your day easier - Which counter-productive activities are important to avoid - The most important things to do before you go to bed

Artificial intelligence and machine learning are replacing human work, even in marketing, just as has happened in the past in other manufacturing sectors. Experts haven’t yet understood what is happening, and they continue to recommend the strategic marketing model. If marketing was an exact science then it may be reduced, with the scientific method, systemically and severely to observable and repeatable events which have precise and recognizable causes. So from these events could be developed one or more algorithm, on the basis of which it would be possible to create an automatic software able to handle scientifically each marketing campaign. Soon humans, advisers, which work strategically and scientifically would be replaced by machines. Thanks to the web’s giants today everyone can have access to the most advanced marketing technologies easily and at low prices. This is no longer sufficient, and makes no difference anymore. What makes the difference today are: feelings, stories, experiences, meditation, emotions, irrationality, creativity, intuition... in one word the Magic! Spiritual Marketing is a system that wants go beyond the limits of traditional and strategic marketing choosing ideas and concepts of spiritual origin instead of the strict and at this point ineffective present paradigm. The author analyzes how some states of the soul with spiritual nature can lift up consultation and marketing strategy at an higher level, also because of techniques that derive from coaching and neuro-linguistic programming. He describes as an holistic approach, in concrete situations, can direct to an unpredictable and extraordinary solutions and intuitions.

Not to invalidate your beliefs and the societal structure you comfortably reside in, but to support your return to the radical self-responsibility and vast open mindedness of a spiritually mature being. With all the presuppositions, “knowledge” gathered about life, you will hardly be able to dive into the unknown and learn something new or experience the vivid freshness of Infinity. As is typical for the human condition, some of your ways of seeing things have become stale, to say the least. Convictions and conclusions were useful at one time, doesn't it get incredibly dull to think the same things over and over and over, and to perceive things from the same vantage point again and again and again? But as nothing can be added to Infinity, the belief- systems we “shatter” will not be lost. You can pick them up and reassemble them later if you need some concepts to hold on to or if you get scared of the joyous enormity of it all. Nobody is forcing you to have too much. The original sense means: Seeing, Feeling, Perceiving, Noticing, Experiencing, Doing something you have not seen, felt, perceived, noticed, experienced, done before. It's as simple as that. Transurfing is simple, yet powerful Reality Management Technique, developed by the Russian quantum physics researcher Vadim Zeland. Zeland's main goal is to present a set of techniques (which he calls Transurfing of Realities) for the attainment of practical goals. These techniques are of mental and metaphysical nature. Zeeland supports these techniques by presenting a model of the universe that combines the elements of quantum physics with the idea of parallel worlds. As Zeland states, the use of the techniques is not dependant on the acceptance of his theoretical model. Some Transurfing techniques are very simple and practical. Zeland says: " You can not hide from the inevitable reality. Your life is determined by circumstances and your place in society. Reality develops for the most part regardless of your own will. For every "I want" there is its own "You can't." In response to "Give it to me" you hear "You can't get it." There is little you can do in such circumstances.... As a rule, human beings behave unambiguously. In their attempts to get what they want, they try to influence this world straight on, by the principle "Give it back to me." Direct impact, based on direct contact, is one of the ways of controlling something, but it is certainly not the most effective method of controlling reality. Transurfing is ..."

Superconductivity covers the nature of the phenomenon of superconductivity. The book discusses the fundamental principles of superconductivity; the essential features of the superconducting state—the phenomena of zero resistance and perfect diamagnetism; and the properties of the various classes of superconductors, including the organics, the buckminsterfullerenes, and the precursors to the cuprates. The text also describes superconductivity from the viewpoint of thermodynamics and provides expressions for the free energy; the Ginzburg-Landau and BCS theories; and the structures of the high temperature superconductors. The band theory; type II superconductivity and magnetic properties; and the intermediate and mixed states are also considered. The book further tackles critical state models; various types of tunneling and the Josephson effect; and other transport properties. The text concludes by looking into spectroscopic properties. Physicists and astronomers will find the book invaluable.

" Your mind is the greatest soap-opera scriptwriter in history. It makes up incredible stories, usually based in dramas and disasters, of things that never happened and probably never will. Mark Twain said it best: "I've had thousands of problems in my life, most of which never actually happened." One of the most important things you can ever understand is that you are not your mind. You are much bigger and greater than your mind alone. Your mind is a part of you just as your hand is a part of you ..." - Excerpt from "Financial Transurfing"

Meet the new world sensation. It's Tufti.Why is it that nothing seems to work out the way you want it to, despite the fact that you act according to your own free will? You might think that the reason why nothing is working out the way you want, is because that's just how life is. But the real reason things don't work out the way you want them to, is because you aren't acting according to your own free will - you are being directed by a script. Another reason things don't work out the way people want them to, is because they don't know how to take the right action to shape events the way they want. Rather than composing the reality of the upcoming film roll, they tend to battle with the reality they face in the current frame. Reality exists only in the here and now, and what is real is real only to the extent that it has taken place in the material world. You cannot change what has already happened. Yet when you fight with your current reality, that is exactly what you are doing, because everything that surrounds you consists of something that has already happened. If you want to change the script, you have to wake up and come alive inside the movie. Translation from the Russian language by Joanna Dobson

You'll learn how to surf through parallel realities and unlock the power of your mind through a mix of researched and science-backed techniques like qi gong, meditation, quantum jumping, energy work, and reality transurfing. If you're ready to create an incredible reality for yourself, this book shows you the way.

Transurfing is a powerful tool for managing reality. Apply it and life will begin to change according to YOUR order. When you use Transurfing goals are not reached, so much as realised for the most part of themselves. It seems impossible to believe but only at first. The ideas presented in the book have already received practical confirmation. Those who have tried Transurfing, experience surprise bordering on delight as the world of the Transurfer inexplicably changes before their very eyes. What is the book about? Transurfing is the art of controlling reality using our freedom of choice. The world always reflects our perception of it. People can choose any variant of the development of current reality and thereby find themselves in circumstances they find desirable . To learn how to do this, you have to learn how to establish mutual understanding between the soul and mind, formulate intention and avoid the influence of destructive pendulums. Why should you read this book? Most people who have read "Transurfing," note that from the very first pages, the book completely reverses their view of the world and the role of the individual in their own life. A fresh look at reality encourages the reader to consciously relate to the choices they make in any moment, and this really changes their life in the direction they would like. "It works!" is the phrase found in almost all reviews of Vadim Zeland's book. Who is this book for? The book has aroused great interest among the young and middle-aged, those who are interested equally in philosophy, psychology and physics and the mysteries of human consciousness. Why we decided to publish it The idea of " Transurfing Reality" quickly gained popularity when the author posted the text on the Internet. Numerous readers' reviews, saying that it really works, and the author's original take on the structure of reality prompted the publishers decide to publish Vadim Zeland's manuscript. We had no doubt that "Transurfing" would be popular among a huge audience About the author Vadim Zeland: "I'm over forty. Before the collapse of the Soviet Union I was engaged in research in the field of quantum physics, then computer technology, and now books. I live in Russia. My nationality is Russian, or more precisely, a quarter Estonian. The rest is irrelevant, as is all the above. Regarding my own success, all I can say is that Transurfing works perfectly. I don't however want to advertise my personal life, as then it would cease to be personal. Fame turns against you, if you give in to temptation and climb up on a pedestal for all to see. Among some people, the American Indians, for example, there is a belief that if someone copies your portrait (photographs you), they steal part of your soul. Of course, this is just superstition, but there is no smoke without fire. You can distribute a product of personal creativity; but release your personality for mass circulation - never. To the question of intrigued readers: "Who are you, Vadim Zeland?," I usually just say: "Nobody." My biography can not and should not be a matter of interest, since I am not the creator of Transurfing, only a "retranslator." It is essential that we be nothing - an empty vessel, so that we do not impose our personal distortions onto this ancient Knowledge, that opens the door to a world, where the impossible becomes possible. Reality ceases to exist as something external and independent. and becomes manageable if you follow certain rules. The secret itself that is hidden only in as much as it lies on the surface, is so great that the personality of its bearer ceases to be relevant. Perhaps the guardians who passed on this knowledge to me are of genuine interest but they too prefer to remain in the wings."

Named a Top Five Book of 2011 by Physics Today, USA. The BCS theory of superconductivity developed in 1957 by Bardeen, Cooper and Schrieffer has been remarkably successful in explaining the properties of superconductors. In addition, concepts from BCS have been incorporated into diverse fields of physics, from nuclear physics and dense quark matter to the current standard model. Practical applications include SQUIDS, magnetic resonance imaging, superconducting electronics and the transmission of electricity. This invaluable book is a compilation of both a historical account and a discussion of the current state of theory and experiment. With contributions from many prominent scientists, it aims to introduce students and researchers to the origins, the impact and the current state of the BCS theory.

Speech in this book will be about Transurfing - it is a powerful technique that gives the power to create impossible, from an ordinary point of view, things, namely, to control fate at your discretion. Despite the fact that much of what you learn will seem quite unusual to you, remember: there is no fiction here - everything is real
Describes a fresh way of looking at reality, indeed of creating it. This volume explains why desires aren't always fulfilled, and why dreams don't come true. It describes how you can do this.
