

Recognition List City Guilds City Guilds

This book offers a rich and exciting new way of thinking about the Italian Renaissance as both a historical period and a historical movement. Guido Ruggiero's work is based on archival research and new insights of social and cultural history and literary criticism, with a special emphasis on everyday culture, gender, violence, and sexuality. The book offers a vibrant and relevant critical study of a period too long burdened by anachronistic and outdated ways of thinking about the past. Familiar, yet alien; pre-modern, but suggestively post-modern; attractive and troubling, this book returns the Italian Renaissance to center stage in our past and in our historical analysis.

This book explores the role of native place associations in the development of modern Chinese urban society and the role of native-place identity in the development of urban nationalism. From the late nineteenth to the early twentieth century, sojourners from other provinces dominated the population of Shanghai and other expanding commercial Chinese cities. These immigrants formed native place associations beginning in the imperial period and persisting into the mid-twentieth century. Goodman examines the modernization of these associations and argues that under weak urban government, native place sentiment and organization flourished and had a profound effect on city life, social order and urban and national identity.

Award-winning lecturer Kenneth R. Bartlett applies his decades of experience teaching the Italian Renaissance to this beautifully illustrated overview. In his introductory Note to the Reader, Bartlett first explains why he chose Jacob Burckhardt's classic narrative to guide students through the complex history of the Renaissance and then provides his own contemporary interpretation of that narrative. Over seventy color illustrations, genealogies of important Renaissance families, eight maps, a list of popes, a timeline of events, a bibliography, and an index are included.

EBOOK: Teaching in Post-14 Education & Training

Teaching in Post-14 Education & Training provides a skilfully balanced mix of essential theory and practical guidance to support you if you are studying an 'education and training' qualification. It covers fundamental background information such as key philosophies and concepts, current policy and practice, key thinkers and ideas, and includes a useful chronology. More importantly it also provides the tools to help you approach the classroom with confidence, covering fundamental issues such as teaching and learning, assessment, resources, and course design. Through its pedagogical features the book also offers you opportunities to pause and reflect, as well as practical exercises, templates and examples of student work. Key features of this new edition include: • Links to the latest Professional Standards for Teachers and Trainers • Updating of the legislative and policy context • Supporting learning with technology • Planning for equality and diversity • Embedding language and literacy This is the definitive textbook on teaching, learning and assessment for those training to work in the post-14 sector.

Examines the social and political history of the Jews of Miskolc-the third largest Jewish community in Hungary-and presents the wider transformation of Jewish identity during the eighteenth and nineteenth centuries. It explores the emergence of a moderate, accommodating form of traditional Judaism that combined elements of tradition and innovation, thereby creating an alternative to Orthodox and Neolog Judaism. This form of traditional Judaism reconciled the demands of religious tradition with the expectations of Magyarization and citizenship, thus allowing traditional Jews to be patriotic Magyars. By focusing on Hungary, this book seeks to correct a trend in modern Jewish historiography that views Habsburg Jewish History as an extension of German Jewish History, most notably with regard to emancipation and enlightenment. Rather than trying to fit Hungarian Jewry into a conventional Germano-centric taxonomy, this work places Hungarian Jews in the distinct contexts of the Habsburg Monarchy and the Danube Basin, positing a more seamless nexus between the eighteenth and nineteenth century. This nexus was rooted in a series of political experiments by Habsburg sovereigns and Hungarian noblemen that culminated in civic equality, and in the gradual expansion of traditional Judaism to meet the challenges of the age.

The documents in this fascinating volume focus on the "contagion of rebellion" that followed the Black Death, which ravaged Europe in the years between 1355 and 1382. They comprise a diversity of sources and cover a variety of forms of popular protest in different social, political and economic settings. Their authors include revolutionaries, the artistocracy, merchants and representatives from the church. Of more than 200 documents presented here, most have been translated into English for the first time, providing students and scholars with a new opportunity to compare social movements across Europe over two centuries.

Middle-Class Writing in Late Medieval London

Wage Labor and Guilds in Medieval Europe

British Qualifications

Milan under Galleazzo Maria Sforza

A pioneering text which covers the urban society of early modern Europe as a whole. Challenges the usual emphasis on regional diversity by stressing the extent to which cities across Europe shared a common urban civilization whose major features remained remarkably constant throughout the period. After outlining the physical, political, religious, economic and demographic parameters of urban life, the author vividly depicts the everyday routines of city life and shows how pitifully vulnerable city-dwellers were to disasters, epidemics, warfare and internal strife.

Universities have a crucial role in the modern world. In England entrance to universities is by nation-wide competition which means English universities have an exceptional influence on schools - a striking theme of the book. This important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In *A University Education*, David Willetts presents a compelling case for the ongoing importance of the university, both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries, especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful

account of the value of higher education and the case for more expansion. He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of £9,000 fees. The final section addresses some of the big questions for the future, such as the the relationship between universities and business, especially in promoting innovation.. He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly. This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework.

Ambitious, extravagant, progressive, and sexually notorious, Galeazzo Maria Sforza inherited the ducal throne of Milan in 1466, at the age of twenty-two. Although his reign ended tragically only ten years later, the young prince's court was a dynamic community where arts, policy making, and the panoply of state were integrated with the rhythms and preoccupations of daily life. Gregory Lubkin explores this vital but overlooked center of power, allowing the members of the Milanese court to speak for themselves and showing how dramatically Milan and its ruler exemplified the political, cultural, religious, and economic aspirations of Renaissance Italy.

The Electrician Electrical Trades Directory and Handbook

Richardson explores how a powerful culture of writing was created in late medieval London, even though initially few inhabitants could actually write themselves. Whilst previous studies have tended to focus on middle-class literary reading patterns, this study examines writing skills separately both from reading skills and from literature.

A visual resource for students providing training in construction crafts. It covers the Craft Certificate requirements, giving information that students need to pass their exam, with exam style multiple-choice assessment questions, which provide extra support for revision and exam preparation.

Written in a down-to-earth, easy-to-understand manner, Electrical Power Distribution and Transmission is a state-of-the-art book that offers readers a practical orientation and introduction to electrical power distribution and transmission. Outstanding features, which have been widely applauded, include real-world aspects of the field (readers are exposed to theory and practice they will use in their careers); organized into three easy to understand sections, including History, Electrical Power Distribution, and Electrical Power Transmission; thorough coverage of subject concepts; and offers up-to-date material with historical perspective. This comprehensive book is appropriate for courses in electrical power distribution and/or transmission. Readers will find previous courses in dc/ac circuits, algebra, and trigonometry to be a plus.

The Ancient Halls of the City Guilds

The Electrician

The first part of David Nicholas's massive two-volume study of the medieval city, this book is a major achievement in its own right. (It is also fully self-sufficient, though many readers will want to use it with its equally impressive sequel which is being published simultaneously.) In it, Professor Nicholas traces the slow regeneration of urban life in the early medieval period, showing where and how an urban tradition had survived from late antiquity, and when and why new urban communities began to form where there was no such continuity. He charts the different types and functions of the medieval city, its interdependence with the surrounding countryside, and its often fraught relations with secular authority. The book ends with the critical changes of the late thirteenth century that established an urban network that was strong enough to survive the plagues, famines and wars of the fourteenth and fifteenth centuries.

A comprehensive analysis of European craft guilds through eight centuries of economic history Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution, and have always attracted debate and controversy. They were sometimes viewed as efficient institutions that guaranteed quality and skills. But they also excluded competitors, manipulated markets, and blocked innovations. Did the advantages of guilds outweigh their costs? Analyzing thousands of guilds from 1000 to 1880, *The European Guilds* answers that question with vivid examples and clear economic reasoning. Sheilagh Ogilvie features the voices of honourable guild masters, underpaid journeymen, exploited apprentices, shady officials, and outraged customers, and follows the stories of the “vile encroachers”—women, migrants, Jews, gypsies, bastards, and others—desperate to work but hunted down by the guilds as illicit competitors. *The European Guilds* analyzes the toxic complicity between guild members and political elites, and shows how privileged institutions and exclusive networks prey on prosperity and stifle growth.

Epstein takes a fresh look at the organization of labor in medieval towns and emphasizes the predominance of a wage system within them. He offers illuminating comment on a wide range of subjects on guilds and guild organization, on women and Jews in the work force, on the value given labor, and on the sources of disaffection. His book presents a feast of themes in medieval social history. David Herlihy, Brown University

A Companion to Medieval and Renaissance Bologna

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

A survey of urbanization and the making of modern Europe from the mid-eighteenth century to the First World War.

A Companion to Medieval and Renaissance Bologna offers a broad panorama of essays that illuminate the distinctive features of the city and its transition from independent medieval commune to second largest city of the Renaissance Papal State.--

Popular Protest in Late-Medieval Europe

Italy, France and Flanders

The Chamber of Commerce Journal

In this stimulating study, Juan R. I. Cole challenges traditional elite-centered conceptions of the conflict that led to the British occupation of Egypt in 1882. For a year before the British intervened, Egypt's government and the country's influential European community had been locked in a struggle with the nationalist supporters of General Ahmad 'Urabi. Although most Western observers still see the 'Urabi movement as a 'revolt' of junior military officers with only limited support among the Egyptian people, Cole maintains that it was a full-scale revolution with a broad social base. While arguing this fresh point of view, he also proposes a theory of revolution against informal or neocolonial empires, drawing parallels between Egypt in 1882, the early twentieth-century Boxer Rebellion in China, and the Islamic Revolution in modern Iran. In a thorough examination of the changing Egyptian political culture from 1858 through the 'Urabi episode, Cole shows how various social strata--urban guilds, the intelligentsia, and village notables--became 'revolutionary.' Addressing issues raised by such scholars as Barrington Moore and Theda Skocpol, his book combines four complementary approaches: social structure and its socioeconomic context, organization, ideology, and the ways in which unexpected conjunctures of events help drive a revolution. "The resulting account of the origins of the 1881-82 revolution is original and persuasive. The book will make a significant contribution to the comparative study of social revolution, in particular by explaining how neocolonial revolutions differ from the kinds of revolution previous theorists have studied." --Timothy P. Mitchell, New York University

Restaging the Past is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the

1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.
