

Reduce Reuse Recycle College Of Architecture

This book is about the 5R's (Reduce, Reuse, Recycle, Refuse, Rethink).It is a very informative book and explains the children the importance of mindfully managing the waste which is the need of the hour.It talks about reducing the use of plastic, reusing things made of plastic, glass and metal. It also talks how waste is separated and sent to recycling centres. The book encourages young learners to rethink their actions and refuse the usage of hazardous materials. Explains how reducing, reusing, and recycling can help decrease pollution, and provides examples of how to do these things, including finding new uses for hand-me-downs and placing bottles in collection areas instead of trash cans.

Oscar the Grouch knows a lot about trash, including how to reuse it! Read along as Oscar and friends show young readers that reducing, reusing, and recycling lessens their impact on the planet. Learn how to turn trash into treasure, like making old bottle caps into artwork. We can help Earth! Interior paper made with 30 percent recycled post-consumer waste fibers. It's Anjali's birthday party and the children have had a great time. But looking around the room at the end, they see mountains of rubbish, from food waste to wrapping paper, burst balloons and small plastic toys. What will happen to all of this waste? The children find out what happens at a recycling centre and about the huge amount of objects that can be recycled or reused. They learn how to take action outside by helping nature, reducing waste at school dinners, and saving energy and water at home. Through chatting to teachers and local people, the children learn all about green topics such as landfills, litter, plastic mountains in oceans and global warming. But it's not all doom and gloom. They discover that there are ways that they can take action to help save their environment and the planet. By walking to school or switching off lights when they don't need them, this book is full of ideas for reducing and reusing. At the end they hold a fun Eco Festival to raise awareness of how easy it is to 'go green!' 'Stop and Think' panels encourage readers to think about the problem in their local area and 'Take Action' panels give advice for how readers can get involved. Look out for the other titles in this series: Wild Weather!, Save Our Seas! and Nature Needs You!

Part inspirational story of how the author transformed her family's life for the better by reducing their waste to an astonishing 1 liter per year; part practical guide that gives readers tools & tips to diminish their footprint & simplify their lives. Original.

Presents an integrated social studies curriculum for six and seven year-olds on the topic of garbage and recycling. The main purpose of this thesis however, is to show how a topic can be developed into a curriculum, and co-developed by students and teacher. This curriculum offers suggestions on how to adapt lessons and activities for special needs children through Universal Design.

The Ultimate Guide to Simplifying Your Life by Reducing Your Waste

7 & I Believe In Zero Waste

Inspired by internationally acclaimed environmental activist, humanitarian, and adventurer Rob Greenfield, Zero Waste Kids teaches through illustrated projects and activities how to reduce, reuse, and recycle at home, at school, and in your community. While most kids probably aren't going to grow all their own food for a year like Rob has, Zero Waste Kids features fun and practical projects for growing some of your own food, with advice and encouragement for why doing so is important. And, instead of wearing all their trash for a week like Rob did, with Zero Waste Kids, they'll learn how to audit their trash, to really understand how much waste they're personally contributing to the earth's landfills. Zero Waste Kids helps children to understand the world they live in and inspire them to start living in a more sustainable way. Of all the environmental problems we face, "trash" is one that is easiest to understand because it is very visual, whereas many other problems are more abstract. Zero-waste isn't the solution to the world's problems, but a very good place to start. Zero-Waste projects include: Conduct a household trash audit to discover who throws away what and why. Swap disposable shopping bags and lunch boxes for reusable, zero-waste options. Compost your food scraps and grow your own food. Make natural-dye playdough, leaf prints, and more. Leading by example, Rob is donating all of his proceeds from the book to environmental nonprofit organizations. Zero Waste Kids is every kid's go-to guide for making a difference. Activities contributed by April Hepokoski, Zion Lights, Heidi Rose, Alyssa Binns Gunderson, and Michelle Cassar.

People are proud to recycle, but in recent years many have become suspicious the process isn't operating as seamlessly as we'd like to think. Reduce, Reuse, Reimagine makes sense of the complex system for any reader who wants to learn how it works, what the problems are, and what they can do to help recycling thrive
