The book covers techniques used in modern gunfighting and a history of the author's 30 years on the LAPD and the SWAT team.

Whether sculpture, painting, or multimedia installation, Edouard Duval-Carri é ?s work navigates the historically rich and culturally complex traditions that comprise a uniquely Caribbean perspective. Duval-Carri é ?s recent works attend to the themes of water, travel, and Francophone culture. For this artist, for example, water becomes both a symbolic passage and a barrier--the means by which enslaved Africans were brought to the Caribbean and modern-day Haitians migrate to the United States. Both circumstances have been driven by the force of capitalism that occupies the artist?s work materially and iconographically. This exhibition of Duval-Carri é ?s art engages themes associated with the history of North Florida and the southeastern United States, including plantation agriculture, race, slavery, historical events such as Florida statehood, and such contentious historical figures as Andrew Jackson. Edouard?s exhibited works will be accompanied by displays of plantation artifacts loaned from State of Florida collections, including a portion of a nineteenth-century sugar mill and iron crosses made for cemeteries of enslaved workers.00Exhibition: Florida State Museum of Fine Arts,

Be wary of the people no one wants on their team, the ones who are too small, too slow and not very capable.

The unwanted have a built-in motivation to do whatever it takes to succeed that those who were picked first do not have. This is the story of such a person and what he did to find his place at the top of the world in his sport.

Do you know what "quatrefoil" and "impolitic" mean? What about "halcyon" or "narcolepsy"? This book is a handy, easy-to-read reference guide to the proper parlance for any situation. In this book you will find:

Words You Absolutely Should Know (covert, exonerate, perimeter); Words You Should Know But Probably Don't (dour, incendiary, scintilla); Words Most People Don't Know (schlimazel, thaumaturgy, epergne); Words You Should Know to Sound Overeducated (ad infinitum, nugatory, garrulity); Words You Probably Shouldn't Know (priapic, damnatory, labia majora); and more.

Whether writing an essay, studying for a test, or trying to impress friends, family, and fellow cocktail party guests with their prolixity, you will achieve magniloquence, ebullience, and flights of rhetorical brilliance.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies

not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

scientific issues by placing the treatise in a diachronic frame comprising Aristotle's predecessors and in a synchronic frame comprising his other physical works. It argues that Aristotle thought of meteorological phenomena as intermediary or 'dualizing' between the cosmos as a whole and the manifold world of terrestrial animals. Engaging with the best current literature on Aristotle's theories of science and metaphysics, Wilson focuses on issues of aetiology, teleology and the structure and unity of science. The second half of the book illustrates Aristotle's principal concerns in a section-by-section treatment of the meteorological phenomena and provides solutions to many of the problems that have been raised since the time of the ancient commentators.

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs—nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. approach a serious, irreversible decline. In this exhaustively researched book, veteran oil industry analyst Matthew Simmons draws on his three-plus decades of insider experience and more than 200 independently produced reports about Saudi petroleum resources and production operations. He uncovers a story about Saudi Arabia's troubled oil industry, not to mention its political and societal instability, which differs sharply from the globally accepted Saudi version. It's a story that is provocative and disturbing, based on undeniable facts, but until now never told in its entirety. *Twilight in the Desert* answers all readers' questions about Saudi oil and production industries with keen examination instead of unsubstantiated posturing, and takes its place as one of the most important books of this still-young century.

astounding new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

In this sweeping, enthralling biography, acclaimed Pulitzer Prize-winner David Hackett Fischer magnificently brings to life the visionary adventurer who has straddled our history for 400 years. Champlain's Dream reveals, with rare immediacy and drama, the story of a remarkable man: a leader who dreamed of humanity and peace in a world riven by violence; a man of his own time who nevertheless strove to build a settlement in Canada that would be founded on harmony and respect. With consummate narrative skill and comprehensive scholarship, Fischer unfolds a life shrouded in mystery, a complex, elusive man among many colorful characters. Born on France's Atlantic coast, Samuel de Champlain grew up in a country bitterly divided by religious wars. But, like Henry IV, one of France's greatest

kings whose illegitimate son he may have been and who supported his travels from the Spanish Empire in Mexico to the St. Lawrence and the unknown territories, Champlain was religiously tolerant in an age of murderous sectarianism. Soldier, spy, master mariner, explorer, cartographer, and artist, he maneuvered his way through court intrigues in Paris, supported by Henri IV and, later, Louis XIII, though bitterly opposed by the Queen Regent Marie de Medici and the wily Cardinal Richelieu. But his astonishing dedication and stamina triumphed.... Champlain was an excellent navigator. He went to sea as a boy, acquiring the skills that allowed him to make 27 Atlantic crossings between France and Canada, enduring raging storms without losing a ship, and finally bringing with him into the wilderness his young wife, whom he had married in middle age. In the place he called Quebec, on the beautiful north shore of the St. Lawrence, he founded the first European settlement in Canada, where he dreamed that Europeans and First Nations would cooperate for mutual benefit. There he

played a role in starting the growth of three populations — Québécois, Acadian, and Métis — from which millions descend. Through three decades, on foot and by ship and canoe, Champlain traveled through what are now six Canadian provinces and five American states, negotiating with more than a dozen Indian nations, encouraging intermarriage among the French colonists and the natives, and insisting, as a Catholic, on tolerance for Protestants. A brilliant politician as well as a soldier, he tried constantly to maintain a balance of power among the Indian nations and his Indian allies, but, when he had to, he took up arms with them and against them, proving himself a formidable strategist and warrior in ferocious wars. Drawing on Champlain's own diaries and accounts, as well as his exquisite drawings and maps, Fischer shows him to have been a keen observer of a vanished world: an artist and cartographer who drew and wrote vividly, publishing four invaluable books on the life he saw around him. Not since Clifford Geertz's "Deep Play: Notes on the Balinese Cockfight" has the publication of an anthropological analysis been as eagerly awaited as this book, Terence S. Turner's *The Fire of the Jaguar*. His reanalysis of the famous myth from the Kayapo people of Brazil was anticipated as an exemplar of a new, dynamic, materialist, action-oriented structuralism, one very different from the kind made famous by Claude Lévi-Strauss. But the study never fully materialized. Now, with this volume, it has arrived, bringing with it powerful new insights that challenge the way we think about structuralism, its legacy, and the reasons we have moved away from it. In these chapters, Turner carries out one of the richest and most sustained analysis of a single myth ever conducted. Turner places the "Fire of the Jaguar" myth in the full context of Kayapo society and culture and shows how it became both an origin tale and model for the

work of socialization, which is the primary form of productive labor in Kayapo society. A posthumous tribute to Turner's theoretical erudition, ethnographic rigor, and respect for Amazonian indigenous lifeworlds, this book brings this fascinating Kayapo myth alive for new generations of anthropologists. Accompanied with some of Turner's related pieces on Kayapo cosmology, this book is at once a richly literary work and an illuminating meditation on the process of creativity itself.
