This reworked and expanded edition presents a complete inventory of all the major inter-lingual contrasts, emphasizing those contrasts that pose difficulties for teachers and students alike. The text features numerous exercises and, new with this edition, an extensive glossary of grammatical terms.  The study of oral traditions and verbal arts leads into an area of human culture to which anthropologists are increasingly turning their attention. Oral Traditions and the Verbal Arts provides up-to-date guidance on how to approach the study of oral form and their performances, treating both the practicalities of fieldwork and the methods by which oral texts and performances can be observed, collected or analysed. It also relates to those current controversies about the nature of performance and of 'text'. Designed as a practical and systematic introduction to the processes and problems of researching in this area, this is an invaluable guide for students, and lecturers of anthropology and cultural studies and also for general readers who are interested in enjoying oral literature for its own sake.

For fans of Matt de la Peña and Sandra Cisneros comes a novel about family and identity, where Violet Paz prepares for her quinceañero and learns about her Cuban heritage. Violet Paz has just turned fifteen, a pivotal birthday in the eyes of her Cuban grandmother. Fifteen is the age when a girl enters womanhood, traditionally celebrating the occasion with a quinceañero. But while Violet is half Cuban, she’s also half Polish, and more importantly, she feels 100% American. Except for her zany family’s passion for playing dominoes, smoking cigars, and dancing to Latin music, Violet knows little about Cuban culture, nada about quinces, and only tidbits about the history of Cuba. So when Violet begrudgingly accepts Abuela’s plans for a quinceañero—and as she begins to ask questions about her Cuban roots—cultures and feelings collide. The mere mention of Cuba and Fidel Castro elicits her grandparents’sadness and her father’s anger. Only Violet’s aunt Luz remains open-minded. With so many divergent views, it’s not easy to know what to believe. All Violet knows is that she’s got to form her own opinions, even if this jolts her family into unwanted confrontations. After all, a quince girl is supposed to embrace responsibility—and to Violet that includes understanding the Cuban heritage that binds her to a homeland she’s never seen. "Violet's hilarious cool first-person narrative veers between farce and tenderness, denial and truth." —Booklist, Starred Review "This funny and tender chronicle of Violet's 15th year...[has] heart and humor."-Kirkus Reviews "Cuba 15 will make readers laugh, whether or not their families are as loco as Violet's." —The Horn Book Magazine "Osa's tale about a warmhearted, fun-loving family, a teenager's typical ambivalence about different cultures, the stress of dealing with high school demands and pressures, a budding romance, and how an imaginative, high-spirited young woman handles some thorny issues and does some growing up in the process, rings true and makes for an entertaining story."-VOYA "The characters are so charming that while readers are in their company, the experience is interesting and engaging."-SLJ A Pura Belpré Honor Book An ALA Notable Book An ALA Best Book for Young Adults A Booklist Top Ten Youth First Novels

**The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about how one learns and how to teach, in some countries of the “developed world,” there is still there is a high rate of school failure. Although the term “school failure” is a very complex construct, insofar as its causes, consequences, and development, from the field of educational psychology, the construct “student engagement” has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the students’ involvement in school and describes their feelings, behaviors, and thoughts about their school experiences. So, engagement is an important component of students’ school experience, with a close relationship to achievement and school failure. Children who self-set academic goals, attend school regularly and on time, behave well in class, complete their homework, and study at home are likely to interact adequately with the school social and physical environments and perform well in school. In contrast, children who miss school are more likely to display disruptive behaviors in class, miss homework frequently, exhibit violent behaviors on the playground, fail subjects, be retained and, if the behaviors persist, quit school. Moreover, engagement should also be considered as an important school outcome, eliciting more or less supportive reactions from educators. For example, children who display school-engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true. But what makes student engage more or less? The relevant literature indicates that personal variables (e.g., sensory, motor, neurodevelopmental, cognitive, motivational, emotional, behavior problems, learning difficulties, addictions), social and/or cultural variables (e.g., negative family conditions, child abuse, cultural deprivation, ethnic conditions, immigration), or school variables (e.g., coexistence at school, bullying, cyberbullying) may concurrently hinder engagement, preventing the student from acquiring the learnings in the same conditions as the rest of the classmates.**

Since the mid-1980s, the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America, and beyond; and recent political developments are making its powerful, transformative ideas more relevant than ever before. Psychology of Liberation: Theory and Applications updates the activist frameworks developed by Ignacio Martin-Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds, as social science and psychological practice are allied with struggles for peace, justice, and equality. In these chapters, liberation is presented as both an ongoing process and a core dimension of wellbeing, entailing the reconstruction of social identity and the transformation of all parties involved, both oppressed and oppressors. It also expands the social consciousness of professionals, bringing more profound meaning to practice and enhancing related areas such as peace psychology, as shown in articles such as these: Philippines: the role of liberation movements in the transition to democracy. Venezuela: liberation psychology as a therapeutic intervention with street youth. South Africa: the movement for representational knowledge. Muslim world: religion, the state, and the gendering of human rights. Ireland: linking personal and political development. Australia: addressing issues of racism, identity, and immigration. Colombia: building cultures of peace from the devastation of war. Psychology of Liberation demonstrates the commitment to overcome social injustices and oppression. The book is a critical resource for social and community psychologists as well as policy analysts. It can also be used as a text for graduate courses in psychology, sociology, social work and community studies.

Empirical research is carried out in a cyclic way: approaching a research area bottom-up, data lead to interpretations and ideally to the abstraction of laws, on the basis of which a theory can be derived. Deductive research is based on a theory, on the basis of which hypotheses can be formulated and tested against the background of empirical data. Looking at the state-of-the-art in translation studies, either theories as well as models are designed or empirical data are collected and interpreted. However, the final step is still lacking: so far, empirical data has not lead to the formulation of theories or models, whereas existing theories and models have not yet been comprehensively tested with empirical methods. This publication addresses these issues from several perspectives: multi-method product- as well as process-based research may gain insights into translation as well as interpreting phenomena. These phenomena may include cognitive and organizational processes, procedures and strategies, competence and performance, translation properties and universals, etc. Empirical findings about the deeper structures of translation and interpreting will reduce the gap between translation and interpreting practice and model and theory building. Furthermore, the availability of more large-scale empirical testing triggers the development of models and theories concerning translation and interpreting phenomena and behavior based on quantifiable, replicable and transparent data.

This is the first in-depth guide to global community psychology research and practice, history and development, theories and innovations, presented in one field-defining volume. This book will serve to promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, and to minimize the pervasive US-centric view of the field.

*This book presents new perspectives on convergence and divergence phenomena in the Ibero-Romance languages. It brings together nine case studies that deal with contact between languages found in the Iberian Peninsula (Castilian, Catalan, Portuguese Questions of whether anything exceeds reasonable sense and meaning have persisted throughout the history of philosophy. These questions have even continued in postmodern thought as well as in liberatory philosophies in which many kinds of events and lineages are experienced and seen as beyond philosophy. In this cowritten text, distinguished philosophers Nancy Tuana and Charles Scott pay particular attention to lineages and their dynamism as they develop the idea of things beyond philosophy, beyond norms. This is not a history of philosophy or a critical study of a particular philosopher but a way to engage experience around dimensions of events that are beyond measuring, counting, meaning, and value. These attunements, they assert, are vitally important for the ways people orient themselves in the world and comport themselves in it. Tuana and Scott build on the alternatives to normative ethics that they find in the work of Nietzsche, Foucault, and Anzaldúa. They urge attunement to the world as a way to speak about what is impossible to give voice to, to live in the spaces between speech and the unspeakable, and to conceptualize and articulate the boundaries of rational sensibility.*

While top-down policies and declarations have yet to establish equal status and opportunities for speakers of all languages in practice, activists and advocates at local levels are playing an increasingly significant role in the creation of new social imaginaries and practices in multilingual contexts. This volume describes how social actors across multiple domains contribute to the elusive goal of linguistic equality or justice through their language activism practices. Through an ethnographic account of Indigenous Isthmus Zapotec language activism in Oaxaca, Mexico, this study illuminates the (sometimes conflicting) imaginaries of what positive social change is and how it should be achieved, and the repertoire of strategies through which these imaginaries are being pursued. Ethnographic and action research conducted from 2013–2018 in the multilingual Isthmus of Tehuantepec brings to light the experiences of educators, students, writers, scholars and diverse cultural activists whose aspirations and strategies of social change are significant in shaping the future language ecology. Their repertoire of strategies may inform and encourage language activists, scholars, and educators working for change in other contexts of linguistic diversity and inequality.

Social science research provides not only abstract, conceptual knowledge about society but also concrete, instrumental knowledge. It enables us to take action to recompose the world we live in. However, this book rejects narrow and simplistic conceptions of research use and its impact on policy-making, to embrace a more complex approach to seeing and dealing with social science. In the paradigm of "evidence-based policy", "evidence" is understood in its broad sense as information that helps form policies. Nonetheless, within current practices and discourse, it is not clear what "information" is, what is really meant by "evidence", and how it can be obtained objectively. The book draws on papers presented at the International Forum on the Social Science-Policy Nexus, where experts examined current practices and problems in areas such as social policy, migration, urban policies and globalisation. The Forum set a precedent in terms of dialogue between researchers and policy-makers. The authors contribute to enriching and elucidating the most common conceptualisations of the research-policy nexus. They represent a rich diversity of views, although most agree that an effective strategy to enhance social science-policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors.

**Pressure is increasing on all those involved in education, from teachers to policy-makers, to transform schools as organisations, while continuing to implement effective new approaches to teaching and learning. The demand is not only to reach attained targets, but also to be accountable for teaching methods. Developing Teachers and Teaching Practice brings together a selection of papers given at the ninth conference of the International Study Association of Teachers and Teaching (ISATT). The collection takes as a central theme the issue of education as a key concern within the international rhetoric of globalisation. The book offers insights in to the nature of teaching and learning, including the key new research area of emotions. It then goes on to explore the nature of teacher learning before looking at the impact of major policy initiatives on the work of teachers internationally. Developing Teachers and Teaching Practice contains contributions from some of the best-known academics in the field, and will be of great interest to teacher educators and educational researchers around the world.**

**Twentieth-century Spanish poetry has received comparatively little attention from critics writing in English. Andrew Debicki now presents the first English-language history published in the United States to examine the sweep of modern Spanish verse. More important, he is the first to situate Spanish poetry in the context of European modernity, to trace its trajectory from the symbolists to the postmodernists. Avoiding the rigid generational schemes and catalogs of names found in traditional Hispanic literary histories, Debicki offers detailed discussions of salient books and texts to construct an original and compelling view of his subject. He demonstrates that contemporary Spanish verse is rooted in the modem tradition and poetics that see the text as a unique embodiment of complex experiences. He then traces the evolution of that tradition in the early decades of the century and its gradual disintegration from the 1950s to the present as Spanish poetry came to reflect features of the postmodern, especially the poetics of text as process rather than as product. By centering his study on major periods and examining within each the work of poets of different ages, Debicki develops novel perspectives. The late 1960s and early 1970s, for example, were not merely the setting for a new aestheticist generation but an era of exceptional creativity in which both established and new writers engendered a profound, intertextual, and often self-referential lyricism. This book will be essential reading for specialists in modern Spanish letters, for advanced students, and for readers inter-ested in comparative literature.**
