Just as Americans least disadvantaged by racism are most likely to call their country post-racial, Indians who have benefited from upper-caste affiliation rush to declare their country a post-caste meritocracy. Ajantha

Subramanian challenges this belief, showing how the ideal of meritocracy serves the reproduction of inequality in Indian education.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

The sourcing and recruitment community has come a long way from what it used to be 20 years back and as recently as 5 years back and the amount of technology changes has kept everyone on the tenterhooks. The methods that you would adopt or Boolean strings that used to work today may not work tomorrow and there is a constant learning curve to keep oneself updated and also brings a healthy level of competition among individuals eager to show their wares. The volume based or niche skills hiring has become a race to the finish. The individuals with the super sourcing as well as relationship management skills tend to be more often than not the winners in the end. The recruitment community looks to find the needle in the haystack every day to find the right candidate to fulfill the hiring manager mandate. The ever bulging stock of search strings, productivity tricks and their ways of thinking they

implement are a stuff of legend. The tools do not make a Sourcer or recruiter but they should always be seen as an assistant to free up their time for more productive conversations with prospective candidates. This exercise is an attempt to equip the Talent Acquisition community with the various ways and methods to optimize their time and find the relevant information (trends, movers and shakers etc.) to be better prepared to find relevant candidates for their clients (internal or external). It is by no means an exhaustive list but a start nonetheless.

This book constitutes the proceedings of the international workshops co-located with the 16th International Conference on Document Analysis and Recognition, ICDAR 2021, held in Lausanne, Switzerland, in September 2021. The total of 59 full and 12 short papers presented in this book were carefully selected from 96 submissions and divided into two volumes. Part II contains 30 full and 8 short papers that stem from the following meetings: Workshop on Machine Learning (WML); Workshop on Open Services and Tools for Document Analysis (OST); Workshop on Industrial Applications of Document Analysis and Recognition (WIADAR); Workshop on Computational Paleography (IWCP); Workshop on Document Images and Language (DIL); Workshop on Graph Representation Learning for Scanned Document Analysis (GLESDO).

This book contains all the guidelines needed to help you write an advertisement resume that will get you interviews and a job. It promotes writing results work statements rather than task and responsibility statements. Key features include how to write 1. your heading in relation to space available, 2. targeted objectives, 3. work statements that use key words and still describe how good you are, 4. skill sections that show your level of ability, and 5. activities that show your chemistry. Make Your Resume Talk is written in sections to help you build or re-write your resume and help you tailor your resume to specific jobs. Many "before and after" resumes with individual critiques on different occupations are included to show how to write statements that get attention of potential employers. Helpful tips are provided throughout the book to highlight critical information for writing a resume that will talk for you. Chapters are provided to cover all aspects of the resume plus special chapters on electronic resumes, help for high school/college students, and the physical attributes of resumes. Effective cover letter guidelines with examples are provided as a bonus. Personal testimonials are scattered throughout the book to show you how the guidelines helped other users. The success of his approach is

shown by this quote from a Senior Corporate Recruiter from Red Hat which stated, "As a corporate recruiter, I view hundreds of resumes daily filed with buzz words, tasks and objectives that don't meet the candidate's background. These resumes are quickly eliminated. The resumes that follow the guidelines outlined in Dick Hart's book that show the depth of the candidate's ability and how well the buzz words apply to their accomplishments are the ones we seriously consider. Diligent applicants need to follow his advice and list solid achievements from past/current performance."

This book constitutes the refereed proceedings of the Indian Conference on Computer Vision, Graphics and Image Processing, ICVGIP 2006, held in Madurai, India, December 2006.

Coverage in this volume includes image restoration and super-resolution, image filtering, visualization, tracking and surveillance, face-, gesture-, and object-recognition, compression, content based image retrieval, stereo/camera calibration, and biometrics.

This volume features the complete text of the material presented at the Twentieth Annual Conference of the Cognitive Science Society. As in previous years, the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals, presenting a multifaceted view of cognitive science. This volume contains papers, posters, and summaries of symposia presented at the leading conference that brings cognitive scientists together to discuss issues of theoretical and applied concern. Submitted presentations are represented in these proceedings as "long papers" (those presented as spoken presentations and "full posters" at the conference) and "short papers" (those presented as "abstract posters" by members of the Cognitive Science Society).
