In today's globalized world, halal (meaning 'permissible' or 'lawful') is about more than food. Politics, power and ethics all play a role in the halal industry in setting new standards for production, trade, consumption and regulation. The question of how modern halal markets are constituted is increasingly important and complex. Written from a unique interdisciplinary global perspective, this book demonstrates that as the market for halal products and services is expanding and standardizing, it is also fraught with political, social and economic contestation and difference. The discussion is illustrated by rich ethnographic case studies from a range of contexts, and consideration is given to both Muslim majority and minority societies. Halal Matters will be of interest to students and scholars working across the humanities and social sciences, including anthropology, sociology and religious studies.

This book takes an integrated, evidence-based approach to the psychiatric aspects of organ transplantation. Unlike any other text currently on the market, this title presents the core principles of transplant psychiatry through an organ-based structure that includes the heart, lungs, liver, GI organs, kidney, composite tissue, and other key areas of transplantation. Each section is divided into chapters discussing psychosocial, medical, and surgical considerations in pre- and post-transplant, such as indications leading to a particular type of transplantation, medical course and complications after transplantation, psychiatric and psychosocial considerations before and after transplantation, history of each type of organ transplant, and any other special considerations. The text ends with special topics in care, including psychopharmacology, substance abuse, psychosocial evaluation of recipients and donors, ethical considerations, cross-cultural aspects, and building the transplant psychiatry practice. It includes excellent learning tools, including over 140 tables and figures for ease of use. Written by interdisciplinary experts, Psychosocial Care of End-Stage Disease and Transplant Patients is a valuable resource for students and medical professionals interested in psychiatry, psychology, psychosomatic medicine, transplant surgery, internists, hospital administrators, pharmacists, nurses, and social workers.

The examination for Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) remains one of the most internationally recognised postgraduate examinations in the specialty. Over the years, the examination has evolved in keeping with changes in medical education; the Part 3 examination now consists of 14 tasks, each covering one of the 14 core modules in the curriculum and assessing specific skills which may include all or some of Information Gathering, Communication with Patients and Families, Communication with Colleagues, Patient Safety, and Applied Clinical Knowledge. This invaluable resource consists of analyses of different aspects of what is being tested, with general advice on how to prepare for the examination and discussion of the reasons why trainees fail the examination. There follow four sample 'papers' of tasks; in each of them, attempts have been made to cover all 14 modules in the core curriculum. There is also an additional paper with random tasks to help with preparation.

Taking all the expert nursing content and student-friendly features of Potter and Perry's Fundamentals text and streamlining it into a shorter format, Essentials for Nursing Practice, 8th Edition is the perfect choice to help busy nursing students master all the fundamental nursing principles in less time! This new 8th edition contains the nursing principles, concepts, skills, and easy-to-follow format that nursing students have come to love about Potter and Perry's Basic Nursing — all updated with the latest information, visuals, and learning features. Plus, this reinvigorated Essentials text is streamlined and re-designed to work better with the rest of your books. It also comes with a wide array of online learning tools (free with book purchase) to help you master the important nursing concepts and skills with ease. Progressive case studies are introduced at the beginning of the chapter and are then used to tie together the care plan, concept map, clinical decision-making exercises, and QSEN scenarios. Safety guidelines for nursing skills sections precede each skills section to help you focus on safe and effective skills performance. Nursing skills at the end of each chapter feature full-blood coloring on the edge of the page to make them easy to locate. UNIQUE! Clinical Decision-Making exercises coordinate directly with the progressive case study presented in the chapter. Focused Patient Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. Evaluation boxes bring everything together after nursing interventions have been implemented. Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. NEW! QSEN scenarios present a clinical situation followed by an open-ended question designed to help you understand and apply these core competencies. NEW! Chapter on professional nursing includes information on QSEN, prioritization, delegation, and professional levels. NEW! Completely revised review questions contain a strong mix of clinical thinking and application-level questions. NEW!

Content on the impact of exercise covers its influence on disease reduction, compassion fatigue, lateral violence, cyber bullying, social media implications, caregiver strain, and safe patient handling. NEW! Expanded use of Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a description of how the study has affected nursing practice — in every chapter. NEW! Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. These will related to the chapter case studies when possible.

Developing Research Writing is designed to encourage, inspire and improve the advisory practice of providing writing feedback. This book provides insights and advice that supervisors can use to advance their support of their research students' writing and, at the same time, survive increasing supervisory demands. Book parts are framed by empirical supervisor and doctoral student experiences and chapters within each part provide multiple approaches. The carefully chosen contributors are specialists on research writing and doctoral pedagogy, who guide the reader through the key stages of providing feedback. Split into nine key parts the book covers: starting a new supervision with writing in focus; making use of other resources along the way; encouraging style through control of language; writing feedback on English as an Additional Language (EAL) writing; Master's and Honours smaller projects' writing feedback; thesis by publication or performance-based writing; maintaining and gathering momentum; keeping the examiner happy; writing feedback as nudging through identity transition. The parts cohere into a go-to handbook for developing the supervision process. Drawing on research, literature and experience, Developing Research Writing offers well-theorized, yet practical and grounded advice conducive to good practices.
