promoting the protection, management and planning of European landscape and organising European co-operation in this area. It is the first international treaty covering all aspects of European landscape. It applies to the entire territory of the contracting parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes that might be considered outstanding, commonplace or deteriorated. By taking into account landscape, culture and nature, the Council of Europe seeks to protect the quality of life and well-being of Europeans in a sustainable development perspective.

Ibuprofen is widely used throughout the world for a variety of conditions. This reference work provides a comprehensive and critical review of the basic science and clinical aspects of the drug. The book begins with the history and development of the drug and its current patterns of use world- wide before moving on to examine its basic pharmaceutical attributes and medicinal chemistry. The properties of various formulations are described (oral prescription and OTC, topical and others) are described. The pharmacokinetics of ibuprofen in animals and humans is discussed - highlighting the factors affecting absorption, distribution, metabolism and elimination. The clinical pharmacology and toxicology and the
