When her husband's ex-girlfriend arrives on their doorstep, Shelby Tomlinson--a mother pregnant with her second child--finally learns about her husband's secrets and lies.

Second in a hot and naughty trilogy from the author of Nauti Boy. Angela Knight says, "When I'm in

the mood for steamy romance, I read Lora Leigh." So do readers who devoured the author's first novel in the Mackay Cousins trilogy, Nauti Boy. Now, in Nauti Nights, Leigh delivers an even hotter tale of a Kentucky marine who'll do anything to get the woman he wants. Luckily for him, she wants it bad. James "Dawg" Mackay has lusted after sweet Crista for years. Just as many as she's spent running from him-and from a dangerous attraction. But for Crista, running isn't an option anymore because Dawg's got a plan to get

***her and keep her. It's kind
of low-down-but completely
hot.***

Developers who want to access USB devices from their embedded systems will find a helpful resource in *USB Embedded Hosts: The Developer's Guide*. This new book from the author of *USB Complete* shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB

host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball,

triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In *Underwater Dogs*, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring

Soul Confessions

A collection of essays for anyone interested in feminism, film, and avant-garde practice. I used to think love was a lie. Now I know it is real, powerful, and I do not want to lose it. But my future scares me, and there is no way this can be happening, especially since I have finally broken free from all the people who wanted pieces of me. I do not even know how to start over, but I have to find a way. So when I discover what my mother has been keeping from me, it does not make me

hate her. It gives me hope for a new life, outside of New York. But the ties that bind me to this city are so strong, sometimes they are chains.

In the deep zone, even the very best player can find it impossible to beat a foe who's hungry and waiting. . . . Troy White can predict a play before it happens. Star quarterback on his state football team, Troy's a natural for the 7-on-7 tournament that's being held at the Super Bowl in Miami. With any luck, his "football genius" will also be working for the

Atlanta Falcons on that big day. Ty Lewis is a wide receiver with exceptional speed. His brother, an NFL star, says getting on a 7-on-7 team will prove Ty's a winner. From the moment the two football champs cross paths, Troy and Ty begin to size each other up. Troy is suspicious of Ty's interest in his friend Tate, while Ty worries his speed will never be a match for Troy's game smarts. But when the two rivals find themselves somehow tangled in the same dangerous web of deceit, they discover that they have more in common than their skill at football. Uniting Troy, first seen in the New York Times bestselling Football Genius, and Ty, who was chased by the Mafia in Football Hero, Tim

Green's Deep Zone delivers it all—vivid settings, dynamic characters, and high-stakes action on and off the field.

In this work, the authors present a global perspective on the methods available for analysis and design of non-linear control systems and detail specific applications. They provide a tutorial exposition of the major non-linear systems analysis techniques followed by a discussion of available non-linear design methods.

Making Babies in the Twenty-first Century

The Developer's Guide

"Injections + Appointments + Egg

Retrieval + Embryo Transfer =
Resources (Energy x Time x
Emotion)" That's the equation that
was projected onto the screen
when Beth Kohl and her husband
first showed up at the in vitro
fertilization (IVF) clinic. "Good
evening," the program's
psychologist told the gathered
infertile couples. "Before you begin
your treatment, you should know
that this program is emotionally and
psychologically stressful." And how.
In this marvelously unconventional
account of her struggles to bear
children, Kohl leads the reader on
an oh-so-up-close tour of
fertilization in America, and the
ways in which science and miracle,
technology and faith, converge to

create life in the twentyfirst century. Along the way, Kohl wrestles with a new world of medical ethics: Should she "selectively reduce" the number of embryos successfully implanted in the womb in order to prevent a potentially complicated pregnancy? How much genetic testing of fertilized eggs is too much? What is she supposed to do with the seven embryos left over from the IVF process? When Andrew Solomon wrote *The Noonday Demon*, he opened the world of depression to readers as no writer had done before. And when Stephen L. Carter wrote *Reflections of an Affirmative Action Baby*, many readers were forced to completely rethink race and prejudice. Kohl's

spirited and rich exploration of
"embryo culture" will completely
revise how we see modern
motherhood.
