Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic

impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into

shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes

In early 1946, Kurds declared an independent republic in north-west Iran. The Mahabad Republic, as it became known, was the first time that the Kurds experienced self-rule in the modern era. Although short-lived, the Republic had a formative influence on the subsequent development of Kurdish nationalist movements in Iran and the wider region. Here, Abbas Vali

disputes the conventional view that the Kurdish Republic was the result of a Soviet conspiracy to dismember Iran, a side-effect of the Cold War. Instead he emphasizes the diversity of the internal Iranian and Kurdish factors that led to the formation of the Republic, arguing that the Republic represents the culmination of a new and modern Kurdish national identity. This was an identity which emerged in response to the exclusionary effects of the political and discursive processes and practices of the construction of a modern Iranian nation-state and national identity since the Constitutional Revolution of 1906, which

often excluded and attempted to override a Kurdish one. Vali contends that this process, largely due to the socio-economic and cultural impact of the rule of Pahlavis, in reality forced the Kurdish people of Iran to form and reinforce their own ethno-linguistic and ethno-national community. The expressions of this separate identity can be traced through the formation and dissolution of Kurdish national parties, such as the Kurdistan Democratic Party of Iran (KDPI). 'Kurds and the State in Iran' offers an analysis of the formation and effects of the concepts of the state, the nation, nationalism and ethnic identity,

which go beyond current ethnicist and constructivist theories, thus making it essential reading for anyone interested in the Kurds or the development of national and state identities in the Middle East.
