Discussing the key issues of modern warfare, Hew Strachan's work examines the theory and practice of land warfare in

Europe since 1700. Looking at warfare in the context of social and political change, Dr. Strachan interprets his subject matter as widely as possible, and *European Armies and the Conduct of War* considers the roles of air power and the impact of the United States on European military developments. Through the eyes of the major theorists of the day, *European Armies* examines: * how the social and political influences which shape armies, also mould the attitude of those armies to warfare * the story of technical innovation * the mounting pace of industrialization and its impact of warfare. Recent military history has tended to focus on the relationship between armies and society and there has been much original research on the subject of the conduct of war. This book brings these approaches together, providing information and insight vital to the study of this fascinating era.

Technical instructor and HVAC expert Jerry Clemons completely covers both air-conditioning as well as heating systems, so you can save money repairing your own vehicle. Covered is a history of HVAC systems, airflow throughout the system, the principles of refrigerant, diagnosis of common faults in older systems, testing procedures, and finally repair and, in the case of air conditioning, recharging your system. Also included is proper evacuation and disposal of any residual refrigerant in the system. Components such as compressors, condensers, evaporators and heater cores, pressure switches and climate control electrics and switches are also covered. Finally, for people with older cars, converting from the no-longer-available R-12 to R134a is detailed. Automotive climate controls are a complex system and are difficult to repair without proper instruction. Whether you are trying to get your old classic back to its original form or are just looking to save on expensive repairs, author Jerry Clemons and this book provide the knowledge you will need to get your car back on the road and cruising in comfort.
