Bestselling author and renowned Buddhist teacher Noah Levine adapts the Buddha's Four Noble Truths and Eight Fold Path into a proven and systematic approach to recovery from alcohol and drug addiction—an indispensable alternative to the 12-step program. While many desperately need the help of the 12-step recovery program, the traditional AA model's focus on an external higher power can alienate people who don't connect with its religious tenets. Refuge Recovery is a systematic method based on Buddhist principles, which integrates scientific, non-theistic, and psychological insight. Viewing addiction as cravings in the mind and body, Levine shows how a path of meditative awareness can alleviate those desires and ease suffering. Refuge Recovery includes daily meditation practices, written investigations that explore the causes and conditions of our addictions, and advice and inspiration for finding or creating a community to help you heal and awaken. Practical yet compassionate, Levine's successful Refuge Recovery system is designed for anyone interested in a non-theistic approach to recovery and requires no previous experience or knowledge of Buddhism or meditation.

From the bestselling author of The Speed of Trust, a revolutionary new way to lead, deemed "the defining leadership book in the 21st century" (Admiral William McRaven, author of Make Your Bed) that "every parent, teacher, and leader needs" (Esther Wojcicki, author of How to Raise Successful People). We have a leadership crisis today, where even though our world has changed drastically, our leadership style has not. Most organizations, teams, schools, and families today still operate from a model of "command and control," focusing on hierarchies and compliance from people. But because of the changing nature of the world, the workforce, work itself, and the choices we have for where and how to work and live, this way of leading is drastically outdated. Stephen M.R. Covey has made it his life's work to understand trust in leadership and organizations. In his newest and most transformative book, Trust and Inspire, he offers a simple yet bold solution: to shift from this "command and control" model to a leadership style of "trust and inspire." People don't want to be managed; they want to be led. Trust and Inspire is a new way of leading that starts with the belief that people are creative, collaborative, and full of potential. People with this kind of leader are inspired to become the best version of themselves and to produce their best work. In this "beautifully written page-turner" (Amy Edmondson, Harvard Business School professor), Covey offers the solution to the future of work: where a dispersed workforce will be the norm, necessitating trust and collaboration across time zones, cultures, personalities, generations, and technology. Trust and Inspire calls for a radical shift in the way we lead in the 21st century, and Covey shows us how.

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

This vital resource offers mental and behavioral health providers clear, demystified guidance on HIPAA and HITECH regulations pertinent to practice. Many mental health providers erroneously believe that if they uphold their ethical and legal obligation to client confidentiality, they are HIPAA compliant. Others may believe that because their electronic health record provider promises HIPAA compliance, that their practice or organization is HIPAA compliant also not true. The reality is HIPAA has changed how providers conduct business, permanently, and providers need to know how to apply the regulations in daily practice. Providers now have very specific privacy requirements for managing patient information, and in our evolving digital era, HIPAA security regulations also force providers to consider all electronic aspects of their practice. HIPAA Demystified applies to anyone responsible for HIPAA compliance, ranging from sole practitioners, to agencies, to larger mental health organizations, and mental health educators. While this book is written for HIPAA covered entities and business associates, for those who fall outside of the regulations, it is important to know that privacy and

security regulations reflect a new standard of care for protection of patient information for all practitioners, regardless of compliance status. Additionally, some HIPAA requirements are now being codified into state laws, including breach notification. This book's concise but comprehensive format describes HIPAA compliance in ways that are understandable and practical. Differences between traditional patient confidentiality and HIPAA privacy and security regulations are explained. Other important regulatory issues covered that are of importance of mental health providers include: Patient rights under HIPAA How HIPAA regulations define psychotherapy notes, with added federal protection Conducting a required security risk assessment and subsequent risk management strategies The interaction with HIPAA regulations and state mental health regulations Details about you may need Business Associate Agreements, and a Covered Entity's responsibility to complete due diligence on their BAs Training and documentation requirements, and the importance of sanction policies for violations of HIPAA Understanding what having a HIPAA breach means, and applicable breach notification requirements Cyber defensive strategies. HIPAA Demystified also addresses common questions mental health providers typically have about application of HIPAA to mobile devices (e.g. cell phones, laptops, flash drives), encryption requirements, social media, and Skype and other video transmissions. The book also demonstrates potential costs of failing to comply with the regulations, including financial loss, reputational damage, ethico-legal issues, and damage to the therapist-patient relationship. Readers will find this book chock full of real-life examples of individuals and organizations who ignored HIPAA, did not understand or properly implement specific requirements, failed to properly analyze the risks to their patient's private information, or intentionally skirted the law. In the quest to lower compliance risks for mental health providers HIPAA Demystified presents a concise, comprehensive guide, paving the path to HIPAA compliance for mental health providers in any setting.

The main purpose of this set of mission focused Commentaries is to fill a large gap. At least to my limited knowledge, a set of Bible Commentaries that has this same mission focus does not exist. It may be that I am uninformed since I served the Church as a foreign missionary in Nigeria my entire career from 1964-1997; and I had very little contact with developments in the field of Biblical studies during that period of time. Yet, this gap surprises me, since the entire Bible reveals, in many beautiful and carefully planned details, how God's mission-heart has always been busy carrying out his gracious mission-plan to lost mankind. I have, therefore, attempted to describe in my Commentaries some aspect of God's mission-plan in every verse of the New Testament, beginning with the Gospel of Luke and the Acts of the Apostles. All of Scripture reveals the mission-heart of God and his mission-plan. God is love (1 Jn 4:16), and therefore, he has a most gracious mission-heart. And mankind is the crown of his creation and the main object of his love; therefore, he has always longed to live together with all human beings in perfect relationships in a perfect world forever (Ezek 18:32; 1 Tim 2:4). That was and still is his eternal plan. However, he also created mankind with the freedom to choose whether they would return his love or not, since it would not be true love if he forced anyone to love him. After Adam and Eve bore children, the question is: did they tell them and others about God's love for them? The Old Testament gives us only a few clues that they must have done so. In spite of the fact that the early chapters of Genesis record many, many years of human history, we read about only a few people, such as Enoch (Gen 5:24) and Noah (Gen 6:9) who loved and

worshipped God-but very few indeed! Then, after many years, God continued to develop his mission-plan by calling Abraham to be the father of a new nation, the nation of Israel, whom he chose to be his special people (Deu 7:7). He graciously gave Abraham faith in himself, and blessed him and his descendants, so that they would be able to be a blessing to all other nations by telling them about God's love for them (Gen 12:1-3). Then, "when the fullness of time had come" (Gal 4:4), God revealed the very heart of his mission-plan by sending his own Son, Jesus to be born into the nation of Israel as the only true God/man, in order to rescue all of lost mankind from sin (Lk 1:31-33). And then, after Jesus' ascension, God began to carry out the final stages of his mission-plan in a new era by beginning to create a new nation of Israel, the Church. He did so by sending his Holy Spirit to empower the mission-hearts of the faithful believers on Pentecost Day (Acts 1:8). Thus, the new Israel includes both a remnant of his chosen people from the old Israel as well as Gentiles from every nation on earth who trust in Jesus as their Lord (Rom 11:25-26). Furthermore, the Holy Spirit then also continued to inspire men to write down his holy Word in the New Testament, so that he can use both the Old and the New testaments to strengthen his Church, in order to prepare them to go and tell the Gospel to the lost people of all nations (Rom 10:17; Gen 12:1-3). And this last part of his mission-plan will not be complete until the Lord Jesus returns on the Last Day. And on that Last Day, God will finally fulfill his original plan by bringing together his new nation of Israel in order to live with them in a perfect new world forever (Rev 21:1-2).

What is this book about? .NET is designed to provide a new environment within which you can develop almost any application to run on Windows (and possibly in the future on other platforms). Visual Basic .NET (VB.NET) is likely to be a very popular development tool for use with this framework. VB.NET is a .NET compliant language and, as such, has (except for legacy reasons) almost identical technical functionality as the new C# language and Managed Extensions for C++. Using VB.NET, you can develop a dynamic Web page, a component of a distributed application, a database access component, or a classic Windows desktop application. In order to incorporate Visual Basic into the .NET Framework, a number of new features have been added to it. In fact, the changes are so extensive that VB.NET should be viewed as a new language rather than simply as Visual Basic 7. However, these changes were necessary to give developers the features that they have been asking for: true object orientated programming, easier deployment, better interoperability, and a cohesive environment in which to develop applications. What does this book cover? In this book, we cover VB.NET virtually from start to finish: We begin by looking at the .NET Framework, and end by looking at best practices for deploying .NET applications. In between, we look at everything from database access to integration with other technologies such as XML, along with investigating the new features in detail. You will see that VB.NET has emerged as a powerful yet easy to use language that will allow you to target the Internet just as easily as the desktop. This book explains the underlying philosophy and design of the .NET Framework and Common Language Runtime (CLR) and explains the differences between Visual Basic 6 and Visual Basic .NET. You will learn how to Develop applications and components using Visual Studio .NET Effectively apply inheritance and interfaces when designing objects and components Organize your code using namespaces Handle errors using the Try...Catch...Finally structure Access data using ADO.NET and bind controls to the underlying data sources Create Windows applications and custom Windows controls Interoperate with COM and ActiveX components Create transactional and queuing components Use .NET Remoting to send serialized objects between clients and servers Create Windows Services Use VB.NET to access information on the Web Create and consume Web Services Secure your applications and code using the tools provided in the .NET Framework SDK Arrange your applications and libraries in assemblies and deploy them using Visual Studio .NET Who is this book for? This book is aimed at experienced Visual Basic developers who want to make the transition to VB.NET. What do you need to use this book? Although it is possible to create VB.NET applications using the command lines tools contained in the .NET Framework SDK, you will need Visual Studio .NET (Professional or higher), which includes the .NET Framework SDK, to use this book to the full. Here are some additional notes on what you may need: Some chapters make use of SQL Server 2000. However, you can also run the example code using MSDE (Microsoft Data Engine), which ships with Visual Studio .NET. Several chapters make use of Internet Information Services (IIS). IIS ships with Windows 2000 Server, Windows 2000 Professional, and Windows XP, although it is not installed by default. Chapter 18 makes use of MSMQ to work with queued transactions. MSMQ ships with Windows 2000 Server, Windows 2000 Professional, and Windows XP, although it is not installed by default.
