In Testosterone Inc.: Tales of CEOs Gone Wild, bestselling author and New York Post columnist Chris Byron chronicles the Gatsby-like saga of the rise and fall of the celebrity CEO. During the height of the 1990s bull market, they were America's new heroes: the heroes of business. They were our bold new leaders, cutting the fat, pushing for productivity, implementing visionary plans, and making strategic deals. When the bull market turned to bust and the applause turned to cat-calls, the world was shocked at the truth. Drenched in money and public acclaim, our CEO-heroes-mostly white, mostly male, mostly middle-aged-turned out to be not much different than a group of twenty-something rock stars-drunk on power and driven by sex, greed, and glamour. Testosterone Inc. goes behind the boardroom doors to show the serial affairs and marriages of these acquisitive corporate titans. At the center of this story is Jack Welch, the biggest of America's rock star CEOs and the former head of General Electric Co., surrounded by "mini-me" CEOs Ron Perelman of Revlon, Al Dunlap of Sunbeam, and Dennis Kozlowski of Tyco—all gone wild in public displays of consumption and predatory appetites writ large. Byron gets inside the bars where Welch liked to hang out and pick up women with his early "business soul mate" buddies. Byron hovers unseen at the elbow of Ron Perelman and his mistress aboard the Concorde for a week in Paris in his mistaken belief that his wife knows nothing about his secret affair. Byron peeks behind the curtains of a U.S. Army officers' quarters to behold Al Dunlap horrifying his first wife, who claimed in her divorce action that Dunlap would point his knife at her and say, "I often wondered what human flesh tasted like." Byron becomes a fly on the wall to chronicle the longing for respect and serial womanizing of Dennis Kozlowski. Frequently hilarious, sometimes heartbreaking, Testosterone Inc. follows the intertwined lives of these four corporate heroes, from childhood to their ultimate moments of glory and the crash-and-burn calamities that followed, as man's age-old hunger for power, greed, and temptation undid them all. From suicide to murder, from dysfunctional childhoods to dysfunctional marriages in adulthood, from business chutzpah to financial suicide, here is the ultimate untold business story of our time: what went on at century's end, when testosterone got the best of businessmen everywhere, and CEOs went wild.

Endore's classic werewolf novel - now back in paperback for the first time in over forty years - helped define a genre and set a new standard in horror fiction The werewolf is one of the great iconic figures of horror in folklore, legend, film, and literature. And connoisseurs of horror fiction know that The Werewolf of Paris is a cornerstone work, a masterpiece of the genre that deservedly ranks with Mary Shelley's Frankenstein, Bram Stoker's Dracula, and Robert Louis Stevenson's The Strange Case of Dr. Jekyll and Mr. Hyde. Endore's classic novel has not only withstood the test of time since it was first published in 1933, but it boldly used and portrayed elements of sexual compulsion in ways that had never been seen before, at least not in horror literature. In this gripping work of historical fiction, Endore's werewolf, an outcast named Bertrand Caillet, travels across pre-Revolutionary France seeking to calm the beast within. Stunning in its sexual frankness and eerie, fog-enshrouded visions, this novel was decidedly influential for the generations of horror and science fiction authors who came afterward.

Health Issues in the Black Community THIRD EDITION "The outstanding editors and authors of Health Issues in the Black Community have placed in clear perspective the challenges and opportunities we face in working to achieve the goal of health equity in America." —David Satcher, MD, PhD, 16th Surgeon General of the United States and director, Satcher Health Leadership Institute at Morehouse School of Medicine "Eliminating health disparities must be a central goal of any forward thinking national health policy. Health Issues in the Black Community makes a valuable contribution to a much-needed dialogue by focusing on the challenges of the black community." —Marc Morial, Esq., president, National Urban League "Health Issues in the Black Community illuminates comprehensively the range of health conditions specifically affecting African Americans, and the health disparities both within the black community and between racial and ethnic groups. Each chapter, whether addressing the health of African Americans by age, gender, type of disease, condition or behavior, is well-detailed and tells an important story. Together, they offer practitioners, consumers, scholars, and policymakers a crucial roadmap to address and change the social determinants of health, reduce disparities, and create more equal treatment for all Americans." —Risa Lavizzo-Mourey, MD, MBA, president, Robert Wood Johnson Foundation "I recommend Health Issues in the Black Community as a must-read for anyone concerned about the future of the African American community. Health disparities continues to be one of the major issues confronting the black community. This book will help to highlight the issues and keep attention focused on the work to be done." — Elsie Scott, PhD, president of the Congressional Black Caucus Foundation "This book is the definitive examination of health issues in black America—issues sadly overlooked and downplayed in our culture and society. I congratulate Drs. Braithwaite, Taylor, and Treadwell for their monumental book." —Cornel West, PhD, professor, Princeton University

The Monfort Plan is a five-year, forward looking plan to eradicate extreme poverty from the developing world, and details how microfinance has made a difference to developing countries. This book proposes a new institution based in the developing world with the potential to provide a basic, free, and universal service in the areas of water, sanitation, healthcare, and education to the extreme poor worldwide. The provision will be subject to a certain degree of conditionality in areas ranging from corruption to legal environment. The new institution will be established in a new international territory based within a specific country in Subsaharan Africa and will emerge in 2015. In The Monfort Plan author Jaime Pozuelo-Monfort engineers and designs a solution to lessen the burden of poverty. In order to do so he relies on the social sciences to bring about innovation and forward looking economic policies and financial instruments in the context of a paradigm shift. This book presents a multidisciplinary approach to policymaking that combines a range of fields in the social sciences, looking at the history behind the Marshall Plan, the formation of the European Union, and the Bretton Woods Institutions, in order to determine how a Marshall Plan for Africa-and the creation of New Institutions in the developing world-could work. We live a moment of crisis in which creative policymaking might prove useful when proposing outcomes for a revitalized framework for capitalism to thrive and better serve the world. Walks you through the technicalities of the new architecture of capitalism in a straightforward manner Provides a holistic view of how microfinance combined with the right economic policies and financial instruments could help change the world for the poor Contains sweeping and detailed recommendations on how to build a new capitalist paradigm that helps elevate the poor and improve the human condition Incorporating commentary from some of the top minds in the field of microfinance, this book puts the method of microfinance in perspective.

É It may be said that society itself creates the crimes that most beset it. If the good things of life were more evenly distributed, if everyone had his rights, if there were no injustice, no oppression, there would be no attempts to readjust an unequal balance by violent or flagitious means. There is some force in this, but it is very far from covering the whole ground, and it cannot excuse many forms of crime. Crime, indeed, is the birthmark of humanity, a fatal inheritance known to the theologians as original sin. Crime, then, must be constantly present in the community, and every son of Adam may, under certain conditions, be drawn into it. To paraphrase a great saying, some achieve crime, some have it thrust upon them; but most of us (we may make the statement without subscribing to all the doctrines of the criminal anthropologists) are born to crime. The assertion is as old as the hills; it was echoed in the fervent cry of pious John Bradford when he pointed to the man led out to execution, ÓThere goes John Bradford but for the grace of God!Ó Criminals are manufactured both by social cross-purposes and by the domestic neglect which fosters the first fatal predisposition. Ó Assuredly external factors and circumstances count for much in the causation of crime, Ó says Maudsley. The preventive agencies are all the more necessary where heredity emphasises the universal natural tendency. The taint of crime is all the more potent in those whose parentage is evil. The germ is far more likely to flourish into baleful vitality if planted by congenital depravity. This is constantly seen with the offspring of criminals. But it is equally certain that the poison may be eradicated, the evil stamped out, if better influences supervene betimes. Even the most ardent supporters of the theory of the Óborn criminalÓ admit that this, as some think, imaginary monster, although possessing all the fatal characteristics, does not necessarily commit crime. The bias may be checked; it may lie latent through life unless called into activity by certain unexpected conditions of time and chance. An ingenious refinement of the old adage, ÓOpportunity makes the thief,Ó has been invented by an Italian scientist, Baron Garofalo, who declares that Óopportunity only reveals the thiefÓ; it does not create the predisposition, the latent thievish spirit.
