The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, post-docs and graduate students struggling to make ends meet. It's a sad but all too common story. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who land the job they want. In *How to Write a Winning Job Application*, she shares her insider's knowledge of the job search process, from identifying the right department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D. student. It's a no-nonsense, step-by-step manual that covers every aspect of the job search process, from grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor is In addresses all of these issues, and many more.

21st Century Skills Development Through Inquiry-Based Learning

United States Imports of Merchandise for Consumption

This book presents innovative instructional interventions designed to support inquiry project-based learning as an approach to equip students with 21st century skills. Instructional techniques include collaborative team-based teaching, social constructivist game design and game play, and productive uses of social media such as wikis and other online communication affordances. The book will be of interest to researchers seeking a summary of recent empirical studies in the inquiry project-based learning domain that employ new technologies as constructive media for student synthesis and creation. The book also bridges the gap between empirical works and a range of national- and international-level educational standards frameworks such as the P21, the OECD framework, AASL Standards for the 21st Century Learner, and the Common Core State Standards in the US. Of particular interest to education practitioners, the book offers detailed descriptions of inquiry project-based learning interventions that can be directly reproduced in today's schools. Further, the book provides research-driven guidelines for the evaluation of student inquiry project-based learning. Lastly, it offers education policymakers insight into establishing anchors and spaces for applying inquiry project-based learning opportunities for youth today in the context of existing and current education reform efforts. The aim of this book is to support education leaders', practitioners' and researchers' efforts in advancing inspiring and motivating student learning through transformative social constructivist inquiry-based knowledge-building with information technologies. We propose that preparing students with inquiry mindsets and dispositions can promote greater agency, critical thinking and resourcefulness, qualities needed for addressing the complex societal challenges they may face.

Many people love the American Southwest without truly understanding it. Ross Randall Calvin did and we are the richer for it. Calvin began his search as a pilgrim health-seeker, believing he had left the "known world" behind when he fled the East for New Mexico. There he soon found to our benefit that he could use his observational skills and intellect to fashion a picture that helped him and us comprehend those unique factors that make New Mexico what it is--its history, people, culture, climate, and so much more. Those lessons learned he shared with us. His books and essays can open our eyes to New Mexico if we but heed them. Calvin's story as discoverer and interpreter unfolds in rich detail in this essential work.

The Lahu are a hill-dwelling Tibeto-Burman people whose language reflects the influence of Thai and Chinese, yet retains a unique beauty and expressive power of its own. The Dictionary of Lahu is one of the most exhaustive and sophisticated dictionaries yet produced for a Southeast Asian language. Together with the author's The Grammar of Lahu (UCPL vol. 75, 1973/1982), it places Lahu among the best documented minority languages of the world.

"A wonderful picture of an important period in the practice of medicine in the United States." (from the Foreword by Peter Rosen, MD) Here is the very first book to comprehensively explore the evolution of the field of emergency medicine -- from its origins following World War II, through the sociopolitical changes of the 1950s, 1960s, and 1970s, to the present. First-hand narratives from more than 45 founders and pioneers of emergency medicine provide a vivid portrayal of the important events and viewpoints that have given rise to today's practice. Represents the first comprehensive history of emergency medicine as a specialty. Provides first-hand oral histories from more than 45 of the key figures who witnessed and helped to shape the developments chronicled in the book. Offers keen insights into how the sociopolitical changes of the 1950s through 1970s influenced public health, health care delivery, and emergency medicine. Includes many unique photographs of important leaders in emergency medicine.

Describes admission requirements, size, international student enrollment, financial aid opportunities, costs, degrees, and student services for more than two thousand two- and four-year colleges, focusing on undergraduate fields of study.

This one-of-a-kind directory -- the only guide available for the growing number of resident international students -- now includes the same college search software as The College Board College Handbook 2001. The tabular presentation in the book gives students detailed facts about colleges' policies and special programs for international students. The CD-ROM gives students in-depth information about the colleges' campus environment, student life, academic programs, and more.

What do flashlights, the British invasion, black cats, and seesaws have to do with computers? In CODE, they show us the ingenious ways we manipulate language and invent new means of communicating with each other. And through CODE, we see how this ingenuity and our very human compulsion to communicate have driven the technological innovations of the past two centuries. Using everyday objects and familiar language systems such as Braille and Morse code, author Charles Petzold weaves an illuminating narrative for anyone who's ever wondered about the secret inner life of computers and other smart machines. It's a cleverly illustrated and eminently comprehensible story--and along the way, you'll discover you've gained a real context for understanding today's world of PCs, digital media, and the Internet. No matter what your level of technical savvy, CODE will charm you--and perhaps even awaken the technophile within.

The College Board International Student Handbook 2002

This two-volume set LNCS 12131 and LNCS 12132 constitutes the refereed proceedings of the 17th International Conference on Image Analysis and Recognition, ICJAR 2020, held in Póvoa de Varzim, Portugal, in June 2020. The 54 full papers presented together with 15 short papers were carefully reviewed and selected from 123 submissions. The papers are organized in the following topical sections: image processing and analysis; video analysis; computer vision; 3D computer vision; machine learning; medical image and analysis; analysis of histopathology images; diagnosis and screening of ophthalmic diseases; and grand challenge on automatic lung cancer patient management. Due to the corona pandemic, ICJAR 2020 was held virtually only.

Teacher collaboration helps to facilitate meaningful and effective learning and enables sustainable development of schools. Teacher teams who collaboratively investigate a shared problem, or design curriculum materials together, significantly contribute to the professional development of teachers in areas of subject matter, curriculum design and data skills. Contributions to this book discuss various perspectives of teachers collaborating in design teams, by investigating the sense of collaboration and its effects, and the conditions that influence and drive it. The studies provided suggest that collaborative design and research supports participants (teachers and teacher educators) to improve their knowledge, specifically in regards to technological pedagogical content and subject matter. Participating teachers further developed curriculum design expertise, such as, understanding the relevance and effectiveness of involving stakeholders in designing and implementing newly designed curricula. This volume was originally published as a special issue of Educational Research and Evaluation.
