Painter, DJ and nightlife promoter Spencer Sweeney (born 1973) has been an indelible and essential part of New York City's cultural landscape for almost two decades, connecting to longstanding roots in the city's music, art and life after dark. While many mourn the loss of the NYC they love, Sweeney has never fallen out of love with his city. This huge but affordable volume is filled with the evidence: pages of fascinating interviews with fellow faithfuls such as Alex Bag, Larry Clark, Abel Ferrara, John Giorno, Mary Heilmann, Harmony Korine, Johan Kugelberg, Jim Lambie, Glenn O'Brien, Will Oldham, Elizabeth Peyton, Rob Pruitt and Tony Shafrazi; archival photos documenting the countless moments, both legendary and obscure; and of course, hundreds of Sweeney's colorful paintings that synthesize life in New York in the second decade of the new century.

Collected columns and essays on motorcycling A delightful compilation of articles and essays on all things motorcycle by Ron Davis, writer, columnist, and associate editor for BMW Owners News, the largest magazine for BMW motorcycle owners on the planet.

The story of the ultimate Honda power cruiser.

The protective function of forests for water quality and water-related hazards, as well as adequate water supplies for forest ecosystems in Europe, are potentially at risk due to changing climate and changing land-management practices. Water budgets of forest ecosystems are heavily dependent on climate and forest structure. The latter is determined by the management measures applied in the forestry sector. Various developments of forest management strategies, imposed on a background of changing climate, are considered in assessing the overall future of forest-water interactions in Europe. Synthesizing recent research on the interactions of forest management and the water regime of forests in Europe and beyond, the book makes an important contribution to the ongoing dialogue between scientists dealing with different scales of forest-water interactions. This collaborative endeavour, which covers geographic and climatic gradients from Iceland

to Israel and from southern Spain to Estonia and Finland, was made possible through the COST Action "Forest Management and the Water Cycle (FORMAN)", which was launched in 2007 (<http://www.forestandwater.eu/>). The book will be of particular interest to the research community involved in forest ecosystem research and forest hydrology, as well as landscape ecologists and hydrologists in general. It will also provide reference material for forest practitioners and planners in hydrology and land use.

The Complete Book of BMW Motorcycles offers a thorough year-by-year guide to every production machine ever built by Germany's leading motorcycle manufacturer. From the first model, the 1923 R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) superbike, the S1000RR, this book captures nearly a century of motorcycling excellence in a combination of historic and contemporary photos. Technical specs are provided for each model. This comprehensive

review covers all of BMW's bike families: The side-valve machines from the early years The early overhead-valve performance bikes The modern Airheads and Oilheads The four-cylinder and six-cylinder touring bikes The early pushrod singles The modern overhead-cam singles The latest parallel twins, and inline-four cylinder sport bikes Among them, you'll find all the classic bikes—pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the K1 “flying brick”; and the GS (Gelände Sport) series that launched a dual-sport revolution right up to today’s world-class S100RR and retro-inspired R nine T. Like the other titles in Motorbooks' Complete Book series, this guide to BMW's motorcycle output offers the most complete reference to the subject available.

This title introduces readers to the features, brand history, and sponsored motocross athletes of KTM dirt bikes. This title includes informative sidebars, detailed infographics, vivid photos, and a glossary.

Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, including Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a different rendition. The book will appeal to adventure-travel enthusiasts and to motorcycle riders and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book's description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamir Knot.

Spain, in 1960 in order to run with the bulls. Activists who want to get on their moto and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can jump from the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a journalist.

"Martyn L. Schorr recalls over fifty years of automotive memories, including work with Carroll Shelby, the Ford GT race program, and more"--

The best-selling Honda ever, the long-running Honda Mini Trail, was available in a huge range of models, even within each model year. The Honda Mini Trail Enthusiast's Guide covers all Honda Mini Trails and Z50 bikes produced between 1968 and 1999. Author Jeremy Polson begins with a brief introduction of the models that led up to the Mini Trail, and then jumps into a thorough analysis of the many models and iterations that Honda has offered through the years. Despite the worldwide popularity of Honda's best-selling model, no other Mini Trail book had been published, and the accuracy of information found on the Internet is suspect at best. For Z50 collectors and

enthusiasts, this book presents facts and figures found nowhere else. In addition to the hard facts regarding each model of each year, this book is filled with many rare photos that track the evolution of the Mini Trail, and unravel its mystery.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

Can two grieving souls move past loss and find redemption in love? I wasn't always this person. I was happy. I was successful. I loved my life. But after losing my husband and unborn child, I cloaked myself in unbearable grief and guilt that threatened to destroy me. Not even my family could reach me as I spiraled into despair hiding a secret I could never share. And then he walked into my life... Nash Wilson had faced his own darkness and come through the other side. His strength gave me hope for a second chance at love. He didn't want to fix me. He just wanted

to love me. But he was hiding secrets of his own. Secrets I might not be able to forgive. Secrets that could either destroy us... ..or heal us. But we'll both have to let go of our pasts if there is any hope for a future together. "The Loss Between Us" is a contemporary romance that proves the power of love can shine through life's darkest hours.
