This volume takes an unprecedented look at this type of linkage across languages and shows that there

exist three distinct variants, all subsumed under the hypernym bridging constructions. The chapters highlight the defining features of these

constructions in the grammar and their functional properties in discourse. The volume reveals that:

Bridging constructions consist of two clauses: a reference clause and a bridging clause.

Across languages, bridging clauses can be subordinated clauses, reduced main clauses, or main clauses with continuation

prosody. Bridging constructions have three variants: recapitulative linkage, summary linkage and mixed linkage. They differ in the formal makeup of the bridging clause. In discourse, the functions that bridging

After an introductory chapter, the grammar deals with phonology, word classes, the noun phrase, possession, the verb phrase, verbal and nonverbal clauses, mood and negation, and clause combinations. The phonology of Rapa Nui reveals certain issues of typological interest, such as the existence of strict conditions on the
