Mobile clients\* Apply querying, indexing, and asynchronous best practices\* Leverage mocking and dependency injection in your Apex tests\* Explore tips for developing advanced applications

The purpose of this book is to detail best practice for Apex code development on the Salesforce project which should be followed by developers working on the project. It also details some design patterns and testing frameworks which should be adopted where possible to provide robust and scalable platforms as follows:

- + Salesforce Lightning Wizard Framework
- + Salesforce Batch Apex Framework
- + Salesforce Trigger Framework
- + Salesforce Lightning Component Framework

These frameworks helps in understanding the basics of Apex / Lightning. It is designed on the top of existing Apex or Lightning Framework which extends the use cases of most common business logics. This book has

Learn to create seamless designs  
backed by a responsible  
understanding of the human mind.  
This book examines how human  
behavior can be used to integrate  
your product design into lifestyle,  
rather than interrupt it, and make  
decisions for the good of those that  
are using your product. Mindful  
Design introduces the areas of

designers, and passionately explains how those areas affect each human's day-to-day experiences with products and interfaces. You will learn about the neurological aspects and limitations of human vision and perception; about our attachment to harmony and dissonance, such as visual harmony, musical harmony; and about our brain's propensity towards pattern recognition and how we perceive the world cognitively. In the second half of the book you will focus on the practical application of what you have learned, specific to interaction and interface design. Real-world examples are used

throughout so that you can really see how design is impacting our everyday digital experience. Design is a responsibility, but not enough designers understand the human mind or the process of thought. This book explores the key factors involved and shows you how to make the right design choices.

What You'll Learn

- Review how attention and distraction work and the cost of attentional switching
- Use Gestalt principles to communicate visual grouping
- Ensure your underlying models make sense to your audience
- Use time, progression, and transition to create a composition
- Carefully examine controlling behavior

through reductionist and behaviorist motivation concepts Apply the theoretical knowledge to practical, mindful application design Who This Book Is For The primary audience for this book is professional designers who wish to learn more about the human mind and how to apply that to their work. The book is also useful for design-focussed product owners and startup founders who wish to apply ethical thinking to a team, or when bootstrapping their products. The secondary audience is design students who are either studying a 'traditional' visual design course, or a UX/interaction design course who have a desire to learn how they

might be able to apply mindful design to their early careers. Finally, a tertiary audience for this book would be tutors involved in teaching design, or peripheral, courses who may wish to incorporate its teachings into their lectures, workshops or seminars. The purpose of this book is to define the process and protocols of the TASASS™ score. It also serves as the textbook for the USCGA™ TASASS™ certification course. It was written as a manual for students, entrepreneurs, finance professionals, advisors, and consultants. It defines the types of capital available and documentation requirements to

achieve "success" in the capital marketplace. "Success" is defined as a trifecta of: 1) the enterprise acquiring capital; 2) the business becoming successful and 3) the capital source(s) receiving a positive outcome. Business Capital 101 provides clarity in an otherwise complicated environment of gaining access to capital for qualified enterprises. Our mission is to provide a compliant, professional, time-sensitive, cost-conscious, and realistic approach to the business finance process. We accomplish this mission by the implementation of a due diligence process known as the TASASS™ score. The TASASS™ score was

developed as a result of a study of more than 300 enterprises engaged by me since 2008 wherein, I was able to determine the more than 300 common attributes amongst successful and failed ventures. The TASASS™ score is a combination of a Transaction Analysis™ (TA), a Situation Analysis™ (SA) implemented in a Software (S) that results in a Score (S). The TASASS™ score is a standardized objective due diligence process that serves capital markets during the enterprise vetting phase of capitalization. The software was created based on a 10-year study of 300 applicants. The goal of the proprietary Software as a Service

(SaaS) is to identify opportunities that achieve a TASASS™ score in excess of 92.5%, known as “TASASS Prime™.” TASASS™ is an acronym for: Transaction Analysis Situation Analysis Scoring Software™. The TASASS™ score was developed by Tony Drexel Smith through the financial and human capital resources of: TASASS, Inc, The Association of Blue Moon Advisors, Blue Moon Advisors, Inc., Blue Moon Consortium, Inc., US Capital Global, SUMATICI, Inc., and TD Smith & Associates.
