Due to globalization processes, foreign language skills, knowledge about other countries and intercultural competences have increasingly become important for societies and people's social positions. Previous research on social inequality, however, has dominantly focused on the reproduction of class structures within the boundaries of a particular nation-state without considering the importance of these specific skills and competences. Within Social Class and Transnational Human Capital authors Gerhards, Hans and Carlson refer to these skills as 'transnational human capital' and ask to what extent access to this increasingly sought-after resource depends on social class. Based on Pierre Bourdieu's theory of class, they investigate this question via both quantitative and qualitative empirical analyses. In doing so the authors focus, among other examples, on the so-called school year abroad, i.e. students spending up to a year abroad while attending school - a practice which is rather popular in Germany, but also quite common in many other countries. Thus, this insightful volume explores how inequalities in the acquisition of transnational human capital and new forms of social distinction are produced within families, depending on their class position and the educational strategies parents pursue when trying to prepare their children for a globalizing world. An enlightening title, this book will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers interested in fields such as sociology, social inequality research, globalization studies and educational studies.

Instead of just describing social problems, this book helps students develop active critical thinking skills through evaluating and analyzing readings from social scientists and journalists on major social problems. The authors goal is to teach students to be lifelong critical consumers of journalistic and social scientific accounts of all kinds of social problems.

Guides you on the range of possibilities there are in the hospitality industry through stories of people working in the industry.

The chapters give an idea of current trends in Swiss society, each one framing their argument in a comparative perspective.

While the economic involvement of early modern Germany in slavery and the slave trade is increasingly receiving attention, the direct participation of Germans in human trafficking remains a blind spot in historiography. This edited volume focuses

on practices of enslavement taking place within German territories in the early modern period as well as on the people of African, Asian, and Native American descent caught up in them.
