What habits are common among good college writers? Good college writers are curious, engaged, reflective, and responsible. They read critically. They write with purpose. They tune into their audience. They collaborate and seek feedback. They know credible evidence makes them credible researchers. They revise. The Bedford Handbook, based on surveys with more than 1,000 first-year college students, fosters these habits and offers more support than ever before for college reading and writing. New writing guides support students as they compose in an ever-wider variety of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes inquiry and helps writers cite even the trickiest digital sources confidently and responsibly. Best of all, the Handbook remains a trusted companion for students because it is accessible, comprehensive, and authoritative. Instructors benefit, too. A substantially revised Instructor's Edition includes Nancy Sommers's personal mentoring—more than 100 new concrete tips for teaching with the handbook. Finally, integrated digital content is easily assignable and helps students practice and apply the handbook's lessons.

In their only fully collaborative literary work, Michael Dorris and Louise Erdrich have written a gripping novel of history, suspense, recovery, and new beginnings. The Crown of Columbus chronicles the adventures of a pair of mismatched lovers--Vivian Twostar, a divorced, pregnant anthropologist, and Roger Williams, a consummate academic, epic poet, and bewildered father of Vivian's baby--on their quest for the truth about Christopher Columbus and themselves. When Vivian uncovers what is presumed to be the most diary of Christopher Columbus, she and Roger are drawn into a journey from icy New Hampshire to the idyllic Caribbean in search of "the greatest treasure of Europe." Lured by the wild promise of redeeming the past, they are plunged into a harrowing race against time and death that threatens--and finally changes--their lives. A rollicking tale of adventure, The Crown of Columbus is also contemporary love story and a tender examination of parenthood and passion.

This selection of works by Wallace Stevens--the man Harold Bloom has called "the best and most representative American poet"--was first published in 1967. Edited by the poet's daughter Holly Stevens, it contains all the major long poems and sequences, and every shorter poem of lasting value in Stevens' career, including some not printed in his earlier Collected Works. Included also is a short play by Stevens, "Bowl, Cat and Broomstick." This book provides an economic framework for modeling global warming and addressing its negative effects.

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

Introduce kids to stop-motion animation and animated filmmaking. Animation is everywhere--from movies and TV to apps and video games--and today's tech-savvy kids know all about it. With the accessibility and ease of use of cameras and video-editing software, people of all ages are learning how to make stop-motion animation. In "Animation Lab for Kids," artists, teachers, and authors Laura Bellmont and Emily Brink present exciting, fun, hands-on projects that teach kids a range of animation techniques. From the classic zoetrope, flip book, and cel methods (which don't require any devices or technology) to different methods of shooting, the lessons require no previous experience for either child or adult. Experimenting with a variety of art materials (drawing, clay, and paper cut-outs), young animators will learn to plan a film through writing, storyboarding, and creating sets. The book also features helpful and informative sidebars on the history of the early animation techniques as well as the inspiring work of innovative and influential animators, including Kirsten Lepore, PES, Haley Morris, and William Kentridge. The authors are co-founders and lead teachers of The Good School, an arts-education school that cultivates and combines traditional art-making skills and the technologies involved in stop-motion animation filmmaking. They teach animation techniques at camps, schools, and events, including the New York International Children's Film Festival.

NEW YORK TIMES BEST SELLER - A beautiful, arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith “A puzzle of a story, then—a game... When [Morrison] called *Recitatif* an ‘experiment’ she meant it. The subject of the experiment is the reader.” —Zadie Smith, award-winning, best-selling author of *White Teeth* In this 1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, *Recitatif* keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described *Recitatif*, a story which will keep readers thinking and discussing for years to come, as “an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial.” We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, *Recitatif* is a gift to readers in these changing times.

With his “deeply informed and compassionate book...Dr. Epstein tells us that it is a ‘moral imperative’ [for doctors] to do right by their patients” (New York Journal of Books). The first book for the general public about the importance of mindfulness in medical practice, Attending is a groundbreaking, intimate exploration of how doctors approach their work with patients. From his early days as a Harvard Medical School student, Epstein saw what made good doctors great—more accurate diagnoses, fewer errors, and stronger connections with their patients. This made a lasting impression on him and set the stage for his life’s work—identifying the qualities and habits that distinguish master clinicians from those who are merely competent. The secret, he learned, was mindfulness. Dr. Epstein shows how taking time to pay attention to patients can lead to better outcomes on both sides of the stethoscope” (Publishers Weekly). Drawing on his clinical experiences and current research, Dr. Epstein explores four foundations of mindfulness—Attention, Curiosity, Beginner’s Mind, and Presence—and shows how clinicians can grow their capacity to provide high-quality care. The commodification of health care has shifted doctors’ focus away from healing and caring for their patients to the bottom line. Clinician burnout is at an all-time high. Attending is the antidote. With compassion and intelligence, Epstein offers “a concise guide to his view of what mindfulness is, its value, and how it is a skill that anyone can work to acquire” (Library Journal).

As seen in *Time*, *USA TODAY*, *The Atlantic*, *The Wall Street Journal*, and on *CBS This Morning*, *BBC*, *PBS*, *CNN*, and *NPR*, *iGen* is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today’s rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, *iGen* is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, *iGen* spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes *iGen* distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of *iGen* just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of *iGen* also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where *iGen* goes, so goes our nation—and the world.

This collection about obsession and love is the 99th volume of the Yale Series of Younger Poets Richard Siken's Crush, selected as the 2004 winner of the Yale Younger Poets prize, is a powerful collection of poems driven by obsession and love. Siken writes with ferocity, and his reader hurtles unstoppably with him. His poetry is confessional, gay, savage, and charged with violent eroticism. In the world of American poetry, Siken's voice is striking.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gall Scaramuzza, Tommy Sadler, Sally Vyaln, Jeff Bry, Faye Jones

This report discusses the findings of a nationwide study on the use of private prisons in the United States. The number of these prisons grew enormously between 1987 and 1998, with proponents suggesting that allowing facilities to be operated by the private sector could result in cost reductions of 20%. The study examined the historical factors that gave rise to the higher incarceration rates, fueling the privatization movement, and the role played by the private sector in the prison system. It outlines the arguments, both in support of and opposition to, privatized prisons, reviews current literature on the subject, and examines issues that will have an impact on future privatizations. The report concludes that, rather than the projected 20-percent savings, the average saving from privatization was only about 1 percent, and most of that was achieved through lower labor costs. Nevertheless, there were indications that the mere prospect of privatization had a positive effect on prison administration, making it more responsive to reform.

Steinman's book really stands alone among performance art books. While there are many that document what particular artists are doing, this one offers a way in for a person who wants to perform (or know more about how performance artists work). Must reading for anyone interested in performance art, it will also be fascinating to those in theatre, playwrighting, visual arts and performance of any sort.

Children's Rights in Canada

Documenting Sources in MLA Style: 2016 Update

Behind the Scenes at the Museum

In 1991, the Government of Canada ratified the United Nations Convention on the Rights of the Child, requiring governments at all levels to ensure that Canadian laws and practices safeguard the rights of children. A Question of Commitment: Children's Rights in Canada is the first book to assess the extent to which Canada has fulfilled this commitment. The editors, R. Brian Howe and Katherine Covell, contend that Canada has wavered in its commitment to the rights of children and is ambivalent in the political culture about the principle of children's rights. A Question of Commitment expands the scope of the editors' earlier book, The Challenge of Children's Rights for Canada, by including the voices of specialists in particular fields of children's rights and by incorporating recent developments.
