**An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised multiple-choice questions on all the topics within the book.**

It didn't take long for students around the world to realize that anatomy texts just don't get any better than Gray's Anatomy for Students. Only in its 2nd edition, this already popular, clinically focused reference has moved far ahead of the competition and is highly recommended by anyone who uses it. A team of authors with a wealth of diverse teaching and clinical experience has updated and revised this new edition to efficiently cover what you're learning in contemporary anatomy classes. An improved format, updated clinical material, and remarkable artwork by renowned illustrators Richard Tibbitts and Paul Richardson make anatomy easier than ever for you to master.

Unique coverage of surface anatomy, correlative diagnostic images, and clinical case studies demonstrate practical applications of anatomical concepts. And, an international advisory board, comprised of more than 100 instructors, ensures that the material is accurate, up to date, and easy to use. Uses more than 1,000 innovative original illustrations—by renowned illustrators Richard Tibbitts and Paul Richardson—to capture anatomical features with unrivalled clarity, and makes body structures easy to locate and remember from one illustration to another through consistent use of color. Includes over 300 clinical photographs, including radiological images depicting surface anatomy and common clinical applications of anatomic knowledge. Presents an organization by body region that parallels the approach used in most of today's anatomy courses. Features conceptual overviews summarizing each body region's component parts, functions, and relationship to other bodily organs. Uses clinical cases to underscore the real-life relevance of the material. Features a rewritten abdomen section for greater clarity. Provides updates and revisions to clinical material to provide you with the absolute latest knowledge in the field. Includes expanded discussions of cranial nerves for added clinical relevancy. Uses a new internal design and presents an improved index for easier retrieval of information. Provides more information on the general aspects of anatomy via introduction chapter.
