Practitioners in informal science settings--museums, after-school programs, science and technology centers, media enterprises, libraries, aquariums, zoos, and botanical gardens--are interested in finding out what learning looks like, how to measure it, and what they can do to ensure that people of all ages, from different backgrounds and cultures, have a positive learning experience. Surrounded by Science: Learning Science in Informal Environments, is designed to make that task easier. Based on the National Research Council study, Learning Science in Informal Environments: People, Places, and Pursuits, this book is a tool that provides case studies, illustrative examples, and probing questions for practitioners. In short, this book makes valuable research accessible to those working in informal science: educators, museum professionals, university faculty, youth leaders, media specialists, publishers, broadcast journalists, and many others.

An indispensable map of a classic Zen text. "Mountains and waters are the expression of old buddhas." So begins "Sansuikyo," or "Mountains and Waters Sutra," a masterpiece of poetry and insight from Eihei Dogen, the thirteenth-century founder of the Soto school of Zen. Shohaku Okumura--renowned for his translations of and magisterial teachings on Dogen--guides the reader through the rich layers of metaphor and meaning in "Sansuikyo," which is often thought to be the most beautiful essay in Dogen's monumental Shobogenzo. His wise and friendly voice shows us the questions Dogen poses and helps us realize what the answers could be. What does it mean for mountains to walk? How are mountains an expression of Buddha's truth, and how can we learn to hear the deep teachings of river waters? Throughout this luminous volume, we learn how we can live in harmony with nature in respect and gratitude--and awaken to our true nature.
