

and discussed, the differences are often glossed over. This book, therefore, attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies, through a compilation of research papers from six different countries (India, China, Singapore, Hong Kong, Nigeria and New Zealand) belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity mapping for reducing failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction, among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of "muddling-through to development", necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must-read for those interested in understanding the process of entrepreneurship and economic development in emerging economies.

Two leading scholars of the Supreme Court explain and predict its decision making.

A savvy connoisseur's guide from the editors of the world's most popular cannabis platform. Cannabis is at the very beginning of a craft and educational renaissance. It is emerging from the legislative shadows and a second awakening is occurring: people are proactively seeking information about how to properly consume and enjoy it. And cannabis is a wildly diverse product, even more so than alcohol. Consumers can experience not only different flavor profiles, but also different cerebral and body effects; they can consume using different methods, from vaporization to combustion to topical application; and they can pick and choose between an ever-growing number of different strains and products. THE LEAFLY GUIDE TO CANNABIS provides all the best tips to navigating this growing market in a definitive guide that will enhance every user's enjoyment and high.

An "insightful" (Publishers Weekly) history of the development of American capitalism and the men who made it great. Most Americans are familiar with the political history of the United States, but there is another history woven all through it, a largely forgotten history—the story of the money men. Acclaimed historian H. W. Brands brings them back to life: J. P. Morgan, who stabilized a foundering U.S. Treasury in 1907; Alexander Hamilton, who founded the first national bank, and Nicholas Biddle, under whose directorship it failed; Jay Cooke, who helped to finance the Union war effort through his then-innovative strategy of selling bonds to ordinary Americans; and Jay Gould, who tried to corner the market on gold in 1869 and as a result brought about Black Friday and fled for his life.

In this book the authors for the first time study special type of Euclid squares in the real plane, complex plane, neutrosophic plane, dual number plane and their specializations. This study can be visualized as a blend of algebra, geometry and analysis.

Improving service quality has finally become a top priority of management today, yet according to service quality expert Leonard Berry only a handful of companies have managed to determine exactly what to improve and how to improve it. For the past two years, Berry studied dozens of companies of all sizes renowned for their capacity to deliver what they promise and more. From his on-site observation of the strategies and practices of such companies as Mary Kay Cosmetics, Tattered Cover Book Store, Longo Toyota & Lexus, Lakeland Regional Medical Center, and Hard Rock Cafe, Berry has constructed a dynamic new framework for improving service. This framework provides a roadmap for implementation found nowhere else in the service quality literature. In every chapter Berry draws on his twelve years of research in service quality to explain each part of the framework in detail. He provides rich insights and inspiring examples of great service -- including numerous examples unique to this book as well as the classic success stories of USAA, Taco Bell, and many more. Berry shows that a company must (1) develop service leadership skills and values -- a concept substantially different from developing general leadership; (2) build a service quality information system; and (3) create a comprehensive service strategy based on the four principles of great service: reliability, surprise, recovery, and fairness. He demonstrates how these four principles, when adopted by the leadership and infused into the systems of a service company, are the building blocks of the framework and form the anchor for implementation. Berry shows how the "artistry" of great service can be systematically created from this foundation through a company's organizational structure, technology, and often under utilized human resources assets. He challenges service managers to set their service quality aspirations higher, and his innovative, practical ideas will help them achieve those higher standards. Linking service excellence to value creation, Berry provides solid financial reasons for the necessity of great service. Here, at last, is the book for which managers in every service industry have waited: Leonard Berry's "operating manual" for turning plans for great service into action.

The Age of Discontinuity

Written from a practical perspective, 'Business to Business Marketing' helps students with limited marketing experience understand the concepts in business-to-business marketing.

This information-packed little book, which presents the teachings of the nonphysical entity Abraham, will help you learn how to manifest your desires so that you're living the joyous and fulfilling life you deserve. Each day, you'll come to understand how your relationships, health issues, finances, career concerns, and more are influenced by the Universal laws that govern your time-space reality—and you'll discover powerful processes that will help you go with the positive flow of life. So start making your dreams a reality . . . right now!

A 21 Day Devotional with Music. To every woman that wants to see God's best in her life and is willing to do the work. This devotional is to empower women to live their best life through prayer and worship.

The Age of Discontinuity: Guidelines to Our Changing Society describes the discontinuities that are changing the structure and the meaning of economy, politics, and society. Major discontinuities exist in four areas: the knowledge technologies; changes in the world's economy; a society of organizations; and the knowledge society. This book is organized into four parts encompassing 17 chapters. Each part represents the four areas of discontinuities. Part I highlights the growth in major industries and businesses, along with economic policies related to tax incentives. Part II looks into the status of the global economy, the disparity between the rich and poor countries, and the concepts and application of the economic theory demonstrating a closed economy controlled from within by national, monetary, credit, and tax policies. Part III examines the changes in the political matrix of social and economic life. This part deals particularly with the theory of pluralism and organizations, as well as the creation of socio-political reality. Part IV focuses on the changes in the cost center and the crucial resource of the economy. Knowledge changes involve changes in labor forces and work. This book will prove useful to economists, public servants, sociologists, and researchers.
