Albania Travel Guide 2020 will help you plan your trip to this small but beautiful country in the Balkans. The guide book contains up to the date information about local cuisine, transportation, interesting places to visit, accomodation options, security and the history of Albania. Written by a local author who has tons of useful knowledge, Albania Travel Guide 2020 is a handy and useful passport to the best in Albania! When immigration policy and the treatment of Roma collide in international relations there are surprising consequences which are revelatory of the underlying tensions between internal and external policies in the European Union. This book examines the relationship of citizenship, ethnicity and international relations and how these three aspects of the State, its people and its neighbours relate to one another. It studies the wide issue of international relations, citizenship and minority discrimination through the lens of the case study of European Roma who seek refugee status in Canada on account of their persecution in Europe. The volume assesses the relationships among citizenship, state protection and persecution and minority status, and how they can intersect with and destabilize foreign affairs. The central background to the book is the European treatment of Roma, their linkages with visa and asylum policies and their human rights repercussions . The various contributions reveal how modern liberal democracies can find themselves in contradictory positions concerning their citizens - when these are looking for protection abroad - and foreigners - in search of international protection - as a consequence of visa and pre-border surveillance policies and practices.

Focusing in particular on the European borders, this volume brings together an interdisciplinary group of academics to consider questions of immigration and the free movement of people, linking control within the state to the role of the police and internal security. The contributors all take as the point of departure the significance of European governmentality within the Foucauldian meaning as opposed to the European governance perspective which is already well represented in the literature. They discuss the relation between control of borders, introduction of biometrics and freedom. The book makes available in English an analysis of an important and politically highly charged field from a major French critical perspective. It draws on different disciplines including law, politics, international relations and philosophy. This book discusses regional and continental integration in Africa by examining the management of migration across the continent. It examines borders and securitisation of migration and the challenges and opportunities that arise out of reconfigured continental demographics. The book offers insights on intra-Africa migrations and highlights how intra-continental migration creates socio-economic and cultural borders. It explores how these borders, beyond the physical boundaries of states, including the Berlin Conference-constructed borders, create cultural divides, challenges for economic integration and cross-border security, and irregular migration patterns. While the movement of economic goods is valued for regional economic integration, the mobility of people is seen as a threat. This approach to migration contradicts the intentions of true integration and development, and triggers negative responses such as xenophobia that cannot be addressed by simply managing the physical border and allowing free movement. This book engages in a pivotal discussion of these issues, which are hitherto missing in African border studies, by demonstrating the ubiquity and overreaching influence of various kinds of borders on the African continent. With multidisciplinary contributions that provide an in-depth understanding of intra-Africa migrations and strategies for enhanced migration management, this book will be a useful resource for scholars and students studying geography, politics, security studies, development studies, African studies and sociology.

A Commentary

The EU Citizenship Directive defines the right of free movement for citizens of the European Economic Area. It applies to EU citizens and their family members who move to another Member State. This might at first seem like a straightforward definition, but immediately questions arise. Who determines if a person is an EU citizen at all? What about dual citizens of two Member States, or of one Member State and a non-Member State (a 'third State')? What is the position of EU citizens who move to one Member State, and then return to their home Member State? This book provides a comprehensive commentary of the EU's Citizens' Directive tracing the evolution of the Directive's provisions, placing each article in its historical and legislative context. Special emphasis is placed on highlighting the connections and interactions between the Directive's constituent provisions so as to permit a global appreciation of the system of free movement rights to which the Directive gives effect. Each provision is annotated containing a detailed analysis of the case-law of the Court of Justice as well as of related measures impacting upon the Directive's interpretation including European Commission reports and guidelines on the Directive's implementation. The authors have drawn on their combined experience in academia, practice and the EU institutions to provide an engaging and critical account of the Citizenship Directive, approaching it directly from an EU law perspective.

In Europe, immigration is a politically potent issue—especially when it comes to the treatment of asylum seekers and illegal labor immigrants. This volume draws the reader into the complex and contradictory world of migration regulation and control, covering the wide range of different policy approaches that aim to control the entry and residence of non-EU citizens. Revealing the common framework, tendencies, and policy convergences brought about less by design than a common concern about migration's impact on the future of the EU, Modes of Migration Regulation and Control in Europe questions the effectiveness of additional efforts in terms of their fiscal and societal costs. "This important book emphasizes that European countries individually and collectively are

converging in their efforts to manage migration.”—Philip Martin, University of California, Davis

By taking stock of the implementation of the EU’s Global Strategy and the five principles that are guiding EU–Russia relations, this volume contributes to a better understanding of the current EU–Russia relationship and the prospects for overcoming the existing deadlock.

Revised 2018 edition book. This book is basically a 'Mother of All Books' on US student visa. This book will make a difference between being in the US and succeeding there. It is written in an easy to read, step by step fashion with FAQ in every section. Hundreds of real-life scenarios covered and explained by the author who is a former F-1 student at Johns Hopkins University.

This book examines the timely topic of controlling the borders of the European Schengen Area. It considers the state perspective on border regulation, subjecting day-to-day practices of EU visa policy implementation to close analytical scrutiny. The objects of the analysis are three European Member States—France, Belgium, and Italy—that implement EU visa policy in Morocco, a country whose nationals are considered to be a migratory 'risk' for the EU. The book focuses on the implementation of EU visa policy in the consulates of Belgium, France and Italy in Casablanca. The empirical research and the comparative perspective make this book distinct. The book uses a 'comprehensive implementation approach' by taking account of the local, national and supranational locations of policy-making. It builds on in-depth pioneering fieldwork and a comparative research design that includes those three locations. The research design has determined the evolving of the puzzle and the realizing of the unanticipated: cross-national differences diminish when policy is put into practice. Extensive research into the visa sections of those EU Member States provides highly original material that sheds light on the obscure black box of EU visa policy implementation, therefore contributing to policy studies, migration studies, and studies on the European Union.

What happens to the citizen when states and nations come into being? How do the different ways in which states and nations exist define relations between individuals, groups, and the government? Are all citizens equal in their rights and duties in the newly established polity? Addressing these key questions in the contested and ethnically heterogeneous post-Yugoslav states of Bosnia and Herzegovina, Macedonia and Montenegro, this book reinterprets the place of citizenship in the disintegration of Yugoslavia and the creation of new states in the Western Balkans. Carefully analysing the interplay between competing ethnic identities and state-building projects, the author proposes a new analytical framework for studying continuities and discontinuities of citizenship in post-partition, post-conflict states. The book maintains that citizenship regimes in challenged states are shaped not only by the immediate political contexts that generated them, but also by their historical trajectories, societal environments in which they exist, as well as the transformative powers of international and European factors.

Schengen Visa liberalisation in the Eastern Partnership countries, Russia and Turkey has proven to have a huge transformative potential across the justice, liberty and security policies of the countries where it has been deployed. Far-reaching technical reforms in the fields of document security, irregular migration and border management, public order security and fundamental rights have to be implemented so that visa-free travel can be allowed. Evidence provided by visa applications data reveals that visa liberalisation is a logical step, provided that the technical reforms are adopted and implemented. This study analyses the current state of play of the implementation of the EU visa policy instruments and assesses the positive impact of visa-free travel on trans-border mobility according to current visa application statistics.

In Supranational Citizenship and the Challenge of Diversity Francesca Strumia explores how European citizenship contributes to filter diversities in the EU, by shifting insider/outsider divides as experienced by immigrants, perceived by citizens and set by member states.

This volume analyses the logic and institutional origins of the European Neighbourhood Policy (ENP) and provides a critical assessment of the promises and prospects of the EU's broader neighbourhood policies. It does so both from an issue-oriented perspective and a regional standpoint.

The idea that you need a travel agent to plan and book your trip belongs in the last century. I've travelled across Europe, solo and on a budget since 2013 and have been living in Germany for close to three years. Somehow, planning for a trip especially the first few has always been a big pain in the a**. Add to that limited budget and time to plan, and you have a big headache. The truth is, that not all of us can afford to spend hundreds of dollars on a custom itinerary from a travel agent nor do we have hundreds of hours to spend on researching across thousands of blogs, booking platforms and travel magazines. I've compiled everything I know about planning, preparing and booking a Europe trip in a practical, precise manner in this book, to help you save a shit ton of time and money when doing the same. To avoid the mistakes I did on my first couple of trips. Planning your dream trip doesn't need to be expensive or time-consuming. With this handbook, you'll find out exactly how. The Oxford Handbook of International Refugee Law is a comprehensive, critical work, which analyses the state of research across the refugee law regime as a whole. Drawing together leading and emerging scholars, the Handbook provides both doctrinal and theoretical analyses of international refugee law and practice. It critiques existing law from a variety of normative positions, with several chapters identifying foundational flaws that open up space for radical rethinking. Many authors work directly in the field, and their contributions demonstrate how scholarship and practice can mutually inform each other. Contributions assess a wide range of international legal instruments relevant to refugee protection, including from international human rights law, international humanitarian law, international migration law, the law of the sea, and international and transnational criminal law. Geographically, contributors examine regional and domestic laws and practices from around the world, with 10 chapters focused on specific regions. This Handbook provides an account, as well as a critique, of the status quo, and in so doing it sets the agenda for future academic

research in international refugee law.

Tourism as a global industry is essentially a post Second-World War phenomenon. Though a number of research papers and articles have been written on different aspects of tourism, there has been a need for an authentic, comprehensive reference book on tourism. Tourism is an ever-expanding service oriented industry with high growth potential for national as well as for international community. Today, tourism has become a global as well as national level exhibition and description of places, prosperity, higher standards of living and the fast-growing concept of paid holidays. The process of tourism incorporates man, space and time as its principal components. As such, it has far reaching significance and implications of a socio-economic nature alongside the environment ones. The tourism has emerged as a most instrumental phenomenon in the economic and social development of any society. The main objective of the present book of Tourism is to organize and put together the different aspects of this complex matrix of the multiple interrelated dimensions of the tourism.

This book explores the dilemmas posed by globalisation in various aspects of law. It covers diverse themes, ranging from the impact of different legislative measures, bilateral and regional agreements in the context of trade, investment and mobility of labour, to concerns about sustainability, equity, regional balance and social security in the light of globalisation. Although it focuses mainly on India and the European Union, the issues raised and challenges discussed are of a general nature, and as such relevant in the broader context. The chapters address contemporary problems in trade, investment and labour mobility, which have emerged through the complex interaction of market, state policies and socio-environmental concerns, and are expressed on national and global platforms in the context of evolving legal system. The book is a valuable resource for students, researchers and academics engaged in comparative legal studies, particularly those interested in studying the interplay of globalisation with various areas and aspects of law at national as well as international levels. It also appeals to anyone interested in law and policy studies.
