*2018 Zora Neale Hurston/Richard Wright Legacy Award (Nonfiction)  
Finalist A timely indictment of the corporate takeover of education and the privatization—and profitability—of separate and unequal schools, published at a critical time in the dismantling of public education in America  
Public schools are among America's greatest achievements in modern history, yet from the earliest days of tax-supported education—today a sector with an estimated budget of over half a billion dollars—there have been intractable tensions tied to race and poverty. Now, in an era characterized by levels of school*

*segregation the country has not seen since the mid-twentieth century, cultural critic and American studies professor Noliwe Rooks provides a trenchant analysis of our separate and unequal schools and argues that profiting from our nation's failure to provide a high-quality education to all children has become a very big business. Cutting School deftly traces the financing of segregated education in America, from reconstruction through Brown v. Board of Education up to the current controversies around school choice, teacher quality, the school-to-prison pipeline, and more, to elucidate the course we are on today: the wholesale privatization of our schools.*

*Rooks's incisive critique breaks down the fraught landscape of "segrenomics," showing how experimental solutions to the so-called achievement gaps—including charters, vouchers, and cyber schools—rely on, profit from, and ultimately exacerbate disturbingly high levels of racial and economic segregation under the guise of providing equal opportunity. Rooks chronicles the making and unmaking of public education and the disastrous impact of funneling public dollars to private for-profit and nonprofit operations. As the infrastructure crumbles, a number of major U.S. cities are poised to permanently dismantle their public school systems—the very foundation of our*

*Gangs have been heavily pathologized in the last several decades. In comparison to the pioneering Chicago School's work on gangs in the 1920s we have moved away from a humanistic appraisal of and sensitivity toward the phenomenon and have allowed the gang to become a highly plastic folk devil outside of history. This pathologization of the gang has particularly negative consequences for democracy in an age of punishment, cruelty and coercive social control. This is the central thesis of David Brotherton's new and highly contentious book on street gangs. Drawing on a wealth of highly acclaimed original research, Brotherton explores the socially layered practices of street gangs, including community movements, cultural projects and sites of social resistance. The book also critically reviews gang theory and the geographical trajectories of streets gangs from New York and Puerto Rico to Europe,*

In opposition to the dominant gang discourses, Brotherton proposes the development of a critical studies approach to gangs and concludes by making a plea for researchers to engage the gang reflexively, paying attention to the contradictory agency of the gang and what gang members actually tell us. The book is essential reading for academics and students involved in the study of juvenile delinquency, youth studies, deviance, gang studies and cultural criminology.*
