Can aural training in music enhance your sound-discrimination abilities for languages? The study sets off to answer this question by testing 50 German-speaking students of non-linguistic degrees for their abilities to discriminate between sounds in Finnish, a language previously entirely unknown to them. 25 randomly selected subjects then went through an aural training in music for two weeks before all the subjects were retested in their aural-perceptive abilities in the Finnish language by means of a similar test containing different test items. The hypothesised positive effect of the musical intervention could be partially proved by a statistically significant mean enhancement in the final scores achieved by the trained group compared to an insignificant enhancement achieved by the control group.

The 180 Days of Problem Solving for Grade 2 offers daily problem-solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly resource provides thematic units that connect to a standards-based skill that second grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards.

Shifting your literature instruction to meet the Common Core can be tricky. The standards are specific about how students should analyze characters, themes, point of view, and more. In this new book, Lisa Morris makes it easy by taking you through the standards and offering tons of practical strategies, tools, and mentor texts for grades 2-5. She shows you how to combine the standards into effective units of study so that you can teach with depth rather than worry about coverage. Topics covered include: Teaching questioning, inferring, and author's purpose; Guiding readers to look at themes and write summaries; Showing students how to recognize structural elements of literature; Teaching the craft of writing and vocabulary development; and Helping students analyze characters and character development. Throughout this highly practical book, you'll find a variety of charts and other graphic organizers that can be easily adapted for classroom use. A list of suggested mentor texts is also available as a free eResource from our website, [www.routledge.com/books/details/9781138856172](http://www.routledge.com/books/details/9781138856172).

As Response-to-Intervention (RTI) models continue to attract a great deal of attention, school and district leaders need to understand the structures needed, the personnel required, the challenges faced, and rewards realized from RTI. Questions and Answers About RTI: A Guide to Success is designed to guide a school or district through the implementation of a new RTI program. Moran and Petruzzelli deliver a concrete understanding of the components of a successful RTI model, the resources needed, and the underlying philosophy. Educators will find this resource rich with practical examples and straight talk. It also provides an easily understandable "how-to" manual for teachers that are being asked to provide service in an RTI structure.

Graphic organizers are tried-and-true, effective teaching tools. The blank organizers in 60 Must-Have Graphic Organizers are ready to go: teachers of grades K–5 need to supply only the topics. Students can use these reproducible organizers to practice pre-writing skills, identify story elements, collect and sort information, organize schedules, and solve problems. This 128-page book is packed with teacher-generated ideas for multiple subject-area uses that can be adapted for students of varied ages, abilities, and learning styles, as well as for individual and whole-class needs.

The basic objectives of this research, which involved children in the 2nd, 5th, 8th, and 11th grades, were to describe children's uses and perceptions of animals and to discern possible developmental stages in the evolution of attitudes toward animals. Personal interviews were conducted with 267 children from 16 public schools randomly selected from urban, small city, suburban, and rural areas of the state of Connecticut. Three major developmental stages in the evolution of children's perceptions of animals were found. The first stage, occurring from the 2nd to 5th grade, was characterized by a dramatic increase in emotional concern and general affection for animals. Since very young children were the most exploitative, harsh, and unfeeling of all children in their attitudes toward animals, environmental programs should focus on the affective realm. The transition from fifth to eighth grades witnessed the second major developmental stage—a major expansion in children's intellectual and cognitive understandings of animals. Therefore, factual learning should be emphasized at this stage. The third developmental stage occurred between 8th and 11th grades, during which time children's ethical concern for the welfare and kind treatment of animals increased dramatically. This stage offers the best opportunity for teaching about ethical relationships to animals and the concepts of ecology and wildlife management. (RM).
