In the name of protecting Americans from Soviet espionage, the post-1945 Red Scare curtailed the reform agenda of the New Deal. The crisis of the Great Depression had brought into government a group of policy experts who argued that saving democracy required attacking economic and social inequalities. The influence of these men and women within the Franklin D. Roosevelt administration, and their alliances with progressive social movements, elicited a powerful reaction from conservatives, who accused them of being

subversives. Landon Storrs draws on newly declassified records of the federal employee loyalty program—created in response to claims that Communists were infiltrating the U.S. government—to reveal how disloyalty charges were used to silence these New Dealers and discredit their policies. Because loyalty investigators rarely distinguished between Communists and other leftists, many noncommunist leftists were forced to leave government or deny their political views. Storrs finds that loyalty defendants were more numerous at higher ranks of the civil service than previously thought, and that many were women, or men with accomplished leftist wives. Uncovering a forceful left-feminist presence in the New Deal, she also shows how

opponents on the Right exploited popular hostility to powerful women and their supposedly effeminate spouses. The loyalty program not only destroyed many promising careers, it prohibited discussion of social democratic policy ideas in government circles, narrowing the scope of political discourse to this day. Through a gripping narrative based on remarkable new sources, Storrs demonstrates how the Second Red Scare repressed political debate and constrained U.S. policymaking in fields such as public assistance, national health insurance, labor and consumer protection, civil rights, and international aid. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our

The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. The New Deal shaped our nation's politics for decades, and was seen by many as tantamount to the "American Way" itself. Now, in this superb compact history, Eric Rauchway offers an informed account of the New Deal and the Great Depression, illuminating its successes and failures. Rauchway first describes how the roots of the Great Depression lay in America's post-war economic policies--described as "laissez-faire with a vengeance"--which in effect isolated our nation

from the world economy just when the world needed the United States most. He shows how the magnitude of the resulting economic upheaval, and the ineffectiveness of the old ways of dealing with financial hardships, set the stage for Roosevelt's vigorous (and sometimes unconstitutional) Depression-fighting policies. Indeed, Rauchway stresses that the New Deal only makes sense as a response to this global economic disaster. The book examines a key sampling of New Deal programs, ranging from the National Recovery Agency and the Securities and Exchange Commission, to the Public Works

Administration and Social Security, revealing why some worked and others did not. In the end, Rauchway concludes, it was the coming of World War II that finally generated the political will to spend the massive amounts of public money needed to put Americans back to work. And only the Cold War saw the full implementation of New Deal policies abroad--including the United Nations, the World Bank, and the International Monetary Fund. Today we can look back at the New Deal and, for the first time, see its full complexity. Rauchway captures this complexity in a remarkably short space, making this book an

"Frontier anxiety," then, really was caused, not by the closing of the frontier, but by the perception that the frontier was closing, argues David Wrobel. As early as the 1870s and through the 1930s, many Americans believed an important era had ended and worried about how this closure would affect society and democracy. In this book, Wrobel illustrates more than just how the perceived demise of the frontier brought about a longing for wilderness and the pioneer spirit. He emphasizes how it influenced debate on public

land and immigration policy, expansionism, and the merits of individualistic and cooperative political systems. In addition, he relates how it affected and was affected by such diverse social and political issues as racism, industrialization, irrigation, tenant farming, class struggle, government intervention, and the naturalist movement. Wrobel doesn't focus rigidly on Frederick Jackson Turner or question the originality of Turner's thesis - that the frontier molded the nation's character - as historians have done in the past. Instead he suggests that the writings of Turner and other intellectuals

were symptomatic of a frontier anxiety that began to take hold in the 1870s. Concentrating on the notions of these intellectuals over several decades, Wrobel shows how their reactions to the perceived ending of American exceptionalism - created by a unique frontier experience - helped shape the nation's cultural and political future.

This book challenges generally accepted views by concluding that the critical press, so often characterized by pro-New Deal historians as conservative or reactionary, was in fact a good deal more liberal than Roosevelt and his advisors. Without its opposition to Roosevelt's policies during the years before Congress began to reassert its constitutional responsibilities, the United States might well have deviated considerably from

the path of constitutional and democratic government. From 1933 to 1938 the critical press (both newspapers and journalists) fulfilled much of the function of (and perceived of itself as) the equivalent of a parliamentary opposition to Roosevelt's policies and programs, since this was a period when the Republican opposition was moribund and Congress was generally submissive to the executive branch. Best describes the reaction of the critical press to FDR's domestic policies toward enhancement of the power of the White House at the expense of Congress and the Supreme Court. This enhancement gradually led many in the press to conclude that the basis for dictatorial rule was being laid by Roosevelt and/or those around him. This study will be of interest to

Volume two of the Pulitzer Prize-winning author's Age of Roosevelt series describes Franklin Delano Roosevelt's first tumultuous years in the White House. Coming into office at the bottom of the Great Depression, FDR told the American people that they have nothing to fear but fear itself. The conventional wisdom having failed, he tried unorthodox remedies to avert economic collapse. His first hundred days restored national morale, and his New Dealers filled Washington with new approaches to recovery and reform. Combining idealistic ends with realistic means, Roosevelt proposed to humanize, redeem, and rescue capitalism. The Coming of the New Deal, written with Schlesinger's

First of all, Roosevelt proclaimed “a three-day ‘bank holiday’” and shortly after that the Emergency Banking Relief Act (EBRA) to restore the collapsed banking. The Agricultural Adjustment Act(AAA) was an attempt to solve the agricultural difficulties, and the recovery of the industry should be achieved by the National Industrial Recovery Act (NIRA). The resulting most predominant and urgent problem in all sectors was increasing unemployment and impoverishment which Roosevelt attacked by varying make-

work programs. He was aware of the alarming dimensions of this problem. Regarding this fact, taking the jobless to work was Roosevelt's most important concern and as it was the basis of the well-being and prosperity of the nation it had priority over all other problems. What sets Roosevelt apart from the other presidents was his faith in the future and his ability to convince the American people that they must also believe in the future to regain a normal way of life.

Roosevelt's work relief programs, especially during the First Hundred Days, have repeatedly been debated up to this day. There have always been controversial discussions about the effects and failures. For all that reasons, in my paper I will concentrate on the make-work programs and examine its

By examining the textile, clothing, coal, automobile, and steel industries, Vittoz shows that a variety of interest-group pressures were responsible for many New Deal labor reforms. The author demonstrates that labor and its political allies took much of the initiative for proposing new laws and policies and that reforms were possible because portions of the business community believed that government-enforced labor standards could serve their own competitive interests. A look at how the New Deal fundamentally changed American life, and why it remains relevant today "The New Deal was America's response to the gravest economic and social crisis of the twentieth century. It now serves as a source of inspiration for how we should respond to the gravest crisis of the twenty-first. There's no more fluent and informative a guide to that history than
