

Secondary School Past Year Papers

This book offers a detailed look into the how and what of mathematics instruction in Singapore. It presents multiple aspects of mathematics instruction in schools, ranging from the unique instructional core, practices that promote mastery, development of conceptual knowledge through learning experiences, nurturing of positive attitudes, self-regulation of learning and development and use of instructional materials for making connections across mathematical ideas, developing mathematical reasoning and developing fluency in applying mathematical knowledge in problem solving. The book presents a methodology that is successful in documenting classroom instruction in a comprehensive manner. The research findings illuminate instruction methods that are culturally situated, robust and proven to impact student learning. It demonstrates how a unique data source can be analysed through multiple lenses and provides readers with a rich portrait of how the school mathematics instruction is enacted in Singapore secondary schools.

Secondary School Examinations

Secondary School Examinations: Facts and Commentary presents the importance and development of the secondary school examinations. This book explains the pass/fail concept of the General Certificate Education (G.C.E.) wherein the candidates would be classified as either passing or failing with no sub-divisions within these two categories. Organized into eight chapters, this book begins with an overview of the underlying principles of the G.C.E. examination for teachers, students, and parents. This text then examines the development of Schools Council for Curriculum and Examinations, which signaled a fresh approach by the central authority to the problem of comparing standards by means of calibration tests. Other chapters consider the method of appointing small sub-committees to work on a syllabus whereby the subject advisory panels take care to guarantee a preponderance of teachers, not forgetting to ensure that boys' as well as girls' schools are represented. This book is a valuable resource for teachers, students,

and parents.

Mathematics Instructional Practices in Singapore Secondary Schools

In 1983 the seminal report issued by the National Commission on Excellence in Education, "A Nation at Risk," charged that most American high schoolers were following a general course of instruction, choosing neither the college-preparatory track nor the vocational option. This pattern, the report complained, had fostered low expectations and a curricular hodge-podge of classes that failed to prepare students for college or work. The commission called on states to implement academic requirements for all students, regardless of background, including four years of English and three years each of science, mathematics, and social studies. Students should not be sorted by their presumed future destinations, the commission reasoned, but should be offered an equal opportunity to get a high-quality education to fit them either for postsecondary education or the modern workplace. Two decades after the commission called on states to reform the high school environment and raise graduation requirements, the Brown Center on Education Policy at the Brookings Institution convened a group of prominent scholars to explore the current state of America's high schools, focusing on new research about reforming these institutions that are so important in the lives of the nation's adolescents. The questions considered reflected the diversity of the participants and covered a variety of

areas—historical, international, sociological, and practical. Data gathered by the U.S. Department of Education show students today are taking many more advanced courses in mathematics and the sciences, while at the same time test scores do not reflect the increases in enrollments in academic courses. In addition, large score gaps remain among students from different social groups. Reform of the high schools must take into account the elementary and middle schools that prepare students and the postsecondary institutions to which students aspire. Adolescent culture and students' views about school and academic work play important roles in student achievement, as do the family and contemporary society in shaping of adolescent behavior. No matter their background, all participants agreed that the key to a successful high school rests with the extent to which it recognizes and strengthens its commitment to the intellectual growth of its students.

The Report of the President

Central Teaching Eligibility Test (CTET) is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher. The exam is conducted into 2 papers: Paper 1 for class 1-5 and Paper 2 for class 6-8. Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers. The new edition of CTET Cracker “CTET & TETs Previous Years’ Papers [2020-2011] Paper II Social Science/ Studies” for class 6th to 8th has been prepared as per the latest examinations based on various teaching patterns. The book covers all the papers of CTET & other State TETs from [2020 to 2011] i.e. 3000 Solved Questions are given so that candidates could understand the difficulty level and latest paper pattern & trends and prepare accordingly. Answers of each question have been provided in a well explained and lucid manner so that each topic could be memorize with the clear concepts. Preparation from this book will help you crack the CTET and other TETs in first attempt. TABLE OF CONTENT Previous Years’ Paper [2020 – 2011].
