Sherrie Palm's book Pelvic Organ Prolapse: The Silent Epidemic, takes a hard look at a common but rarely discussed women's health concern. There are more than 300,000 surgeries for POP annually and it is estimated that 50% of childbearing women experience this condition. Palm's personal experience helped her understand all aspects of this common but seldom understood female health condition. Pelvic Organ Prolapse: The Silent Epidemic explains the condition, the treatment options available, how POP impacts a woman's sexuality, and how to self-care after surgery. Why is pelvic organ prolapse still stuffed in the closet? Women in every walk of life may now access pivotal information to assist navigation of pelvic organ prolapse; Sherrie Palm talks about POP out loud in terms all women can understand. As a woman who experienced the condition, Palm explores pelvic organ prolapse from multiple angles and shares pivotal information women need to recognize symptoms and seek the medical attention they need.

In this book I describe in detail the procedures before, during and after your MRI exam. I placed pictures of every position in every angle for an open and closed MRI scanner. These pics are beautifully taken to show the comfort level of pursuing an MRI exam mostly in a open scanner. You will not be disappointed by this material because I put all my heart into it from the years of experience in helping patients with the claustrophobia blues.

There are times when people just can't identify with the attributes of their Sun or Moon sign. In fact, they may feel that they are an antithesis of their zodiac sign. You may also have observed it. Your Leo friend may not seek attention, may be because he or she has a Capricorn ascendant. Your Sagittarius friend is very possessive, may be because he or she has a Scorpio Ascendant. It is easy to understand why some people do not correspond to their Sun or Moon signs once you know about what is the rising sign or Ascendant in a horoscope. Ascendant is the degree of the zodiac sign that was highest on the Eastern horizon at the time and place of birth. When seen from Earth, the sky seems to move, so the entire zodiac can be observed in a span of 24 hours day which means the rising sign changes on the Eastern horizon every 2 hours because there are 12 zodiac signs. People tend to associate their physical, emotional and spiritual attributes more with rising sign at times.

Many martial arts and qigong practices speak of the need to move from the center, to 'round the crotch', to open the Huiyin point, and to relax the waist and hips. Due to the "private" nature of this area of the body, there are few if any martial art teachers who publicly describe methods regarding how to achieve these results. And so the pelvic area (a.k.a. dan-tian or hara) remains the most difficult area of the body for many practitioners to understand, feel, relax, and open. This book weaves together personal insights, practical tips, and a wide range of excerpts and references taken from martial arts, qigong, and other clinical books and articles to offer a functional path for higher level martial arts development. This is the first and only book dedicated to the topic of developing the pelvic area for the martial arts. You simply will not find this wealth of information, in one place, anywhere else!

The combined sensation of Samson's hard length massaging inside her and Greg's tongue flicking between her folds immediately brought her to climax, making her scream out as her body clenched down around Samson. Today as in the ancient time special exercises aimed at acquiring "Internal Mastery"(GONG FU) are one of the most important elements of Shaolin monks training. Those exercises is the core of the Shaolin martial training, they are the key to the true summit of mastery. An old proverb says: "If you exercise only the technique (style) but ignore special training you will be a nobody till your old days." "Special training" implies particular exercises for developing both WAI ZHUANG - "the External Power" and NEI ZHUANG - "the Internal Power." Those exercises (training procedures) are collected under a common title - LIAN GONG, literally "Exercising to Acquire Mastery."

"Come, sit by me," says Grandmother. "Take this chalk in your hand. Now draw a dot and concentrate all your energy into this one dot. It is the beginning and the end, the navel of the world." So Fawzia Al-Rawi describes her grandmother's first lesson about the ancient craft of Oriental dance. Grandmother's Secrets always circles back to this grandmother and this young girl, echoing the circular movements of the dance itself. Al-Rawi has written a strikingly graceful and original book that blends personal memoir with the history and theory of the dance known in the West as "belly dancing." It is the story of a young Arab girl as she is initiated into womanhood. It is a history of the dance from the earliest times through the days of the Pharaohs, the Roman Empire, to the Arab world of the last three centuries. It is a personal investigation into the effects of the dance's movements on individual parts of the body and the whole psyche. It is a guide to the actual techniques of the dance for those who are inspired to put down the book and move. Al-Rawi conveys in this book not only the history and technique of grieving and mourning dances, pregnancy and birth dances, but the spirit of these age-old rituals, and their possibilities for healing and empowering women today.
